Safety information

Connect the power cord to a properly grounded electrical outlet that is near the product and easily accessible.

Do not place or use this product near water or wet locations.

Use only the power supply and power cord provided with this product or the manufacturer's authorized replacements.

Use only the telecommunications (RJ-11) cord provided with this product or a 26 AWG or larger replacement when connecting this product to the public switched telephone network.

 **CAUTION—SHOCK HAZARD:** Make sure that all external connections (such as Ethernet and telephone system connections) are properly installed in their marked plug-in ports.

This product is designed, tested, and approved to meet strict global safety standards with the use of specific manufacturer's components. The safety features of some parts may not always be obvious. The manufacturer is not responsible for the use of other replacement parts.

Refer service or repairs, other than those described in the user documentation, to a professional service person.

 **CAUTION—POTENTIAL INJURY:** Do not cut, twist, bind, crush, or place heavy objects on the power cord. Do not subject the power cord to abrasion or stress. Do not pinch the power cord between objects such as furniture and walls. If any of these things happen, a risk of fire or electrical shock results. Inspect the power cord regularly for signs of such problems. Remove the power cord from the electrical outlet before inspecting it.

 **CAUTION—SHOCK HAZARD:** To avoid the risk of electric shock when cleaning the exterior of the printer, unplug the power cord from the wall outlet and disconnect all cables from the printer before proceeding.

 **CAUTION—SHOCK HAZARD:** Do not use the fax feature during a lightning storm. Do not set up this product or make any electrical or cabling connections, such as the fax feature, power cord, or telephone, during a lightning storm.

 **CAUTION—POTENTIAL INJURY:** The area behind the duplex cover has protruding ribs as part of the paper path. To avoid injury, use caution when accessing this area for clearing a paper jam.

SAVE THESE INSTRUCTIONS.

About your printer

Thank you for choosing this printer!

We've worked hard to make sure it will meet your needs.

To start using your new printer right away, use the setup materials that came with the printer, and then skim the *User's Guide* to learn how to perform basic tasks. To get the most out of your printer, read the *User's Guide* carefully, and make sure you check the latest updates on our Web site.

We're committed to delivering performance and value with our printers, and we want to make sure you're satisfied. If you do encounter any problems along the way, one of our knowledgeable support representatives will be delighted to help you get back on track fast. And if you find something we could do better, please let us know. After all, you are the reason we do what we do, and your suggestions help us do it better.

Minimizing your printer's environmental impact

We are committed to protecting the environment and are continually improving our printers to reduce their environmental impact. By selecting certain printer settings or tasks, you may be able to reduce your printer's environmental impact even further.

Conserving energy

- **Activate Eco-Mode.** This feature sets the screen brightness to low and sets the printer to change to Power Saver mode after the printer is left idle for 10 minutes.
- **Select the lowest Power Saver timeout.** The Power Saver feature puts the printer in a minimum-power standby mode after the printer has been idle for a set amount of time (the Power Saver timeout).
- **Share your printer.** Wireless/network printers allow you to share a single printer among multiple computers, thus conserving energy and other resources.

Conserving paper

- **Activate Eco-Mode.** On selected printer models, this feature sets the printer to automatically print on both sides of the paper (duplex) for copy and fax jobs, and for printing in Windows and Mac OS X 10.6 or later.
- **Print more than one page image on one side of the paper.** The "Pages per sheet" feature allows you to print multiple pages on one sheet. You can print up to 8 page images on one side of a sheet of paper.
- **Print on both sides of the paper.** Duplexing lets you print on both sides of the paper manually or automatically (depending on your printer model).
- **Preview print jobs before printing.** Use the preview features found in Toolbars, the Print or Print Preview dialog, or the printer display (depending on your printer model).
- **Scan and save.** To avoid printing multiple copies, you can scan documents or photographs and save them to a computer program, application, or flash drive for presentation.
- **Use recycled paper.**

Conserving ink

- **Use Quick Print or Draft Mode.** These modes can be used to print documents using less ink than normal and are ideal for printing documents that are mostly text.
- **Use High Yield cartridges.** Inks in High-Yield cartridges allow you to print more pages with fewer cartridges.
- **Clean the printhead.** Before replacing and recycling your ink cartridges, try using the “Clean Printhead” and “Deep Clean Printhead” features. These features clean the printhead nozzles to improve the quality of your prints.

Recycling

- **Return ink cartridges for reuse or recycling through the Lexmark Cartridge Collection Program.** To return an ink cartridge, go to www.lexmark.com/recycle. Follow the instructions to request a postage-paid bag.
- **Recycle the product packaging.**
- **Recycle your old printer instead of throwing it away.**
- **Recycle paper from discarded print jobs.**
- **Use recycled paper.**

Understanding the parts of the printer

	Use the	To
1	Automatic Document Feeder (ADF) tray	Load original documents in the ADF. Recommended for scanning, copying, or faxing multiple-page documents. Note: Do not load postcards, photos, small items, or thin media (such as magazine clippings) into the ADF. Place these items on the scanner glass.
2	ADF output tray	Hold documents as they exit from the ADF.
3	Wi-Fi indicator	Check wireless status.
4	Memory card slot	Insert a memory card.
5	PictBridge and USB port	Connect a PictBridge-enabled digital camera, a USB Bluetooth adapter, or a flash drive to the printer.
6	Paper exit tray	Hold paper as it exits.
7	Paper tray (Tray 1)	Load paper.

	Use the	To
8	Second paper tray (Tray 2) Note: Your printer model may not have this option.	Load additional paper. You can load the same type of paper as Tray 1, or you can load a different type of paper and change the paper default settings so the printer pulls paper from Tray 2 for certain types of jobs.
9	Printer control panel	Operate the printer.
10	ADF	Scan, copy, or fax multiple-page letter-, legal-, and A4-size documents.

	Use the	To
1	Scanner unit	<ul style="list-style-type: none"> • Access the ink cartridges and printhead. • Remove paper jams.
2	Ink cartridge access	Install, replace, or remove ink cartridges.
3	Ethernet port	Connect your printer to a computer, a local network, an external DSL, or a cable modem.
4	USB port	Connect the printer to a computer using a USB cable. Warning—Potential Damage: Do not touch the USB port except when plugging in or removing a USB cable or installation cable.
5	LINE Port 	Connect the printer to an active telephone line (through a standard wall jack, DSL filter, or VoIP adapter) to send and receive faxes.
6	EXT Port 	Connect additional devices (telephone or answering machine) to the printer and the telephone line. Use this port if you do not have a dedicated fax line for the printer, and if this connection method is supported in your country or region. Note: Remove the plug to access the port.
7	Power supply with port	Connect the printer to a power source.

	Use the	To
8	Duplex unit	<ul style="list-style-type: none">• Print on both sides of a sheet of paper.• Remove paper jams.
9	Printhead access	Install the printhead. Note: The carrier moves to the printhead access area when no printhead is installed in the printer.

Ordering and replacing supplies

Ordering ink cartridges

Page yields available at www.lexmark.com/pageyields. For best results, use only Lexmark ink cartridges.

Lexmark Pro900 Series models

Item	Return Program Cartridge ¹	Regular cartridge ²
Black cartridge	100	100A
High yield black cartridge	100XL, 105XL	100XLA
Yellow color cartridge	100	100A
High yield yellow color cartridge	100XL	100XLA
Cyan color cartridge	100	100A
High yield cyan color cartridge	100XL	100XLA
Magenta color cartridge	100	100A
High yield magenta color cartridge	100XL	100XLA

¹ Licensed for a single use only. After use, return this cartridge to Lexmark for remanufacturing, refilling, or recycling.

² Available only on the Lexmark Web site at www.lexmark.com.

Using genuine Lexmark ink cartridges

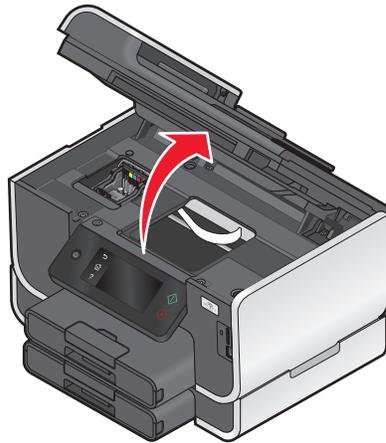

Lexmark printers, ink cartridges, and photo paper are designed to perform together for superior print quality, and our inks are formulated to work with your printer and help extend the life of your product. We recommend that you use only genuine Lexmark ink cartridges.

Lexmark's warranty does not cover damage caused by non-Lexmark ink or ink cartridges.

Replacing ink cartridges

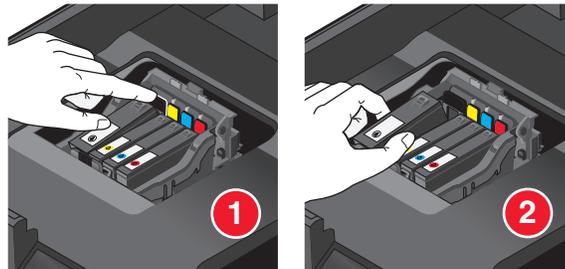

Make sure you have a new ink cartridge or cartridges before you begin. You must install new cartridges immediately after removing the old ones or the ink remaining in the printhead nozzles may dry out.

- 1 Turn on your printer.
- 2 Open the printer.

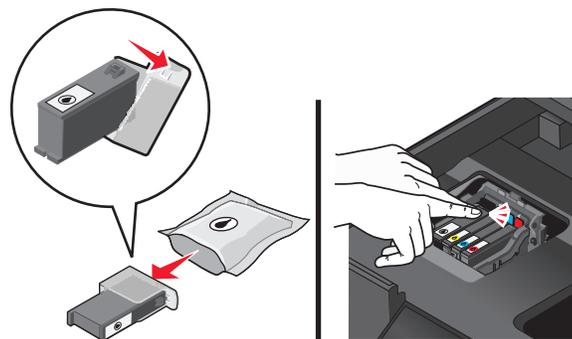

Note: The printhead moves to the cartridge installation position.

- 3 Press the release tab, and then remove the used ink cartridge or cartridges.

- 4 Install each ink cartridge. Use two hands to install the black cartridge.

Note: Install the new ink cartridges immediately after removing the protective cap to avoid exposing the ink to air.

- 5 Close the printer.

Ordering paper and other supplies

To order supplies or to locate a dealer near you, visit our Web site at www.lexmark.com.

Item	Part Number
USB cable	1021294
For more information, go to www.lexmark.com .	

Paper	Paper size
Lexmark Photo Paper	<ul style="list-style-type: none">• Letter• A4• 4 x 6 in.• L
Lexmark PerfectFinish Photo Paper	<ul style="list-style-type: none">• Letter• A4• 4 x 6 in.• L
Notes: <ul style="list-style-type: none">• Availability may vary by country or region.• For best results when printing photos or other high-quality images, use Lexmark Photo Paper or Lexmark PerfectFinish™ Photo Paper.• For more information, go to www.lexmark.com	

Recycling Lexmark products

To return Lexmark products to Lexmark for recycling:

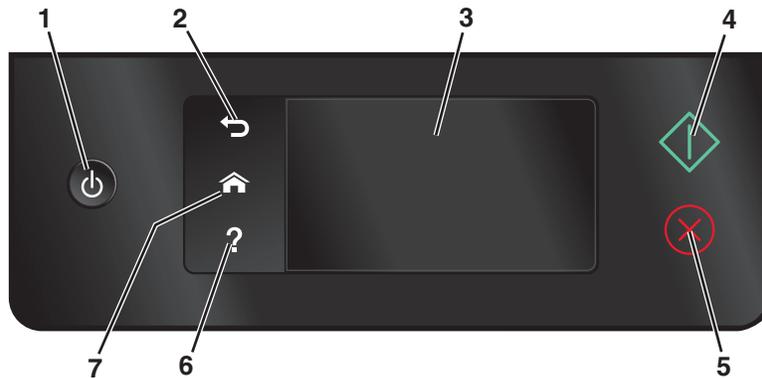

- 1 Visit our Web site at www.lexmark.com/recycle.
- 2 Find the product type you want to recycle, and then select your country from the list.
- 3 Follow the instructions on the computer screen.

