# Lexmark Education Station

A turnkey solution customized for education.

Education customers need a better testing and grading solution.

The education environment has focused so heavily on testing and benchmarking student comprehension that teachers are spending more time grading tests and less time teaching.

With student comprehension under the microscope, educators are looking for all means to assist in their ability to quickly assess students and take immediate corrective action. The Education Station along with the optional Lexmark Education Station Grading Software makes it fast and easy to test students and determine their learning gaps within minutes.

Expensive optical mark recognition or "bubble sheet forms", which have traditionally been used in the classroom, cost as much as 10 cents per page. The Lexmark Education Station dramatically reduces this cost to less than a penny per page while eliminating the need for form storage.

One device. Multiple solutions.

Why the Lexmark Education Station is right for your education customers?

- Eliminate expensive pre-printed bubble sheets by printing 15, 30, 60, or 100 question answer sheets on demand using plain paper
- Deliver test results in minutes enabling immediate curriculum adjustments with optional grading software
- Identify student growth areas using individual student summary reports
- Build electronic student portfolios to be referenced during parent-teacher conferences using Scan to Classroom
- Improve faculty communication by scanning tardy slips, doctor's notes and discipline forms directly to a teacher's e-mail from the school office.
- Support multi-lingual classroom environments using optional Test Packs
- Enable data sharing with other classroom software using the optional grading software's data export feature (CSV format)
- Access school forms directly from the MFP with Forms on Demand

How does it work?

The Lexmark Education Station is a Lexmark multifunction printer customized with software and applications unique to the education industry. These customizations eliminate paper-based classroom tasks making them electronically accessible with the touch of a button on the e-Task interface.

- **Print Test** - prints blank bubble sheets plus a barcode answer key bubble sheet for test scoring.
- **Grade Test** - scans the completed answer key and student bubble sheet tests using grading software, individually grading tests and producing a choice of printed reports in minutes*.
- **Scan to Classroom** - scans documents directly to a network folder associated with a specific teacher or department.
- **Forms on Demand** - users print bookmarked electronic documents (permission slips, detention slips, etc.) directly from the MFP.

* This function requires the purchase of Education Station Grading Software

Getting started.

Lexmark partners must complete a minimal certification to sell the Lexmark Education Station and the optional Lexmark Education Station Grading Software. Complete the steps below to qualify as an Education Station reseller.

- Get certified - visit: educationstation.lexmarkpartner.com.
- Order the Education Station MFP from your distributor of choice.
- Order the Education Station Grading Software (required to enable the testing and grading solution).
- Install at your customer's location.
