Understanding the printer software

Your printer software includes the:

- **Page Setup dialog box**
- **Print dialog box**
- **Control Panel**

To customize the settings for your document, use the **Page Setup dialog box** and the **Print dialog box**. For more information on which settings to select for your document, see **Printing ideas**. When you installed the printer software, the Page Setup and Print dialog boxes were set to these default settings:

Print Quality: Normal

Paper Type: Automatic

Paper Size: A4 or U.S. Letter

Orientation: Portrait

Note: Your printer has paper type sensing capability that automatically detects most paper types. For more information, see **Using the paper type sensor**.

Using the paper type sensor

Your printer has a paper type sensor. If you load transparencies or plain, coated, photo, or glossy paper, the printer detects the paper type and automatically adjusts the Paper Type setting in the Print dialog box accordingly. To enable the printer to automatically detect the paper type loaded in your printer:

- 1 From the software application File menu, choose Print.
- 2 From the pop-up menu in the upper left corner, choose Paper Type/Quality.
- 3 From the Paper Type pop-up menu, choose Automatic.
- 4 To save the setting for future use, click Save Settings.
- 5 Click Print.

Note: Although the printer can detect the type of paper you are using, it cannot detect the paper size. Make sure you select the appropriate paper size in the **Page Setup dialog box**.

Basic printing is as easy as:

Step 1: Load the paper

Step 2: Customize the printer settings

Step 3: Print your document

Note: For help printing on specialty paper (such as photo paper, banner paper, transparencies, or iron-on transfers), see **Printing ideas**.

Printer overview

Basic printing

Printing ideas

Using this
Guide...

Step 1: Load the paper

You can load up to 100 sheets of paper, depending on the thickness and weight of your paper.

- 1 Make sure the paper support is upright.
- 2 Place the paper against the right side of the paper support with the print side facing you.

Note: A4 paper should extend slightly beyond the top of the paper support and letter size paper should align with the top of the paper support. Do not force the paper too far into the printer.

- 3 Squeeze and slide the paper guide to the left edge of the paper.

For information about loading specialty paper, see [Printing ideas](#).

Printer overview

Basic printing

Printing ideas

Maintenance

Troubleshooting

Index

Using this
Guide...

Step 2: Customize the printer settings

If you are using plain A4 or letter size paper and you want normal print quality, you only need to adjust the paper size printer setting.

If you are using specialty paper, such as photo paper, card stock, envelopes, or banner paper, see [Printing ideas](#) to customize your printer settings.

For more information about the different printer settings, see [Understanding the printer software](#).

Printing photos

You can load up to 25 sheets of coated, photo, or glossy paper, depending on the thickness of the paper. You may want to print your photos on plain paper before loading photo paper and changing your settings. This ensures that you do not waste photo paper perfecting the image you would like to print. To print on photo cards, see [Printing cards](#).

Step 1: Load the photo paper

- If your photo paper came with instructions, read them carefully.
- Make sure your paper is not used or damaged.
- Make sure the glossy or coated side is facing you.
- Load the paper against the right side of the paper support.

Note: Do not push the paper too far into the printer.

- Squeeze and slide the paper guide to the left edge of the paper.

Printing handouts

You can conserve paper by printing handouts. Handouts are multiple page images on a single sheet of paper. You can load up to 100 sheets of paper, depending on the thickness of the paper.

Step 1: Load the paper

- If your paper came with instructions, read them carefully.
- Make sure your paper is not used or damaged.
- Make sure the print side is facing you.
- Load the paper vertically against the right side of the paper support.

Note: Do not push the paper too far into the printer.

- Squeeze and slide the paper guide to the left edge of the paper.

Printer overview

Using this
Guide...

Step 2: Customize the print settings

For help, see [Understanding the printer software](#).

You can print your handouts on one side or on both sides of the paper.

- 1 Choose a paper size and orientation:
 - a From the software application File menu, choose Page Setup.
 - b From the Paper Size pop-up menu, choose a paper size.
 - c Choose Portrait or Landscape orientation, and then click OK.
- 2 Choose a print quality and paper type:
 - a From the software application File menu, choose Print.
 - b From the pop-up menu in the upper left, choose Paper Type/Quality.
 - c Select a paper type for your document.
 - d Select a print quality for your document.
 - e From the pop-up menu in the upper left, select Layout.
 - f Choose Pages/Sheet.

Guide...