Using the printer control panel buttons and menus

Using the printer control panel

The following diagrams explain the sections of the printer control panel:

Note: The icons are displayed when they are selectable on the current screen. If an icon is not displayed, then the function is not available.

	Use	To
1	Power 	<ul style="list-style-type: none"> Turn the printer on and off. Switch to Power Saver mode. <p>Note: When the printer is on, press  to switch to Power Saver mode. Press and hold  for three seconds to turn off the printer.</p>
2	Back 	<ul style="list-style-type: none"> Return to the previous screen. Exit from one menu level to a higher one.
3	Touch screen display Note: The display is turned off in Power Saver mode.	<ul style="list-style-type: none"> Navigate the printer menus. Change settings. View printer messages and animation.
4	Start 	Start a job, depending on which mode is selected.
5	Cancel 	Cancel the current job or task.
6	Help 	Display Help text and animation.

	Use	To
7	Home 	Return to the home screen.

Understanding the home screen

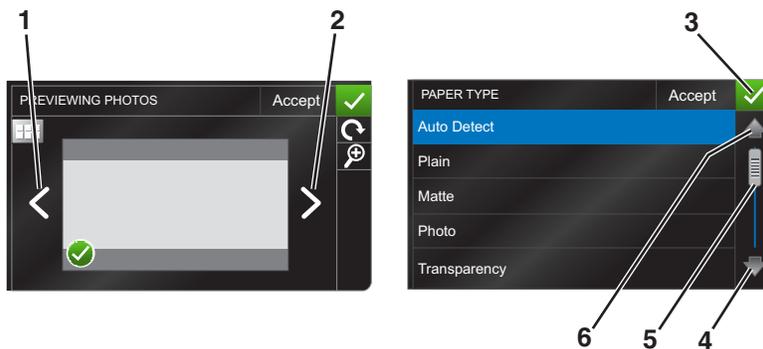

After the printer is turned on and a short warm-up period occurs, the display shows the following basic screen which is referred to as the home screen. Use the home screen selections to initiate an action, such as copying or faxing, or to change printer settings.

Display item	Description
1 	Access the copy menu and make copies.
2 	Access the scan menu and scan documents.
3 	Access the fax menu and send faxes.
4  or PictBridge 	View, select, print, or attach photos and documents to e-mail. Note: This icon appears only when you return to the home screen while a memory card, flash drive, or PictBridge-enabled camera is connected to the printer.

Display item		Description
5	SmartSolutions 	Open the SmartSolutions menu.
6	Ink levels icon 	<ul style="list-style-type: none"> • Display the current ink levels of the installed cartridges. • Access cartridge maintenance and information functions.
7	Setup icon 	Access the setup menu and change printer settings.
8	2-Sided icon 	Print on both sides of a sheet of paper.
9	Eco-Mode icon 	Activate Eco-Mode to select the following options: <ul style="list-style-type: none"> • Print on both sides of the paper (duplex). • Change to Power Saver mode after the printer is left idle for 10 minutes. • Set screen brightness to low.

Navigating menus using the touch screen

	Use	To
1	Left arrow 	Scroll left.
2	Right arrow 	Scroll right.

Using the printer control panel buttons and menus

	Use	To
3	Accept 	Save your setting.
4	Down arrow 	Scroll down.
5	Scrollbar 	Scroll up and down the menu list.
6	Up arrow 	Scroll up.

To navigate using the touch screen:

- Drag the scrollbar or touch the arrows until the menu or setting that you want appears on the display.
- To confirm a setting or select a menu or item, touch it.
- If necessary, touch **Accept**, **OK**, or  after making a selection or changing a setting. This saves the setting.

For example, to navigate to **Paper Type** and change the paper type setting:

1 Touch .

Note: All the instructions in this guide start from the home screen.

2 Touch **Copy**.

3 Touch **More Options**.

4 Scroll down (using the scrollbar or arrows) until **Paper Type** appears on the list.

5 Touch **Paper Type**.

6 Scroll up or down (using the scrollbar or arrows) to view the list of paper types.

7 Select a paper type setting by touching it, and then touch **Accept** to save the setting.

Changing the Power Saver timeout

The Power Saver timeout is the time it takes for the printer to switch to Power Saver mode when the printer is left idle. The Power Saver feature optimizes energy efficiency by reducing the printer power consumption (as much as 28 percent on some printer models) compared to the default printer settings. To save the most energy, select the lowest Power Saver timeout.

1 From the home screen, navigate to **Power Saver**:

 > **Device Setup** > **Power Saver**

2 Select a Power Saver timeout, and then touch **Accept**.

Saving paper and energy with Eco-Mode

The Eco-Mode feature significantly cuts paper usage, reduces paper waste, optimizes energy efficiency, and saves money.

- 1 From the home screen, touch .
- 2 Touch the Eco-Mode setting or settings you want to activate, and then touch **Accept**.
 - Power Saver after 10 Minutes
 - Screen Dim
 - 2-Sided Printing

Note: If you select 2-Sided Printing, then the printer prints on both sides of the paper (duplex) for copy and fax jobs, and for printing in Windows.

Resetting to factory settings

Resetting to factory default settings will delete all the printer settings you have previously selected.

- 1 From the home screen, touch , and then touch **Use Factory Defaults**.
- 2 Touch **Yes**.
- 3 When prompted to set the initial settings of your printer, make your selections using the touch screen.

Using the printer software

Minimum system requirements

The printer software requires up to 500 MB of free disk space.

Supported operating systems

- Microsoft Windows 7 (Web only)¹
- Microsoft Windows Vista (SP1)
- Microsoft Windows XP (SP3)
- Microsoft Windows 2000 (SP4 or greater)
- Macintosh PowerPC OS X v10.3.9 or later
- Macintosh Intel OS X v10.4.4 or later
- Linux Ubuntu 8.04 LTS and 8.10 (Web only)¹
- Linux OpenSUSE 11.0 and 11.1 (Web only)¹
- Linux Fedora 10 (Web only)¹

¹ The printer driver for this operating system is available only at <http://support.lexmark.com>.

Using the Windows printer software

Software installed during printer installation

When you set up the printer using the installation software CD, all the necessary software was installed. You may have chosen to install some additional programs. The following table provides an overview of various software programs and what they can help you do.

If you did not install these additional programs during initial installation, then reinsert the installation software CD, run the installation software, and then select **Install Additional Software** from the Software Already Installed screen.

Printer software

Use the	To
Lexmark™ Printer Home (referred to as Printer Home)	<ul style="list-style-type: none"> • Launch applications or programs. • Access the Fax Solutions software. • Scan or e-mail a photo or document. • Edit scanned documents. • Scan documents to PDF. • Adjust settings for the printer. • Order supplies. • Maintain ink cartridges. • Print a test page. • Register the printer. • Contact technical support.
Lexmark Fast Pics (referred to as Fast Pics)	Manage, edit, transfer, and print photos and documents.
Lexmark Toolbar (referred to as Toolbar)	<ul style="list-style-type: none"> • Print black or text-only Web pages to save ink. • Schedule automatic printing of Web pages. • Access Picnik and edit photos online. • Print, scan, or convert local files from Windows.
Lexmark Tools for Office (referred to as Tools for Office)	Access your favorite settings in Microsoft Office 2007.
Lexmark Fax Solutions (referred to as Fax Solutions)	<ul style="list-style-type: none"> • Send a fax. • Receive a fax in three-in-one printers. • Add, edit, or delete contacts in the built-in phone book. • Access the Lexmark Fax Setup Utility in four-in-one printers. Use the Fax Setup Utility to set the Speed Dial and Group Dial numbers, set Ringing and Answering, and print fax history and status reports.
Abbyy Sprint OCR	Scan a document and produce text that you can edit with a word-processing program.
Lexmark Wireless Setup Utility (referred to as Wireless Setup Utility)	<ul style="list-style-type: none"> • Set up the wireless printer on a wireless network. • Change the wireless settings of the printer. <p>Note: This program is installed automatically with the printer software if the printer has wireless capability.</p>
Lexmark Service Center (referred to as Service Center)	<ul style="list-style-type: none"> • Troubleshoot the printer. • Access the printer maintenance functions. • Contact technical support. <p>Notes:</p> <ul style="list-style-type: none"> • This program is installed automatically with the printer software. • You may be prompted to install this program from the Web, depending on your printer model.

Use the	To
Printing Preferences	<p>When you select File → Print with a document open and then click Properties, a Printing Preferences dialog appears. The dialog lets you select options for the print job, such as the following:</p> <ul style="list-style-type: none"> • Select the number of copies to print. • Print two-sided copies. • Select the paper type. • Add a watermark. • Enhance images. • Save settings. <p>Note: Printing Preferences is installed automatically with the printer software.</p>

Note: Your printer may not come with some of these programs or some of the functions of these programs, depending on the features of the printer that you purchased.

Using the Macintosh printer software

Software installed during printer installation

Software resident in the Macintosh OS

Use the	To
Print dialog	Adjust the print settings and schedule print jobs.
Printer Services dialog (not available in Mac OS X v10.5 or later)	<ul style="list-style-type: none"> • Access the printer utility. • Troubleshoot. • Order ink or supplies. • Contact Lexmark. • Check the printer software version installed on the computer.

Printer software

Applications are installed along with the printer software during installation. These applications are saved in the printer folder that appears on the Finder desktop after installation.

- 1 From the Finder desktop, double-click the printer folder.
- 2 Double-click the icon of the application that you want to use.

Use the	To
Lexmark All-In-One Center (referred to as All-In-One Center)	<ul style="list-style-type: none"> • Scan photos and documents. • Customize settings for scan jobs.
Lexmark AIO Setup Utility (referred to as AIO Setup Utility)	<ul style="list-style-type: none"> • Customize settings for fax jobs. • Create and edit the Contacts list.

Use the	To
Lexmark Network Card Reader (referred to as Network Card Reader)	<ul style="list-style-type: none"> • View the contents of a memory device inserted into a network printer. • Transfer photos and PDF documents from a memory device to the computer over a network.
Lexmark Printer Utility (referred to as Printer Utility)	<ul style="list-style-type: none"> • Get help with cartridge installation. • Print a test page. • Print an alignment page. • Clean the printhead nozzles. • Order ink or supplies. • Register the printer. • Contact technical support.
Lexmark Wireless Setup Assistant (referred to as Wireless Setup Assistant)	Set up the printer on a wireless network.

Note: Your printer may not come with these applications, depending on the features of the printer that you purchased.

Finding and installing optional software

For Windows users

- 1 Click  or Start.
- 2 Click **All Programs** or **Programs**, and then select the printer program folder from the list.
- 3 Select **Printer Home**.
- 4 Choose your printer from the printer drop-down list.
- 5 From the Support tab, click **On-line support**.
- 6 From the Web site, select your printer and download the driver.
- 7 Install additional or optional software.

