Overview

Use the application to access your Google Drive documents from the printer control panel and print them. You can also delete, filter, or search your documents and search for folders.

Note: This application requires a Google account.

Configuring the application

Acquiring a Google account

Before configuring the application, make sure you have a valid Google account, taking note of your user name and password. If you do not have access to a Google account, then go to the Google Web site and create one before configuring these settings.

Accessing the configuration page for the application

1 Open a Web browser, and then type the printer IP address.

Note: View the IP address in the TCP/IP section of the Network/Ports menu.

2 Click **Settings** or **Configuration**.

3 Depending on your printer model, do one of the following:

- Click **Apps > Apps Management**.
- Click **Device Solutions > Solutions (eSF)**.
- Click **Embedded Solutions**.

4 Select the application from the list, and then click **Configure**.

Customizing the application icon

1 From the Embedded Web Server, access the configuration page for the application.

2 Specify the text and image that you want to appear on your home screen.

Note: Some applications require changing the settings from the profile page.

3 Apply the changes.

Setting up the function access control

1 Open a Web browser, and then type the printer IP address.

Note: View the IP address in the TCP/IP section of the Network/Ports menu.

2 Click **Settings** or **Configuration > Security > Security Setup**.

3 From the Advanced Security Setup, configure a building block.

4 Set up a security template using the previously configured building block.

- 5 Click **Access Controls**, and then depending on your printer model, do either of the following:
 - Click **Device Apps**, and then locate the application and select the previously configured security template.
 - Select an unused solution function (Solutions 1 to 10), and then select the previously configured security template.
- 6 Click **Submit**.

Removing OAuth tokens

- 1 From the Embedded Web Server, access the configuration page for the application.
- 2 From the OAuth Token Management section, select how you want to remove tokens.
Note: For more information on each setting, see the mouse-over help.
- 3 Apply the changes.

Configuring confirmation options

- 1 From the Embedded Web Server, access the configuration page for the application.
- 2 Select the confirmation screen message that you want to appear.
- 3 Apply the changes.

Using the application

Connecting the printer to your Google account with OAuth

When you first access the application, it prompts you to authorize the printer to access your Google account. The authorization process starts when you access the application from the printer home screen. Make sure to complete the process within 30 minutes.

- 1 From the home screen, touch the application icon.
- 2 From the authorization screen, print the instructions or e-mail the instructions to yourself.
- 3 Follow the Web site instructions to complete the authorization process.
- 4 Touch **Next** on the control panel.

Note: Wait about 30 seconds before accessing the application again. Your next access automatically connects to your Google account.

To disconnect the printer from your Google account, access the account security settings, and then revoke access to the application. For more information, see the help information for Google.

Printing documents

You can send documents to a printer registered to your Google account from a Web-connected device.

- 1 From the home screen, touch the application icon.
- 2 If necessary, select a folder.
- 3 Select a document, and then print it.

Filtering and searching for documents or folders

- 1 From the home screen, touch the application icon.
- 2 Do either of the following:
 - To filter documents, touch **Filter**, and then select a category.
 - To search for documents or folders, touch **Search** or , and then type the name of the document or folder. Touch **Next**.

Troubleshooting

An application error has occurred

Try one or more of the following:

Check the system log

- 1 Open a Web browser, and then type the printer IP address.
Note: View the IP address in the TCP/IP section of the Network/Ports menu.
- 2 Click **Settings** or **Configuration**.
- 3 Depending on your printer model, do one of the following:
 - Click **Apps > Apps Management**.
 - Click **Device Solutions > Solutions (eSF)**.
 - Click **Embedded Solutions**.
- 4 Click **System > Log**.
- 5 Select and submit the appropriate filters to view the log entries.

Contact your solutions provider

If you still cannot resolve the problem, then contact your solutions provider.

Documents do not appear in the list

Try one or more of the following:

When using the filtering feature, make sure to select a category that contains documents

Make sure that all appropriate network cables are securely connected and that the printer network settings are correctly configured

For more information, see the printer *User's Guide*.

Contact your Lexmark representative

Cannot authenticate user

Try one or more of the following:

If you are using an older version of the application, update it to version 2.0 or later

Make sure that the user credentials are correct

Make sure that all appropriate network cables are securely connected and that the printer network settings are correctly configured

For more information, see the printer *User's Guide*.

Make sure that your OAuth token is still active

If your OAuth token has been removed from the printer, then register your account again.

Contact your solution provider

If you still cannot resolve the problem, then contact your solution provider.

Appendix

Exporting or importing a configuration file

- 1 From the Embedded Web Server, access the configuration page for the application.
- 2 Export or import the configuration file.

Notes:

- If a **JVM Out of Memory** error occurs, then repeat the export process until the configuration file is saved.
- If a timeout occurs and a blank screen appears, then refresh the Web browser, and then click **Apply**.

Checking the version of the Embedded Solutions Framework

- 1 From the Embedded Web Server, click **Reports > Device Settings**.
- 2 In the Embedded Solutions section, note the value associated with “Framework =.”

Note: To view the complete list of supported printers for each version of the Embedded Solutions Framework, see the *Readme* file.
