

Legal Partner

Overview:

The Lexmark Legal Partner MFP software is a package of legal industry applications to simplify workflow processes and allow law firms to integrate with existing Copittrak client billing software.

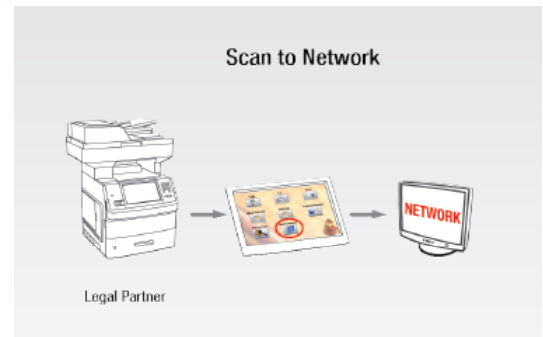

Includes:

Scan to Court lets law firms set file limits for scan jobs destined for court delivery with the option to automatically separate over-limit files into several smaller files to meet the court's requirements.

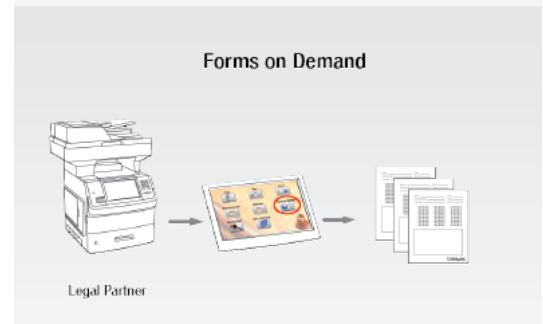

Copittrak-Capable enables the immediate integration of Copittrak automated client billing software after the purchase of a Copittrak license⁴.

Scan to Network allows users to quickly scan documents to custom locations on the network (including user home directories), capturing, profiling, indexing and storing the files with one touch of the icon.

Forms on Demand - an icon on the home screen that allows the user to locate and print electronic forms which reside on a remote server.⁶

Getting Started:

Legal Partner has the following MFP requirements:

- Minimum of 256MB RAM
- Hard Drive

Tech Specs:
