

# Scan 2 Hard Disk

## Overview:

Ability to scan documents directly to the hard drive of the mfp for later printing.

## Benefits:

The Scan To Hard Drive (Scan2HD) solution allows users to scan documents to the hard drive of the MFP. Once a document is stored on the hard drive, users can view a thumbnail, print, or delete the document. Users can create folders to categorize the documents, password protect the documents, and password protect the folders. When authentication is enabled on the MFP, users automatically begin in their own private folder, but can access the Public folder.

## Tech Specs:

### Device Compatibility

X646e  
X646ef  
X772e  
X782e  
X85X3  
X94Xe  
C772e + X4600

### Geography

United States Only

### Language

English