- g** From the Pages per Sheet pop-up menu, select the number of pages you want to print on one sheet.

The displayed graphic shows you how the printed page will look.

- h** Select Print Borders to print a border around each page image.

If you are printing your handouts on one side of the paper, continue with the next step to print your handouts.

To print your handout on both sides of the paper:

- 1** Select Print on Both Sides.
- 2** Select a graphic for the binding edge (Top or Side Flip).

If you select Top Flip, the pages of your handouts turn like the pages of a legal pad. If you select Side Flip, the pages of your handouts turn like the pages of a magazine.

Printing iron-on transfers

You can load up to 25 iron-on transfers, depending on the thickness of the iron-on transfers. You may want to print your image on plain paper before printing it on an iron-on transfer. This ensures you do not waste iron-on transfers perfecting the image you would like to print. When the image prints to your satisfaction, load the iron-on transfers.

Step 1: Load the iron-on transfers

- If your transfers came with instructions, read them carefully.
- Make sure your transfers are not used or damaged.
- Make sure the print (blank) side is facing you.
- Load the iron-on transfers vertically against the right side of the paper support.

Note: Do not push the iron-on transfers too far into the printer.

- Squeeze and slide the paper guide to the left edge of the iron-on transfers.

Aligning the print cartridges

Typically, you only align print cartridges after installing or replacing a cartridge. However, you may also need to align cartridges when:

- Characters are improperly formed or are misaligned at the left margin.
- Vertical, straight lines are wavy.

To align the cartridges:

- 1 Load plain paper. For help, see [Load the paper](#).
- 2 From the Apple menu, choose Control Panels.
- 3 Choose the Lexmark Z55 Control Panel.
- 4 From the Cartridges tab, click Align Cartridges.

The Cartridge Alignment dialog box appears.

Cleaning the print cartridge nozzles

To improve print quality, you may need to clean the print cartridge nozzles. Clean the nozzles when:

- Characters are not printing completely.
- White dashes appear in graphics or printed text.
- Print is smudged or too dark.
- Vertical, straight lines are not smooth.
- Colors on print jobs are faded or they differ from the colors on the screen.

To clean the nozzles:

- 1 Load paper. For help, see [Load the paper](#).
- 2 From the Apple menu, choose Control Panels ▶ Lexmark Z55 Control Panel.
- 3 On the Cartridges tab, click Clean Print Nozzles.
A nozzle page prints, forcing ink through the nozzles to clean any that are clogged.
- 4 Print your document again to verify your print quality has improved.
- 5 To further improve print quality, try [Wiping the print cartridge nozzles and contacts](#), and then print your document again. If the print quality has not improved, try [Cleaning the print cartridge nozzles](#) up to two more times.

[Printer overview](#)[Basic printing](#)[Printing ideas](#)[Maintenance](#)[Troubleshooting](#)[Notices](#)[Index](#)[Using this Guide...](#)

Wiping the print cartridge nozzles and contacts

If the print quality does not improve after [Cleaning the print cartridge nozzles](#), there may be dried ink on the nozzles or contacts.

- 1 Remove the print cartridge. For help, see [Replacing the print cartridge](#).
- 2 Dampen a clean, lint-free cloth with water.

a Hold the cloth against the nozzles for about three seconds. Gently blot and wipe in one direction.

b Use another clean section of cloth. Hold the damp cloth against the contacts for about three seconds. Gently blot and wipe in one direction.

- 3 Allow the nozzles and contacts to dry completely.
- 4 Reinstall the print cartridges, and then print your document again.

Preserving the print cartridges

To ensure the longest life from your print cartridges and optimum performance from your printer:

- Keep a new cartridge in its packaging until you are ready to install it.
- Do not remove a cartridge from the printer except to replace it, clean it, or store it in an airtight container. The cartridge will not print correctly if left exposed for an extended period of time.

Lexmark's printer warranty does not cover repair of failures or damage caused by a refilled cartridge. Lexmark does not recommend use of refilled cartridges. Refilling cartridges can affect print quality and cause damage to the printer. For best results, use Lexmark supplies.

