

# Cloud Connector Version 1.4 Release Notes

## Overview

The Lexmark™ Cloud Connector is an Embedded Solutions Framework (eSF) application that can be installed in your Lexmark printer. It lets users access multiple cloud service providers. You can print documents from your cloud account, or scan documents, and then save them to your cloud account. The application is supported on printers running on eSF version 6 or later.

This document provides information on the versions of the Cloud Connector eSF application and its release history.

## Release history

### Version 1.4, released April 2020

#### Features

- **Data Center**—This setting lets you change the data center to one of the following:
  - **Auto Detect**—Set your data center automatically as determined by your location.
  - **Americas**—Use the North American data center as determined by your Lexmark Cloud Services agreement.
  - **Europe**—Use the European data center as determined by your Lexmark Cloud Services agreement.
- **Note:** You can change the data center setting only in the Embedded Web Server.
- Added support for the following:
  - CSV files as an optical character recognition (OCR) output
  - Authenticated proxy servers

#### Fixes

- Frozen printer screen when scanning and uploading
- Non-deployment of FLS file configuration
- Missing searchable PDF setting when scanning from OCR-enabled printers

### Version 1.3, released September 2018

#### Feature

**Scan shortcut**—This feature lets you quickly scan documents to the saved location, with the configured scan settings.

**Note:** You can set different scan settings for each shortcut.

### Version 1.2, released June 2018

#### Features

- Released worldwide.
- Added the following features:
  - Search
  - Sort
  - File shortcuts

**Note:** The application programming interface of the cloud service provider determines the search and sort features.

- Added support for the following languages:
  - Brazilian Portuguese
  - Simplified Chinese

## Version 1.1.5.2, released May 2018

### Fix

Added support for the latest Box software development kit.

## Version 1.1, released December 2017

### Features

- **Initial release**
  - Use the application to access your cloud account using Lexmark printers, and then print documents from that account. You can also scan documents, and then save them to your cloud account.
  - The application supports the following cloud service providers:
    - Box
    - Dropbox
    - Google Drive™
    - Microsoft OneDrive
    - Microsoft OneDrive for Business
- **Device Management update for the latest version of applications**—The application checks for updates when you open it.
- **Secure cloud service validation**—The application requires a code when creating a cloud service profile.