For Macintosh users

- 1 From the Finder desktop, double-click the printer folder.
- 2 Double-click the **Printer Utility** icon.
- 3 From the Web Links tab, click **Customer Support**.
- 4 From the Web site, select your printer and download the driver.
- 5 Install additional or optional software.

Updating the printer software (Windows only)

Checking for software updates

- 1 Click  or **Start**.
- 2 Click **All Programs** or **Programs**, and then select the printer program folder from the list.
- 3 Select **Printer Home**.
- 4 Choose your printer from the printer drop-down list.
- 5 From the Support tab, select **Check for updates**.
- 6 Follow the instructions on the computer screen.

Enabling automatic software updates

- 1 With a document open, click **File → Print**.
- 2 Click **Properties, Preferences, Options, or Setup**.
- 3 From the Advanced tab, click **More Options**.
- 4 In the Software Updates section, select **Allow automatic updates from the web for my software**.
- 5 Click **OK**.

Reinstalling the printer software

When you set up the printer using the installation software CD, all the necessary software was installed. If you encountered problems while installing, or if your printer does not appear in the Printers folder or as a printer option when you send a print job, then try removing and reinstalling the printer.

Uninstalling the printer software

For Windows users

- 1 Click  or **Start**.
- 2 Click **All Programs** or **Programs**, and then select the printer program folder from the list.
- 3 Select the uninstall option.
- 4 Follow the instructions on the computer screen to remove the software.
- 5 Once the uninstall process is complete, restart your computer.

For Macintosh users

- 1 From the Finder desktop, double-click the printer folder.
- 2 Double-click the **Uninstaller** icon.
- 3 Follow the instructions on the computer screen to remove the software.

Installing the printer software

Note: If you installed the printer software on this computer before but need to reinstall the software, then uninstall the current software first.

For Windows users

- 1 Close all open software programs.
- 2 Insert the installation software CD.
If the Welcome screen does not appear after a minute, then launch the CD manually:
 - a Click , or click **Start** and then click **Run**.
 - b In the Start Search or Run box, type `D:\setup.exe`, where **D** is the letter of your CD or DVD drive.
- 3 Follow the instructions on the Welcome screen.

For Macintosh users

- 1 Close all open software applications.
- 2 Insert the installation software CD.
If the installation dialog does not appear after a minute, then click the CD icon on the desktop.
- 3 Double-click **Install**.
- 4 Follow the instructions on the installation dialog.

Using the World Wide Web

- 1 Go to the Lexmark Web site at www.lexmark.com.
- 2 From the Drivers & Downloads menu, click **Driver Finder**.
- 3 Select your printer, and then select your operating system.
- 4 Download the driver and install the printer software.

Loading paper and original documents

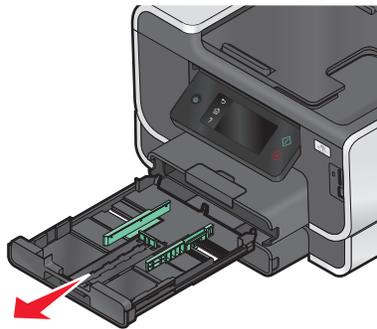

Loading the paper tray

Make sure:

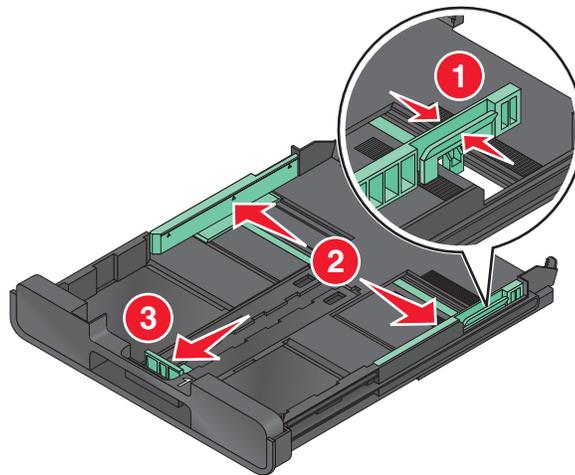

- You use paper designed for inkjet printers.
- The paper is not used or damaged.
- If you are using specialty paper, you follow the instructions that came with it.

Note: To avoid jams, make sure the paper does not buckle when you adjust the paper guides.

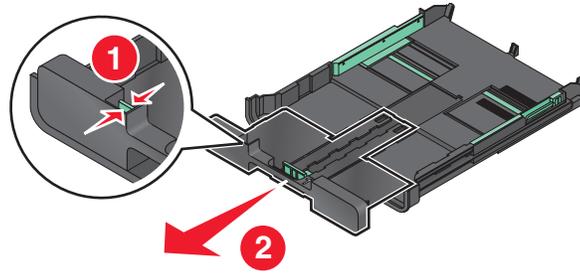

- 1 Pull tray completely out of the printer.

- 2 Move the paper guides to the sides of tray.

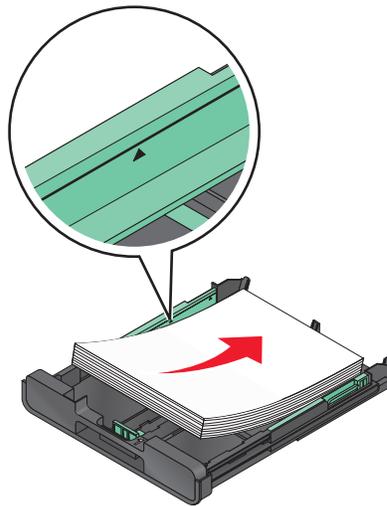

3 If you are loading A4- or legal-size paper, then squeeze the tab and pull to extend the tray.

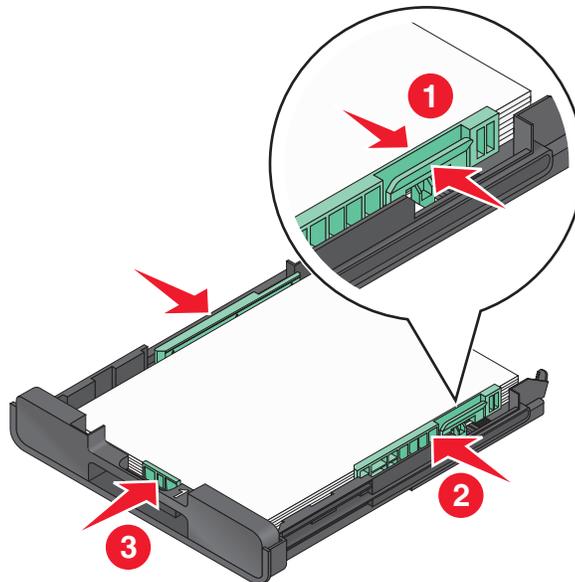

Note: When you pull the extension out, the first stop accommodates A4-size paper. When the extension is fully out, it accommodates legal-size paper.

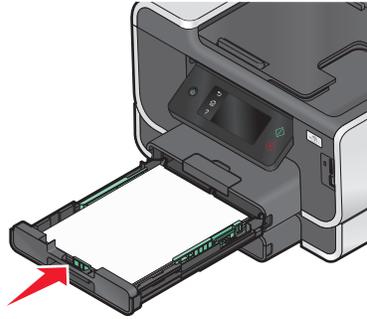

4 Load the paper.

5 Adjust the paper guides to rest gently against the left, right, and bottom edges of the paper.

6 Insert the tray.

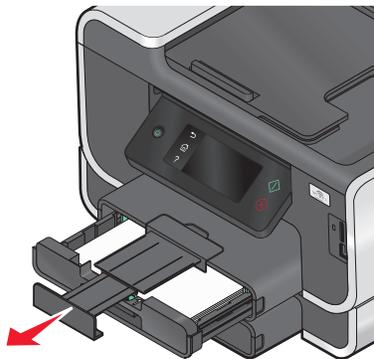

Note: If you extended the tray to accommodate A4- or legal-size paper, then the tray sticks out from the front of the printer when inserted.

7 Flip up the paper stop to catch the paper as it exits.

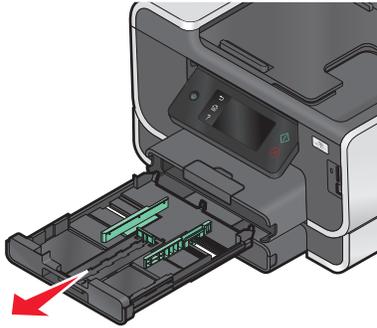

Note: If you loaded A4- or legal-size paper, then extend the paper stop. Use both extenders for A4 and legal.

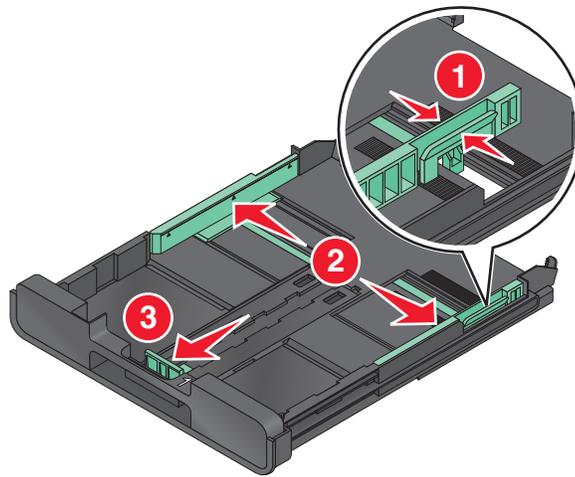

Loading envelopes or photo paper

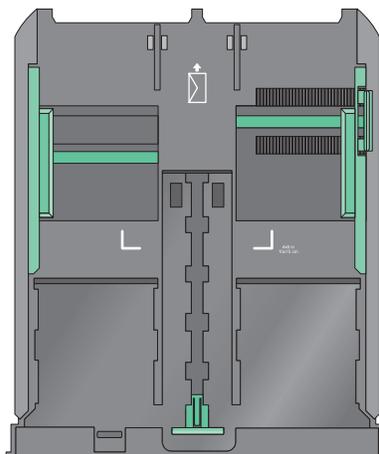

- 1 Pull tray completely out of the printer.

- 2 Move the paper guides to the sides of tray.

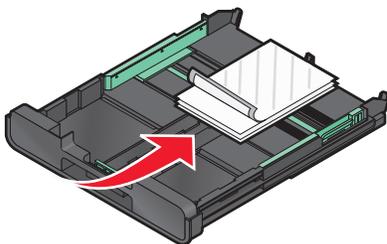

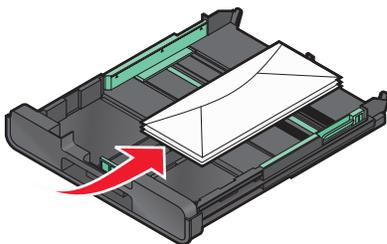

- 3 Use the envelope icon and the photo paper outline on the bottom of the tray to help you position envelopes or photo paper.