Solving general printing problems

When you have a printing problem, first make sure:

- The power supply is plugged into the printer and a properly grounded electrical outlet.
- Both the computer and the printer are on. If you are using your printer on a network, make sure your computer is connected to the network, your Lexmark adapter is on, and all indicator lights are on. For more information, refer to the adapter documentation.
- No printer lights are blinking. For help, see [Understanding error messages and flashing lights](#).
- The USB cable is securely attached to your printer and to your computer or Lexmark adapter.
- The printer software is installed correctly:
 - a From the Apple menu, choose Control Panels.
 - b If there is not a Control Panel for your printer, install the printer software.
- The paper is loaded correctly. For help, see [Load the paper](#).
- You installed the cartridges correctly. For help, see [Replacing the print cartridge](#).

Printer ejects a blank page after appearing to print

Make sure:

- You remove the sticker and transparent tape from the back and bottom of the print cartridges. For help, see [Replacing the print cartridge](#).
- Your cartridge does not have clogged nozzles. Try [Cleaning the print cartridge nozzles](#).

Printer prints very slowly

- Close any software applications not in use.
- Check the document you are printing. Photos and graphics may take longer to print than regular text. Documents that are large or that contain background images may also take longer to print.
- Check the printer to see if another document is being printed. Print jobs are printed in the order the printer receives them. If other documents were sent to the printer before yours, your document is delayed until the other documents print.
- Decrease the print quality setting to Normal or Quick Print.

Note: Higher print quality settings result in better quality documents, but may take longer to print.

Recovering when your computer stops responding

If your computer locks up while your document is printing, you may need to turn off the printer and the computer. When you turn them back on, the desktop printer spooler may attempt to start printing the job that was in the queue before the computer locked up. This could cause your system to lock up again.

One way to recover from this problem is to:

- 1 Disconnect the printer cable from your computer.
- 2 Restart your computer.
- 3 Delete the print job:
 - a From your desktop, double-click the Lexmark Z55 printer icon.
 - b Highlight your print job.
 - c Click the Trash button.
- 4 Plug the printer cable back into the computer.

Another way to recover from this problem is to:

- 1 Turn the printer and the computer off.
- 2 Press and hold the Shift key and turn the computer on.

Using this
Guide...

- 3 Continue to hold the Shift key until you see the Mac OS screen and the words Extensions Off.
- 4 Release the Shift key.
- 5 Locate the Lexmark Z55 printer icon on your desktop. The inactive printer spooler has an X over it.
- 6 Double-click the Lexmark Z55 printer icon.
- 7 Drag your print jobs to the trash can.
- 8 Restart the computer to enable extensions.

Paper misfeeds or multiple sheets feed

Make sure:

- The edges of your paper are not curled.
- Your paper is recommended for inkjet printers.
- A piece of paper from a previous print job is not jammed in the printer.
- You do not load too much paper. Depending on the weight of the paper, you can load up to 100 sheets of plain paper, 10 transparencies or labels, and 10 envelopes or cards.
- You do not force the paper too far into the printer. For example, A4 paper should extend slightly beyond the top of the paper support and letter size paper should align with the top of the paper support.
- The paper guide is against the left edge of the paper.
- The paper guide does not cause the paper to bow.
- The printer is on a flat, level surface.
- The printer settings you have chosen are correct for the type of document you are printing. For help, see [Basic printing](#) or [Printing ideas](#).

Printer does not feed envelopes or specialty paper

Make sure:

- Your printer feeds paper without problems. Load the envelopes or specialty paper vertically against the right side of the paper support. Squeeze and slide the paper guide to the left edge of the envelopes or specialty paper. For help, see **Printing ideas**.
- You select the appropriate envelope or specialty paper size in the **Page Setup dialog box** and the appropriate paper type in the **Print dialog box**.
- You are using a specialty paper or envelope size supported by your printer.
- Your software application is designed to print envelopes. For help, check your software application documentation.
- The envelope or specialty paper is not jammed. For help, see **Printer has a paper jam**.
- Your printer is not being held or paused. To check the printer status:
 - a From your desktop, click the Lexmark Z55 printer icon.
 - b From the Printing menu, make sure Start Print Queue is selected.

Printer has a paper jam

If the paper is lodged too far into the printer and cannot be removed:

- 1 Turn the printer off.
- 2 Turn the printer back on.
- 3 If the printer does not automatically eject the page:
 - a Turn the printer off.
 - b Pull firmly on the paper to remove it.

If you cannot reach the paper, raise the front cover, pull the paper out, and then close the front cover.

- c Turn the printer on.

Note: Do not force the paper too far into the printer. For example, A4 paper should extend slightly beyond the top of the paper support and letter size paper should align with the top of the paper support.