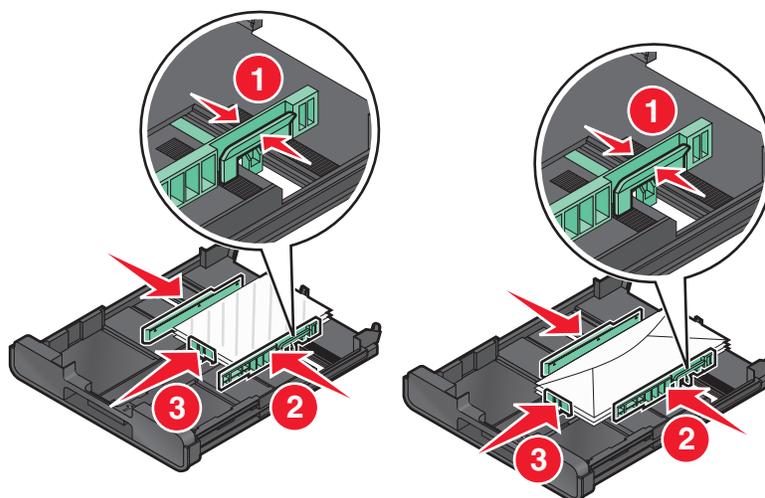

Note: Do not mix paper types in the tray. You can load either envelopes or photo paper, but not both.

4 Load envelopes or photo paper.

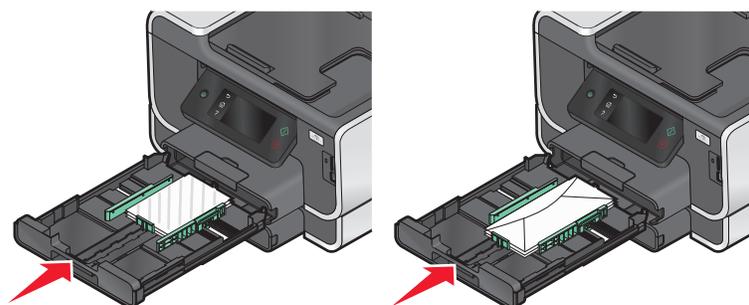

Note: Load envelopes or photo paper with the printable side facedown. (If you are not sure which side is the printable side, then see the instructions that came with the envelopes or photo paper.)

5 Adjust the paper guides to rest gently against the left, right, and bottom edges of the envelopes or photo paper.

6 Insert the tray.

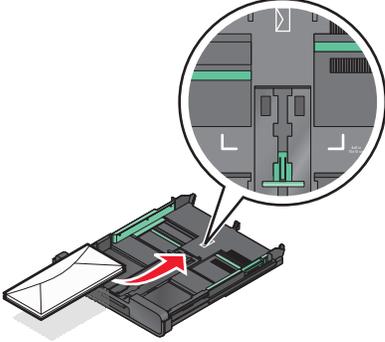

7 Flip up the paper stop to catch the envelopes or photos as they exit.

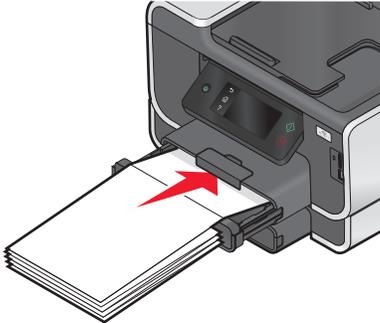

Note: For best results, allow photos to dry at least 24 hours before stacking, displaying, or storing.

Loading various paper types

Load up to	Make sure
150 sheets of plain paper	<ul style="list-style-type: none">• The paper is designed for use with inkjet printers.• The paper guides rest against the left, right, and bottom edges of the paper.
100 sheets of coated paper 25 sheets of photo paper 25 sheets of glossy paper	<ul style="list-style-type: none">• The glossy or printable side of the paper faces down. (If you are not sure which side is the printable side, then see the instructions that came with the paper.)• The paper guides rest against the left, right, and bottom edges of the paper. <p>Notes:</p> <ul style="list-style-type: none">• For best results, allow photos to dry at least 24 hours before stacking, displaying, or storing.• For best results, load more photo paper than needed but do not exceed the maximum amount for your paper type.

Load up to	Make sure
10 envelopes	 <ul style="list-style-type: none"> • The envelopes are designed for use with inkjet printers. • The print side of the envelopes faces down with the flap to the left as shown. • You load the envelopes in the center of the tray as indicated by the icon. Load them all the way to the back of the tray. • You print the envelopes in landscape orientation. • The paper guides rest against the left, right, and bottom edges of the envelopes. • You select the correct envelope size. If the exact envelope size is not listed, select the next larger size. Set the left and right margins so that the envelope text will be correctly positioned on the envelope. <p>Warning—Potential Damage: Do not use envelopes that have metal clasps, string ties, or metal folding bars.</p> <p>Notes:</p> <ul style="list-style-type: none"> • Do not load envelopes with holes, perforations, cutouts, or deep embossing. • Do not use envelopes that have exposed flap adhesive.
25 sheets of labels	<ul style="list-style-type: none"> • You use full label sheets. Partial sheets (with areas exposed by missing labels) may cause labels to peel off during printing, resulting in a paper jam. • You load letter- or A4-size label sheets. • The print side of the labels faces down. • The top of the labels feeds into the printer first. • The paper guides rest against the left, right, and bottom edges of the label sheets.
50 transparencies	<ul style="list-style-type: none"> • The rough side of the transparencies faces down. • You load letter- or A4-size transparencies. • You remove any paper backing sheets from the transparencies before loading. • If the transparencies have a removable strip, each strip faces down. • The paper guides rest against the left, right, and bottom edges of the transparencies. <p>Note: Transparencies require more drying time. Remove each transparency as it exits, and allow it to dry to avoid ink smudging.</p>

Load up to	Make sure
10 iron-on transfers	<ul style="list-style-type: none"> • You follow the loading instructions that came with the iron-on transfers. • The print side of the transfers faces down. • The paper guides rest against the edges of the transfers. <p>Note: For best results, load transfers one at a time.</p>
25 index cards, photo papers, or postcards	<ul style="list-style-type: none"> • The thickness does not exceed 0.025 inches (0.635 mm). • The print side of the photo paper faces down. • You load the photo paper in the center of the tray, as indicated by the 4 x 6 photo paper outline. • The paper guides rest against the left, right, and bottom edges of the paper. <div data-bbox="885 625 1274 982" data-label="Image"> </div> <p>Note: For best results, allow photos to dry at least 24 hours before stacking, displaying, or storing</p>

Load up to	Make sure
20 sheets of banner paper	<ul style="list-style-type: none"> • The print side of the banner faces down. • The leading edge of the banner paper feeds into the printer first. • If your printer has more than one paper tray, then load banner paper in Tray 1. <p>To load banner paper:</p> <ol style="list-style-type: none"> 1 Pull the tray completely out of the printer. 2 Remove all paper from the tray. 3 Move the paper guides as though you were loading legal-size paper. 4 Squeeze the lever and pull to extend the tray to legal size. 5 Tear off only the number of pages needed to print the banner. 6 Set the stack of pages in front of the printer. 7 Slide the first sheet from the stack of pages over the tray handle and all the way into the back of tray. 

Saving paper default settings

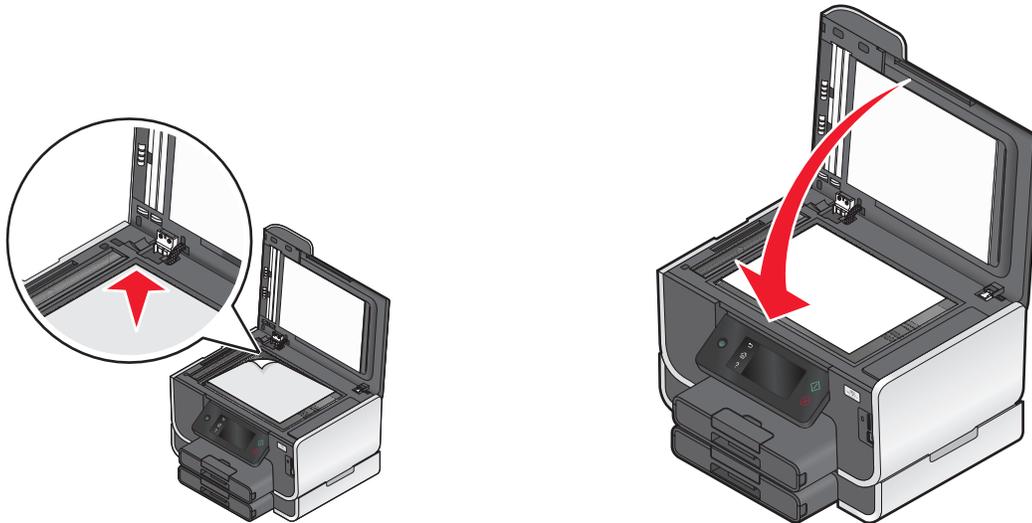

You can set the default paper and paper tray settings for the documents and photos that you print.

- 1 From the home screen, touch .
- 2 Choose the default settings:
 - If you want to set the default paper size:
 - a Touch **Paper Setup**, and then select the paper tray you want to set up.
 - b Touch **Paper Size**.
 - c Select the default paper size for the tray, and then touch **Accept**.
 - If you want to set the default paper type:
 - a Touch **Paper Setup**, and then select the paper tray you want to set up.
 - b Touch **Paper Type**.
 - c Select the default paper type for the tray, and then touch **Accept**.
 - If you want to enable paper tray linking:
 - a Touch **Paper Tray Linking**.
 - b Touch **Automatic**, and then touch **Accept**.
When paper tray linking is enabled, the printer automatically picks up paper from the other paper tray when the default paper tray runs out of paper.

- If you want to set the default paper tray for different types of print jobs:
 - a Select the default tray for copy, photo, fax, PictBridge, and Bluetooth jobs.
 - b Touch **Tray 1** or **Tray 2**, and then touch **Accept**.

Loading original documents on the scanner glass

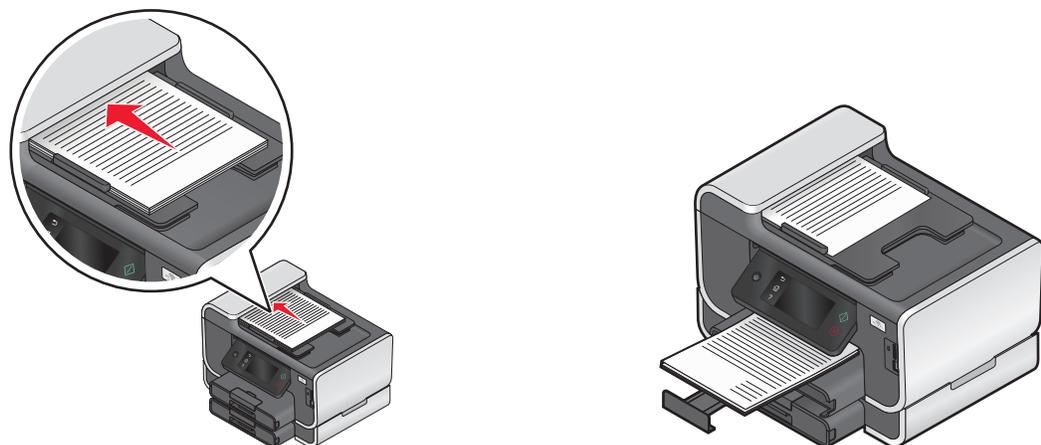

- 1 Open the scanner lid and place the document facedown on the scanner glass.
- 2 Close the scanner lid.

Loading original documents into the ADF

You can load up to 50 sheets of an original document into the ADF for scanning, copying, and faxing. You can load A4-, letter-, or legal-size paper into the ADF.

- 1 Adjust the paper guide on the ADF tray to the width of the original document.
- 2 Load the original document faceup and top edge first into the ADF until you hear a *beep*.

Printing

Tips for printing

- Use the appropriate paper for your print job.
- Select a higher print quality for better prints.
- Make sure there is enough ink in the ink cartridges.
- Remove each sheet as it is printed when printing photos or when working with specialty media.
- Select the borderless setting when printing photos.

Printing basic documents

Printing a document

- 1 Load the paper in the printer.
- 2 Send the print job:

For Windows users

- a With a document open, click **File → Print**.
- b Click **Properties, Preferences, Options, or Setup**.
- c Select the print quality, the number of copies to print, the type of paper to use, and how the pages should print.
- d Click **OK** to close any printer software dialogs.
- e Click **OK** or **Print**.

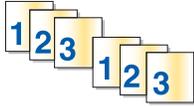

For Macintosh users

- a With a document open, choose **File > Print**.
- b From the Printer pop-up menu, choose the printer.
- c If necessary, click the disclosure triangle.
- d From the print options pop-up menu, choose the print quality, the number of copies to print, the type of paper to use, and how the pages should print.
- e Click **Print**.

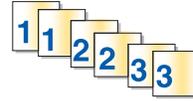

Collating printed copies

If you print multiple copies of a document, then you can choose to print each copy as a set (collated) or to print the copies as groups of pages (not collated).

Collated

Not collated

Notes:

- The collate option is available only when you are printing multiple copies.
- To prevent smudging when printing photos, remove each photo as it exits the printer, and then let it dry before stacking.

For Windows users

- 1 With a document open, click **File → Print**.
- 2 Click **Properties, Preferences, Options, or Setup**.
- 3 From the Copies section of the Print Setup tab, enter the number of copies that you want to print, and then select **Collate Copies**.
- 4 Click **OK** to close any printer software dialogs.
- 5 Click **OK** or **Print**.

For Macintosh users

- 1 With a document open, choose **File > Print**.
- 2 From the Printer pop-up menu, choose the printer.
- 3 If necessary click the disclosure triangle.
- 4 In the Copies field, enter the number of copies that you want to print, and then select **Collated**.
- 5 Click **Print**.

Printing pages in reverse order

By default, the first page is printed first. If you want to reverse the order in which pages print to make documents ready to read with the first page on top, then do the following:

For Windows users

- 1 With a document open, click **File → Print**.
- 2 Click **Properties, Preferences, Options, or Setup**.

- 3 From the Copies section of the Print Setup tab, select a page order:
 - To print the last page first, select **Print Last Page First**.
 - To print the first page first, clear the **Print Last Page First** check box.

Note: If two-sided printing is enabled, then you cannot print the last page first. To change the print order, you must first disable two-sided printing.
- 4 Click **OK** to close any printer software dialogs.
- 5 Click **OK** or **Print**.

For Macintosh users

- 1 With a document open, choose **File > Print**.
- 2 From the Printer pop-up menu, choose the printer.
- 3 If necessary, click the disclosure triangle.
- 4 From the print options pop-up menu, choose **Paper Handling**.
- 5 From the Paper Handling menu, or from the Page Order pop-up menu, select a page order:
 - To print the last page first, select **Reverse page order** or **Reverse**.
 - To print the first page first, clear the **Reverse page order** or **Reverse** option.
- 6 Click **Print**.

Printing multiple pages on one sheet

For Windows users

- 1 With a document open, click **File → Print**.
- 2 Click **Properties, Preferences, Options, or Setup**.
- 3 From the Layout list of the Advanced tab, select **Pages per sheet**.
- 4 Select the number of page images to print on each page.

If you want each page image to be surrounded by a border, then select **Print Page Borders**.
- 5 Click **OK** to close any printer software dialogs.
- 6 Click **OK** or **Print**.

For Macintosh users

- 1 With a document open, choose **File > Print**.
- 2 From the Printer pop-up menu, choose the printer.
- 3 If necessary, click the disclosure triangle.
- 4 From the print options pop-up menu, choose **Copies & Pages**, and then click **Page Setup**.
- 5 From the Paper Size pop-up menu, choose a paper size.
- 6 Choose an orientation, and then click **OK**.

- 7 From the print options pop-up menu, choose **Layout**.
 - From the Pages per Sheet pop-up menu, choose the number of page images that you want to print on one sheet.
 - From the Layout Direction menu, choose a layout direction.
 - If you want to print a border around each page image, then choose an option from the Border pop-up menu.
- 8 Click **Print**.

Printing documents from a memory card or flash drive (Windows only)

To enable the File Print function:

- The printer must be connected to a computer through a USB cable or through a network.
- The printer and the computer must be on.
- The memory card or flash drive must contain document files that are supported by the printer. For more information, see “Supported memory cards and file types” on page 44.
- The computer must contain applications that support the file types in the memory device.

- 1 Insert a memory card or flash drive.

The Memory Device screen appears on the display.

- 2 Touch **Print Documents**.

- 3 Select and print the document:

If the printer is using a USB connection

- a Select the file name of the document that you want to print.
- b Press  to start printing the document.

If the printer is using a Wireless connection (selected models only)

- a Select the file name of the document that you want to print.
- b Press , and then wait for the printer to connect to the network computer or to finish searching the network for available computers.
- c When prompted, select the name of the network computer, and then touch **Accept** to start printing the document.

Notes:

- You may be prompted to enter a PIN if the computer requires it. Enter the PIN using the keypad.
- To assign a computer name and a PIN to the computer, see the Help for the printer software associated with your operating system.

Printing specialty documents

Printing envelopes

- 1 Load the envelopes in the printer.
- 2 Send the print job:

For Windows users

- a With a document open, click **File → Print**.
- b Click **Properties, Preferences, Options, or Setup**.
- c From the Paper Type list of the Print Setup tab, select **Plain Paper**.
- d From the Paper Size list, select the envelope size.

Note: To print on a custom-size envelope, select **Custom Size**, and then specify the height and width of the envelope.

- e Select an orientation.
- f Click **OK** to close any printer software dialogs.
- g Click **OK** or **Print**.

For Macintosh users

- a With a document open, choose **File > Print**.
- b From the Printer pop-up menu, choose the printer.
- c If necessary, click the disclosure triangle.
- d From the print options pop-up menu, choose **Copies & Pages**, and then click **Page Setup**.
- e From the Paper Size pop-up menu, choose the envelope size. If no size matches the size of the envelope, then set a custom size.
- f Select an orientation, and then click **OK**.
- g Click **Print**.

Notes:

- Most envelopes use landscape orientation.
- Make sure the same orientation is also selected in the software application.

Printing labels

- 1 Load the label sheets in the printer.
- 2 Send the print job:

For Windows users

- a With a document open, click **File → Print**.
- b Click **Properties, Preferences, Options, or Setup**.

- c** From the Paper Size list of the Print Setup tab, choose a paper size that matches the size of the label sheet. If no paper size matches the label sheet size, then set a custom size.
If necessary, choose the appropriate type of paper from the Paper Type list.
- d** Click **OK** to close any printer software dialogs.
- e** Click **OK** or **Print**.

For Macintosh users

- a** With a document open, choose **File > Print**.
- b** From the Printer pop-up menu, choose the printer.
- c** If necessary, click the disclosure triangle.
- d** From the print options pop-up menu, choose **Copies & Pages**, and then click **Page Setup**.
- e** From the Paper Size pop-up menu, choose a size that matches the size of the label sheet. If no paper size matches the label sheet size, then set a custom size.
- f** Select an orientation, and then click **OK**.
- g** From the print options pop-up menu, choose **Quality & Media** or **Print Settings**.
 - From the Paper Type pop-up menu, choose **Card Stock**.
 - From the Print Quality menu, choose a print quality other than Quick Print.
- h** Click **Print**.

Tips on loading label sheets

- Make sure the top of the label sheet feeds into the printer first.
- Make sure the adhesive on the labels does not extend to within 1 mm of the edge of the label sheet.
- Make sure the paper guide or paper guides rest against the edges of the label sheet.
- Use full label sheets. Partial sheets (with areas exposed by missing labels) may cause labels to peel off during printing, resulting in a paper jam.

Printing on custom-size paper

Before beginning these instructions, load the custom-size paper in the printer.

For Windows users

- 1** With a document open, click **File → Print**.
- 2** Click **Properties, Preferences, Options, or Setup**.
- 3** From the Paper Size list of the Print Setup tab, select **Custom Size**.
The Define Custom Paper Size dialog appears.
- 4** Set the paper size.
- 5** Select the measurement units to use (inches or millimeters).
- 6** Click **OK** to close any printer software dialogs.
- 7** Click **OK** or **Print**.

For Macintosh users

- 1 With a document open, choose **File > Print**.
- 2 From the printer pop-up menu, choose the printer.
- 3 If necessary, click the disclosure triangle.
- 4 From the print options pop-up menu, choose **Copies & Pages** and then click **Page Setup**.
- 5 From the Settings or Paper Size pop-up menu, choose **Custom Paper Size** or **Manage Custom Sizes**.
- 6 Adjust the settings as needed to create a custom size.
- 7 Click **OK**.
- 8 Click **Print**.

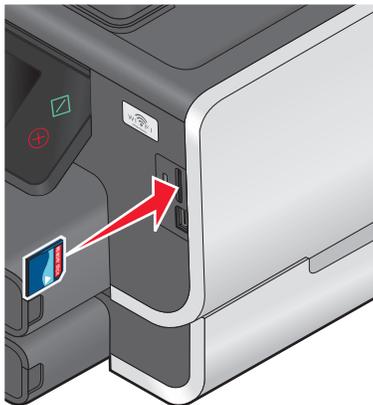

Working with photos

Using a memory card or flash drive with the printer

Memory cards and flash drives are storage devices frequently used with cameras and computers. You can remove the memory card from the camera or the flash drive from the computer and insert it directly into the printer.

- 1 Insert a memory card into the card slot or a flash drive into the USB port.

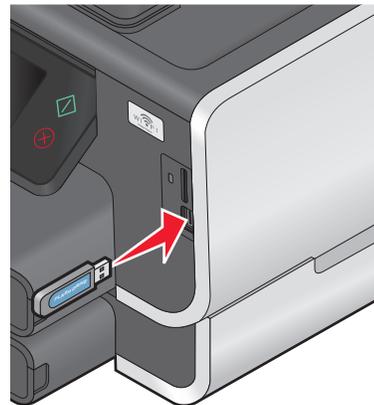

Inserting a memory card

Notes:

- Insert the card with the brand name label facing right.
- Make sure any arrows on the card point toward the printer.
- If necessary, connect the memory card to the adapter that came with it.
- Make sure that the memory card inserted is supported by the printer. For more information, see "Supported memory cards and file types" on page 44.

Inserting a flash drive

Notes:

- The flash drive uses the same port that is used for a PictBridge camera cable.
- An adapter may be necessary if your flash drive does not fit directly into the port.

Warning—Potential Damage: Do not touch any cables, any network adapter, any connector, the memory device, or the printer in the areas shown while actively printing, reading, or writing from the memory device. A loss of data can occur.

2 The Memory Device screen appears on the display.

Notes:

- If the printer does not recognize the memory device, then remove and reinsert it.
- If a flash drive or a digital camera set to mass storage mode is inserted into the USB port while a memory card is in the card slot, then a message appears on the display prompting you to choose which memory device to use.