Improving print quality

If print quality is unsatisfactory, you may need to adjust your margin settings, choose a higher print quality, align the print cartridges, or clean the nozzles.

Click one of the topics below for more information on how you can improve print quality:

- **Print is too dark or smudged**
- **Printed characters are improperly formed or misaligned**
- **Vertical straight lines are not smooth**
- **Colors on the printout differ from the colors on the screen**
- **Print smears on the page**
- **Colors on the printout are faded**
- **Printed pages have alternating bands of light and dark print (intermittent printing)**
- **Characters are missing or unexpected**
- **Print quality is poor at the edges**
- **Photos do not print as expected**

Print is too dark or smudged

- Make sure the paper is straight and not wrinkled.
- Let the ink dry completely before handling the paper. You might want to try the **Wait for pages to dry** function.
- Make sure the paper type and paper size settings in the printer software match the paper loaded in the printer. For help, see **Understanding the printer software**.
- Change the print quality setting to Quick Print.
- Try **Cleaning the print cartridge nozzles**.

Vertical straight lines are not smooth

To improve the print quality of vertical straight lines in tables, borders, and graphs:

- Select a higher print quality.
- Try **Aligning the print cartridges**.
- Try **Cleaning the print cartridge nozzles**.

Print smears on the page

- Try the **Wait for pages to dry** function.
- The next page exiting the printer may be smearing the ink. Remove each page as it exits the printer and let it dry completely before stacking.
- Try **Cleaning the print cartridge nozzles**.

Printed pages have alternating bands of light and dark print (intermittent printing)

- Select the Better or Best print quality.
- Print the document in the foreground rather than in the background. For help, see **Print in: Foreground**.
- If your printer is connected to your computer through a hub or peripheral device, such as a scanner or fax machine, connect the printer directly to your computer with a USB cable.
- If your printer is connected to your network, connect the printer directly to your computer with a USB cable.

Colors on the printout differ from the colors on the screen

- A cartridge may be low on ink. For help, see [Replacing the print cartridge](#).
- Use a different paper brand. Each paper brand accepts ink differently and prints with color variations.

For ColorSync color matching, select a profile and rendering intent:

- 1 From the software application File menu, choose Print.
- 2 From the pop-up menu in the upper left corner, choose Color.
- 3 Select ColorSync Color Matching.
- 4 Select a printer profile and a rendering intent.

Select Natural Color as the document color:

- 1 From the software application File menu, choose Print.
- 2 From the pop-up menu in the upper left, choose Color.
- 3 Select Built-In Color Matching.
- 4 From Document Color, select Natural Color.

Colors on the printout are faded

Try the suggestions listed in the section **Colors on the printout differ from the colors on the screen**. If the colors still seem faded, try **Cleaning the print cartridge nozzles**.

Characters are missing or unexpected

Try **Cleaning the print cartridge nozzles**.

Photos do not print as expected

To improve the quality of printed photos:

- Select a higher print quality.
- Select photo paper as the paper type.

[Printer overview](#)[Basic printing](#)[Printing ideas](#)[Maintenance](#)[Troubleshooting](#)[Notices](#)[Index](#)[Using this Guide...](#)

Solving specialty paper problems

Use this section to help solve problems with specialty paper.

Glossy or photo papers or transparencies stick together

- Use a photo paper or transparency designed for an inkjet printer.
- Make sure you loaded the paper correctly (with print side facing you) and selected the appropriate settings in the printer software. For help, see [Printing photos](#) or [Printing transparencies](#).
- Try the [Wait for pages to dry](#) function.
- Remove each page as it exits the printer and let it dry completely before stacking.

Transparencies or photos contain white lines

- Make sure you loaded the paper correctly (with print side facing you) and selected the appropriate settings in the printer software. For help, see [Printing transparencies](#) or [Printing photos](#).
- Choose a higher print quality, such as Better or Best. For help, see [Basic printing](#).
- Try [Cleaning the print cartridge nozzles](#).

Alignment page does not print

Make sure:

- You completely removed the transparent tape and sticker from the back and bottom of the print cartridges.
- You installed the cartridges correctly. For help, see [Installing a cartridge](#).
- You loaded the paper correctly and did not push the paper too far into the printer. For help, see [Basic printing](#).
- If you are connected to a network with a Lexmark adapter, the indicator lights are on. For more information, see the adapter documentation.