Supported memory cards and file types

Memory Card	File Type
<ul style="list-style-type: none"> • Secure Digital (SD) • Secure Digital High Capacity (SDHC) • Micro Secure Digital (with adapter) (Micro SD) • Mini Secure Digital (with adapter) (Mini SD) • MultiMedia Card (MMC) • Reduced Size MultiMedia Card (with adapter) (RS-MMC) • MultiMedia Card mobile (with adapter) (MMCmobile) • Memory Stick • Memory Stick PRO • Memory Stick Duo (with adapter) • Memory Stick PRO Duo (with adapter) • xD-Picture Card • xD-Picture Card (Type H) • xD-Picture Card (Type M) 	<p>Documents:</p> <ul style="list-style-type: none"> • .doc (Microsoft Word) • .xls (Microsoft Excel) • .ppt (Microsoft PowerPoint) • .pdf (Adobe Portable Document Format) • .rtf (Rich Text Format) • .docx (Microsoft Word Open Document Format) • .xlsx (Microsoft Excel Open Document Format) • .pptx (Microsoft PowerPoint Open Document Format) • .wpd (WordPerfect) <p>Images:</p> <ul style="list-style-type: none"> • JPEG • TIFF

Printing photos using the printer control panel

- 1 Load photo paper.
- 2 Insert a memory card, flash drive, or digital camera set to mass storage mode.
The Memory Device screen appears on the display.

3 Touch **View Photos**.

The Select Photos screen appears.

4 Touch the photo or photos you want to print.

Tips:

- If you want to clear a selected photo, then touch the photo again.
- If you want to view more photos, then touch the left or right arrow, and then touch the photo to select it.

5 When you are finished selecting the photos you want to print, touch **Layout**.

6 If you want to change the print settings, then touch **Change Settings**.

If necessary, touch **Accept** each time you make a selection.

7 Press .

Note: For best results, allow the prints to dry at least 24 hours before stacking, displaying, or storing.

Editing photos using the printer control panel

1 Load photo paper.

2 Insert a memory card or flash drive.

The Memory Device screen appears on the display.

3 Touch **View Photos**.

The Select Photos screen appears.

4 Touch the photo you want to edit.

5 Touch  to view the selected photo.

Tips:

- If you want to clear the selected photo, then touch .
- If you want to view the previous or next photo, then touch the left or right arrow, and then touch  to select the photo.

6 Touch . Touch **Accept** each time you make a selection.

From here	You can
Crop	Crop a photo.
Brightness	Adjust the brightness of a photo.
Red Eye	Reduce the red-eye effect caused by light reflection.
Auto Fix	Enhance a photo automatically.
Color Effects	Select whether to print a photo in black and white, sepia, antique brown, or antique gray.

7 When you are finished editing the photo, touch **Done**.

8 If you want to edit another photo, then touch  to return to the Select Photos screen.

- 9 Repeat steps 4 through 8 until all the photos are edited, and then touch **Layout**.
- 10 If you want to change the print settings, then touch **Change Settings**.
If necessary, touch **Accept** each time you make a selection.
- 11 Press .

Note: For best results, allow the prints to dry at least 24 hours before stacking, displaying, or storing.

Printing photos from a memory device using the printer software

- 1 Load photo paper.
- 2 Insert a memory card or flash drive.
- 3 Transfer or print the photos:

If the printer is using a USB connection

- **For Windows users**

Fast Pics launches automatically when you insert the memory device. Follow the instructions on the computer screen to transfer the photos to the computer or to print.

- **For Macintosh users**

If you have set an application to launch when a memory device is connected to the computer, then the application automatically launches. Follow the instructions on the computer screen to transfer the photos to the computer or to print.

If the printer is using a Wireless connection (selected models only)

- a From the Memory Device screen, touch **More Options**.
- b Touch **Connect to Computer**, and then select a network computer where you want to save the photos.
- c Transfer or print the photos:
 - **For Windows users**
Fast Pics launches automatically when a connection is established. Follow the instructions on the computer screen to transfer the photos to the computer or to print.
 - **For Macintosh users**
Select **Yes** to view images from the memory device. The Network Card Reader launches on the computer. Follow the instructions on the computer screen to transfer the photos to the computer or to print.

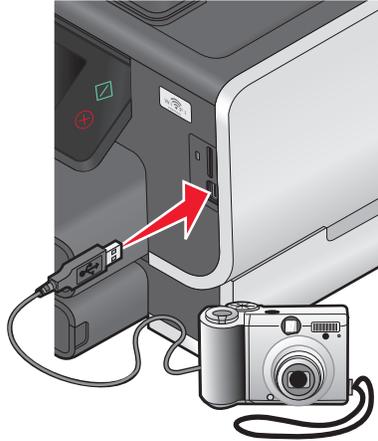

Printing photos from a PictBridge-enabled digital camera

PictBridge is a technology available in most digital cameras that lets you print directly from your digital camera without using a computer.

1 Insert one end of the USB cable into the camera.

Note: Use only the USB cable that came with the camera.

2 Insert the other end of the cable into the PictBridge port on the front of the printer.

Notes:

- Make sure that the PictBridge-enabled digital camera is set to the correct USB mode. If the camera USB selection is incorrect, then the camera is detected as a flash drive, or an error message is displayed on the printer control panel. For more information, see the camera documentation.
- The printer reads only one memory device at a time.

Warning—Potential Damage: Do not touch any cables, any network adapter, any connector, the memory device, or the printer in the areas shown while actively printing, reading, or writing from the memory card. A loss of data can occur.

3 If the PictBridge connection is successful, then the following message appears on the display: **Camera Connected. Use Camera to choose and print photos.**

4 If you want to change the default print settings:

a Touch **More Options** to access the PictBridge menu.

b Select the paper source, paper size, paper type, photo size, quality, and layout of the photos that you want to print. Touch **Accept** each time you make a selection.

Note: The printer will use the default print settings unless you change the print settings from the camera.

5 See the documentation for your camera to begin printing.

Note: If you insert the camera while the printer is performing another job, then wait for the job to finish before printing from the camera.

Printing photos from a memory device using the proof sheet

1 Load letter- or A4-size plain paper.

2 Insert a memory card or flash drive.

The Memory Device screen appears on the display.

3 Navigate to **Print Proof Sheet**:

More Options > Proof Sheet > Print Proof Sheet

4 Select which photos you want to print.

You can print a proof sheet:

- For the 20 most recent photos, if there are 20 or more photos on the memory device.
- For all photos on the memory device.
- By date, if the photos on the card were taken on different dates. If you choose this option, select the date, and then touch **Accept**.

The proof sheet prints.

5 Follow the instructions on the proof sheet to select which photos to print, the number of copies per photo, red-eye reduction, color effects, page layout, print options, and paper size.

Note: When making selections, make sure to fill in the circles completely.

6 Load photo paper.

Note: Make sure that the paper matches the size that you selected on the proof sheet.

7 Load the proof sheet facedown on the scanner glass.

8 Touch **Scan Proof Sheet**, and then touch **Continue**.

The printer scans the proof sheet and then starts printing the photos.

Note: For best results, allow the prints to dry at least 24 hours before stacking, displaying, or storing.

Printing from a Bluetooth-enabled device

- This printer is compliant with Bluetooth Specification 2.0. It supports the following profiles: Object Push Profile (OPP) and Serial Port Profile (SPP). Check with your Bluetooth-enabled device manufacturers (cellular phone or PDA) to determine their hardware compatibility and interoperability. It is recommended that you use the latest firmware on your Bluetooth-enabled device.
- To print Microsoft documents from your Windows® Mobile/Pocket PC PDA, additional third-party software and drivers are required. For more information about the required software, see the documentation for your PDA.

Setting up a connection between your printer and a Bluetooth-enabled device

Note: The printer does not support printing files from your computer using a Bluetooth connection.

You need to set up a connection between a Bluetooth-enabled device and your printer if you are sending a print job from the Bluetooth device for the first time. You will need to repeat the setup if:

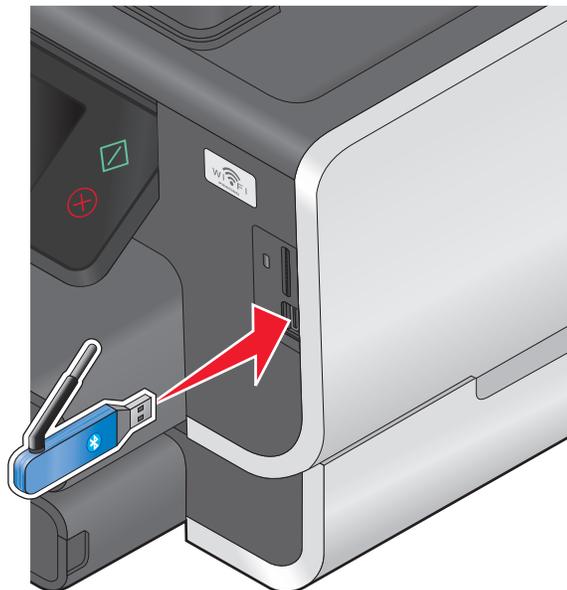

- You reset the printer to its factory default settings.
- You change the Bluetooth security level or the Bluetooth pass key.
- The Bluetooth-enabled device you are using requires users to set up a Bluetooth connection on every print job. For more information, see the documentation for your Bluetooth device.
- The name of the Bluetooth device you are using is automatically deleted from the Bluetooth device list.

When the Bluetooth security level is set to High, the printer saves a list of up to eight Bluetooth devices that have previously set up a connection with the printer. When the printer detects more than eight devices, the least recently used device is removed from the list. You need to repeat the setup of the deleted device to be able to send a print job to the printer.

Note: You need to set up a connection for each Bluetooth device that you use to send a print job to the printer.

To set up a connection between the printer and a Bluetooth-enabled device:

- 1 Insert a USB Bluetooth adapter into the USB port located on the front of the printer.

Bluetooth Dongle Connected appears on the display.

Note: A Bluetooth adapter is not included with the printer.

2 From the home screen, navigate to **Discovery**:

 > **Bluetooth Setup** > **Discovery**

3 Make sure **Discovery** is set to **ON**. If necessary, touch **ON**, and then touch **Accept**.

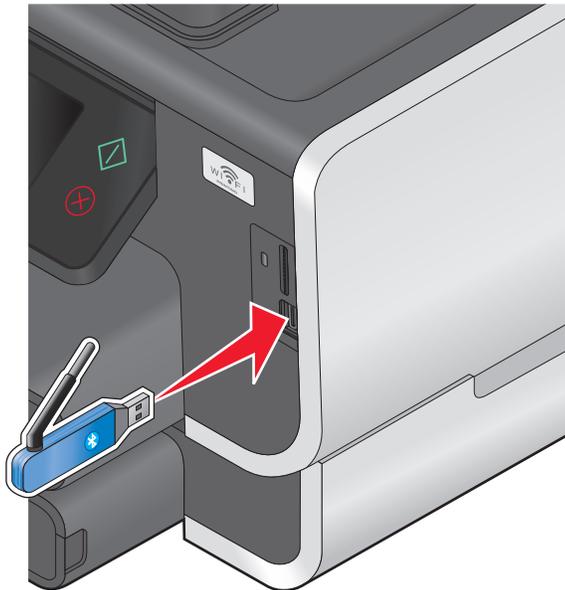

The printer is now ready to accept a connection from a Bluetooth-enabled device.

4 Configure the Bluetooth-enabled device to set up a connection to the printer. For more information, see the documentation for your Bluetooth device.

Note: If the Bluetooth Security Level on the printer is set to **High**, then you must enter a pass key.

Setting the Bluetooth security level

1 Insert a Bluetooth USB adapter into the USB port.

Bluetooth Dongle Connected appears on the display.

Note: A Bluetooth adapter is not included with the printer.

2 From the home screen, navigate to **Security Level**:

 > **Bluetooth Setup** > **Security Level**

3 Select the security level, and then touch **Accept**.

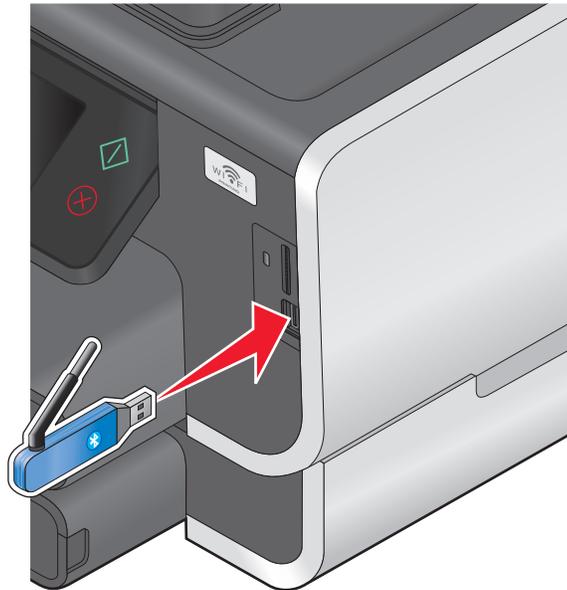

- **Low**—Allow Bluetooth devices to connect and send print jobs to your printer without requiring users to enter a pass key.
- **High**—Require users to enter a four-digit numeric pass key on the Bluetooth device before connecting and sending print jobs to the printer.

4 The Bluetooth Pass Key menu opens on the display if you set the security level to **High**. Use the keypad to enter your four-digit pass key, and then touch **Accept**.

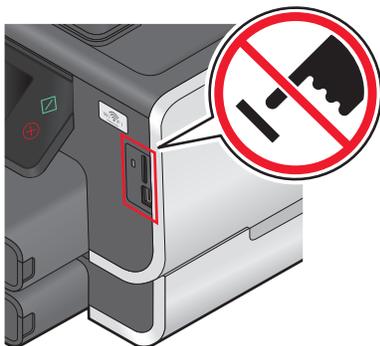

Printing from a Bluetooth-enabled device

Note: The printer does not support printing files from your computer using a Bluetooth connection.

- 1 Insert a USB Bluetooth adapter into the USB port.

Bluetooth Dongle Connected appears on the display.

Warning—Potential Damage: Do not touch any cables, any network adapter, any connector, the USB Bluetooth adapter, or the printer in the areas shown while actively printing, reading, or writing from a Bluetooth-enabled device. A loss of data can occur.

Notes:

- A Bluetooth adapter is not included with the printer.
 - Your printer automatically switches to Bluetooth mode when you insert a USB Bluetooth adapter.
- 2 Make sure the printer is set up to receive Bluetooth connections. For more information, see “Setting up a connection between your printer and a Bluetooth-enabled device” on page 49.
 - 3 Set up the Bluetooth device to print to the printer. For more information, see the documentation for your Bluetooth device.
 - 4 See the documentation for your Bluetooth device to begin printing.

Note: If the Bluetooth Security Level on the printer is set to High, you must enter a pass key.

Printing on both sides of the paper (duplexing)

Printing on both sides of the paper (duplexing) automatically

The automatic duplex unit, available only on selected printer models, supports letter- and A4-size paper. If you purchased a model without automatic duplex, or if you need to print duplex using other paper sizes, then see the instructions for printing on both sides of the paper (duplexing) manually.

For Windows users

- 1 With a document open, click **File → Print**.
- 2 Click **Properties, Preferences, Options, or Setup**.
- 3 Click the **Advanced** tab.
- 4 From the 2-Sided Printing section, select **On** from the drop-down menu.
Note: To use the settings defined in the printer, select **Use Printer Settings**.
- 5 Select either the **Side Flip** or **Top Flip** option. Side Flip is the setting most often used.
- 6 Select a setting for the dry time. In regions with high humidity, select **Extended**.
- 7 Click **OK** to close any printer software dialogs.
- 8 Click **OK** or **Print**.

Note: To return to single-sided printing, return to the Advanced tab. From the 2-Sided Printing section, select **Off** from the drop-down menu.

For Macintosh users

- 1 With a document open, choose **File > Print**.
- 2 From the Printer pop-up menu, choose the printer.
- 3 From the print options pop-up menu, choose **Layout**.
- 4 From the Two-Sided menu, select **Long-edge binding** or **Short-edge binding**.
 - For Long-edged binding, pages are bound along the long edge of the page (left edge for portrait, top edge for landscape).

Note: Long-edged binding is not available in Mac OS X v10.3.

Portrait

Landscape

- For Short-edged binding, pages are bound along the short edge of the page (top edge for portrait, left edge for landscape).

Portrait

Landscape

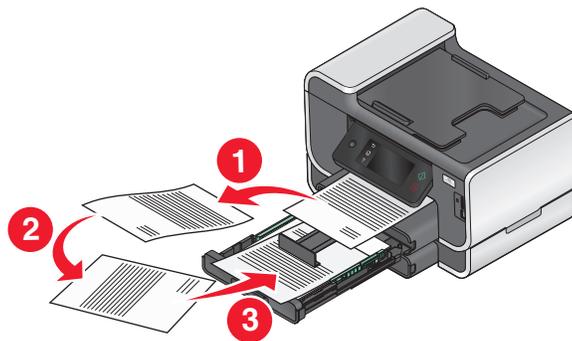

- 5 From the print options pop-up menu, choose **Print Settings** or **Advanced Options**, depending on your operating system.
- 6 If necessary, click the disclosure triangle.
- 7 Select the dry time. In regions with high humidity, select **Extended**.
- 8 Click **Print**.

Printing on both sides of the paper (duplexing) manually

For Windows users

- 1 With a document open, click **File → Print**.
- 2 Click **Properties, Preferences, Options, or Setup**.
- 3 Click the **Advanced** tab.
- 4 From the 2-Sided Printing section, select **Manual**.

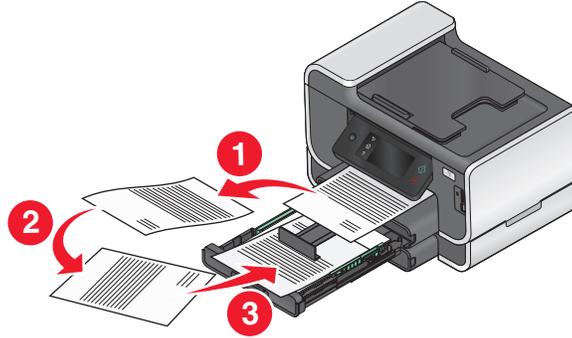

Note: The Print Instruction Page to Assist in Reloading item is selected automatically.
- 5 Click **OK**. The printer prints the odd-numbered pages and the instruction sheet.
- 6 Flip and reload the paper, following the directions on the instruction sheet to complete the print job.

Note: To return to single-sided printing, return to the Advanced tab. From the 2-Sided Printing section, select **Off** from the drop-down menu.

For Macintosh users

- 1 With a document open, choose **File > Print**.
- 2 From the print options pop-up menu, choose **Paper Handling**.
- 3 From the Print or “Pages to print” pop-up menu, select to print the odd-numbered pages.
- 4 If you are printing multiple pages, then from the Page Order menu, select **Reverse**.
- 5 After printing the first set of pages, flip and reload the paper.

- 6 Repeat steps 1 and 2.
- 7 From the Print or “Pages to print” pop-up menu, select to print the even-numbered pages.
- 8 Click **Print**.

Managing print jobs

Setting your printer as the default printer

Your printer should be selected automatically from the Print dialog when you send a print job. If you have to manually select your printer, then it is not the default printer.

To set the default printer:

For Windows users

- 1 Click , or click **Start** and then click **Run**.
- 2 In the Start Search or Run box, type `control printers`.
- 3 Press **Enter**, or click **OK**.
The printer folder opens.
- 4 Right-click the printer, and then select **Set as Default Printer**.

For Macintosh users

- 1 From the Apple menu, choose **System Preferences**.
- 2 Click **Print & Fax**.

- 3 Select the printer from the Default Printer pop-up menu, or select the printer and click **Make Default**, depending on your operating system.

Changing the printing mode

To conserve ink, you can change the default printing mode for all print jobs to Quick Print. It uses less ink and is ideal for printing text-only documents. If you need to change to a different print mode to print photos or other high-quality documents, then you can select a different mode from the Print dialog before sending the print job.

To change the default print mode:

For Windows users

- 1 Click , or click **Start** and then click **Run**.
- 2 In the Start Search or Run box, type **control printers**.
- 3 Press **Enter**, or click **OK**.
The printer folder opens.
- 4 Right-click the printer, and then select **Printing Preferences**.
- 5 Select **Quick Print** as the printing mode.

For Macintosh users

- 1 With a document open, choose **File > Print**.
- 2 From the printer pop-up menu, choose the printer.
- 3 From the print options pop-up menu, choose **Print Settings** or **Quality & Media**, depending on your operating system.
- 4 From the Print Quality pop-up menu, choose **Quick Print** as the printing mode.
- 5 From the Presets pop-up menu, choose **Save as**, and then type a name for your setting configuration.
You must choose this configuration name from the Presets pop-up menu for each print job.

Changing the printing mode for a single print job

For Windows users

- 1 With a document open, click **File → Print**.
- 2 Click **Properties**, **Preferences**, **Options**, or **Setup**.
- 3 Select **Automatic**, **Quick Print**, **Normal**, or **Best**.

Note: Printing in Draft or Quick Print mode uses less ink and is ideal for printing text documents.

For Macintosh users

- 1 With a document open, choose **File > Print**.
- 2 From the printer pop-up menu, choose the printer.

- 3 From the print options pop-up menu, choose **Print Settings** or **Quality & Media**, depending on your operating system.
- 4 From the Print Quality pop-up menu, choose **Automatic**, **Quick Print**, **Normal**, or **Best**.
Note: Printing using Quick Print uses less ink and is ideal for printing text documents.

Pausing print jobs

For Windows users

- 1 Click , or click **Start** and then click **Run**.
- 2 In the Start Search or Run box, type `control printers`.
- 3 Press **Enter**, or click **OK**.
The printer folder opens.
- 4 Right-click the printer, and then select **Open** or **See what's printing**.
- 5 Pause the print job:
 - If you want to pause a particular print job, then right-click the document name, and then select **Pause**.
 - If you want to pause all print jobs in the queue, then click **Printer**, and then select **Pause Printing**.

For Macintosh users

- 1 Click the printer icon on the Dock.
The print queue dialog appears.
- 2 Pause the print job:
 - If you want to pause a particular print job, then choose the document name, and then click **Hold**.
 - If you want to pause all print jobs in the queue, then click **Pause Printer** or **Stop Jobs**, depending on your operating system.

Resuming print jobs

For Windows users

- 1 Click , or click **Start** and then click **Run**.
- 2 In the Start Search or Run box, type `control printers`.
- 3 Press **Enter**, or click **OK**.
The printer folder opens.
- 4 Right-click the printer, and then select **Open** or **See what's printing**.
- 5 Resume the print job:
 - If you want to resume a particular print job, then right-click the document name, and then select **Resume** or **Restart**.
 - If you want to resume all print jobs in the queue, then click **Printer**, and then clear the selection for Pause Printing.

For Macintosh users

- 1 From the Apple menu, choose **System Preferences**.
- 2 Click **Print & Fax**.
- 3 From the Printers list or pop-up menu, choose the printer.
- 4 Click **Open Print Queue** or **Set Up Printers**, depending on your operating system.
The print queue dialog appears.
- 5 Resume the print job:
 - If you want to resume a particular print job, then choose the document name, and then click **Resume**.
 - If you want to resume all print jobs in the queue, then click **Resume Printer** or **Start Jobs**.

Canceling print jobs

To cancel a print job from the printer control panel, press . To cancel a print job from the computer, do the following:

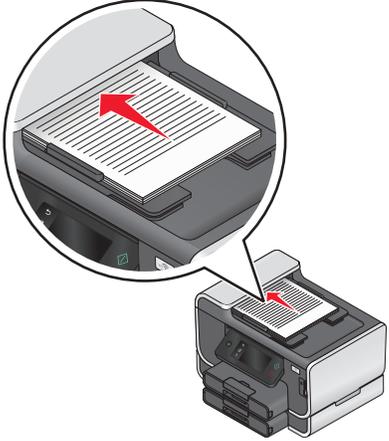

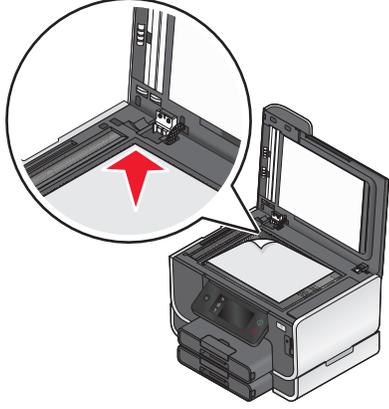

For Windows users

- 1 Click , or click **Start** and then click **Run**.
- 2 In the Start Search or Run box, type **control printers**.
- 3 Press **Enter**, or click **OK**.
The printer folder opens.
- 4 Right-click the printer, and then select **Open** or **See what's printing**.
- 5 Cancel the print job:
 - If you want to cancel a particular print job, then right-click the document name, and then select **Cancel**.
 - If you want to cancel all print jobs in the queue, then click **Printer → Cancel All Documents**.

For Macintosh users

- 1 Click the printer icon on the Dock.
- 2 From the print queue dialog, choose the job you want to cancel, and then click **Delete**.

Copying

ADF	Scanner glass
 <p>Use the ADF for multiple-page documents.</p> <p>Note: The ADF is available only on selected models. If you purchased a printer without an ADF, then load original documents or photos on the scanner glass.</p>	 <p>Use the scanner glass for single pages, small items (such as postcards or photos), transparencies, photo paper, or thin media (such as magazine clippings).</p>

Tips for copying

- When using the ADF, adjust the paper guide on the ADF to the width of the original document.
- When using the scanner glass, close the scanner lid to avoid dark edges on the scanned image.
- Do *not* load postcards, photos, small items, transparencies, photo paper, or thin media (such as magazine clippings) into the ADF. Place these items on the scanner glass.

Making copies

- 1 Load paper.
- 2 Load an original document faceup into the ADF or facedown on the scanner glass.

Note: From the home screen, you can press  to print one copy of the original document using the default settings.
- 3 From the home screen, navigate to **Number of Copies**:
Copy > Number of Copies
- 4 Enter the number of copies you want to print, and then touch **Accept**.
- 5 Touch **Color** or **Black/White** to set a color or black-and-white copy.
- 6 Press .

Copying photos

- 1 Load photo paper.
- 2 Place a photo facedown on the scanner glass.
- 3 From the home screen, navigate to **Photo Reprint:**
SmartSolutions > Photo Reprint
- 4 Touch **Continue**.
- 5 Select the photo print size, and then touch **Accept**.
- 6 Touch **Continue** to start printing.

Note: For best results, allow the prints to dry at least 24 hours before stacking, displaying, or storing.

Copying an ID card

- 1 Load paper.
- 2 From the home screen, navigate to **ID Card Copy:**
SmartSolutions > ID Card Copy
- 3 Load the front side of the ID card facedown on the top left corner of the scanner glass.
- 4 Touch **Continue**.
- 5 When prompted to copy the back side of the ID card, touch **Yes**.
- 6 Load the back side of the ID card facedown on the top left corner of the scanner glass.
- 7 Touch **Continue** to start printing.

Copying a two-sided document

- 1 Load paper.
- 2 Load an original document faceup into the ADF or facedown on the scanner glass.
- 3 From the home screen, navigate to **2-Sided Copies:**
Copy > More Options > 2-Sided Copies
- 4 Touch **2-Sided to 1-Sided** or **2-Sided to 2-Sided**, and then touch **Accept**.
 - Select 2-Sided to 1-Sided to make single-sided copies of the two-sided document.
 - Select 2-Sided to 2-Sided to make two-sided copies (like the original document).
- 5 Press .
- 6 Follow the instructions on the display.

Enlarging or reducing images

- 1 Load paper.
- 2 Load an original document faceup into the ADF or facedown on the scanner glass.
- 3 From the home screen, navigate to **Resize**:
Copy > More Options > Resize
- 4 Select a resize setting, and then touch **Accept**.

Notes:

- If you select Custom %, then select the desired custom percent value. Touch **Accept** to save the setting.
- If you select Borderless, then the printer will reduce or enlarge the document or photo as necessary to print a borderless copy on the paper size that you selected. For best results with this resize setting, use photo paper and set the paper type to Photo, or let the printer automatically detect the paper type.
- If you select Poster, then select the size of the poster you want to print, and then touch **Accept**. This selection allows you to print a single image across multiple printed pages.

- 5 Press .

Adjusting copy quality

- 1 Load paper.
- 2 Load an original document faceup into the ADF or facedown on the scanner glass.
- 3 From the home screen, navigate to **Quality**:
Copy > More Options > Quality
- 4 Set the copy quality to Automatic, Draft, Normal, or Photo, and then touch **Accept**.
- 5 Press .

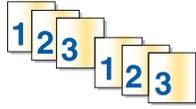

Making a copy lighter or darker

- 1 Load paper.
- 2 Load an original document faceup into the ADF or facedown on the scanner glass.
- 3 From the home screen, navigate to **Lighter/Darker**:
Copy > More Options > Lighter/Darker
- 4 Use the slider to change the darkness level, and then touch **Accept**.
Dragging the slider to the left makes the copy lighter, and dragging the slider to the right makes the copy darker.
- 5 Press .

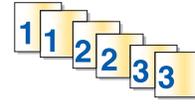

Collating copies using the printer control panel

If you print multiple copies of a document, then you can choose to print each copy as a set (collated) or to print the copies as groups of pages (not collated).

Collated

Not collated

- 1 Load paper.
- 2 Load an original document faceup into the ADF or facedown on the scanner glass.
- 3 From the home screen, navigate to **Number of Copies**:
Copy > Number of Copies
- 4 Enter the number of copies you want to print, and then touch **Accept**.
- 5 Touch **More Options**.
- 6 Scroll to **Collate**, and then touch .
- 7 Press .

Repeating an image on one page

You can print the same page image multiple times on one sheet of paper. This option is helpful when creating items such as labels, decals, flyers, and handouts.

- 1 Load paper.
- 2 Load an original document facedown on the scanner glass.
- 3 From the home screen, navigate to **Copies per Sheet**:
Copy > More Options > Copies per Sheet
- 4 Select the number of times to repeat the image on a page: once, four times, nine times, or 16 times, and then touch **Accept**.
- 5 Press .

Copying multiple pages on one sheet

The Pages per Sheet setting lets you copy multiple pages on one sheet by printing smaller images of each page. For example, you can condense a 20-page document into five pages if you use this setting to print four page images per sheet.

- 1 Load paper.
- 2 Load an original document faceup into the ADF or facedown on the scanner glass.
- 3 From the home screen, navigate to **Pages per Sheet**:
Copy > More Options > Pages per Sheet

- 4 Select the number of pages that you want to copy on a sheet of paper, and then touch **Accept**. You may choose to copy one, two, or four page images on a sheet.

Note: If you are copying four pages in landscape format, scan pages 3 and 4 first, and then scan pages 1 and 2.

- 5 Press .

Making a duplex copy

Making a duplex copy automatically

The automatic duplex unit, available only on selected printer models, supports letter- and A4-size paper. If you purchased a model without automatic duplex, or if you need to make duplex copies using other paper sizes, then see the instructions for making a duplex copy manually.

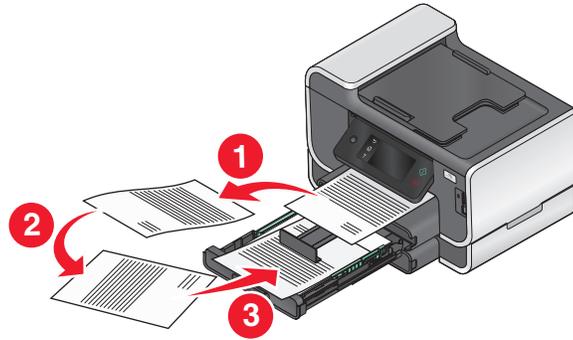

Note: You cannot make duplex copies on envelopes, card stock, or photo paper.

- 1 Load paper.
- 2 Load an original document faceup into the ADF or facedown on the scanner glass.
- 3 From the home screen, navigate to **2-Sided Copies**:
Copy > More Options > 2-Sided Copies
- 4 Choose the duplex option that matches your original document, and then touch **Accept**:
 - If you are copying a one-sided document, then touch **1-Sided to 2-Sided**.
 - If you are copying a two-sided document, then touch **2-Sided to 2-Sided**.
- 5 Press  to save the first page of the document to the printer memory.
- 6 Follow the instructions on the display.

Making a duplex copy manually

- 1 Load paper.
- 2 Load an original document faceup into the ADF or facedown on the scanner glass.
- 3 From the home screen, touch **Copy**.
- 4 Press  to print on one side of the paper.
- 5 Load the next page of the document:
 - If you are copying a one-sided document, then load the next page faceup into the ADF or facedown on the scanner glass.
 - If you are copying a two-sided document, then flip the original document, and then reload it faceup into the ADF or facedown on the scanner glass.

6 Remove the paper from the paper exit tray, and then reload the paper to print the other side of the document.

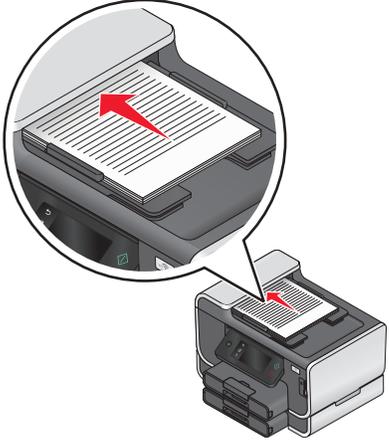

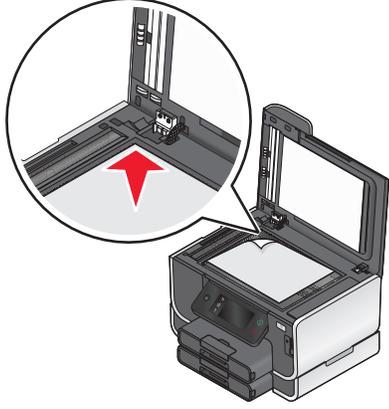

7 Press .

Canceling copy jobs

To cancel a copy job, press .

Scanning stops and the printer returns to the previous menu.

Scanning

ADF	Scanner glass
 <p>Use the ADF for multiple-page documents.</p> <p>Note: The ADF is available only on selected models. If you purchased a printer without an ADF, then load original documents or photos on the scanner glass.</p>	 <p>Use the scanner glass for single pages, small items (such as postcards or photos), transparencies, photo paper, or thin media (such as magazine clippings).</p>

Tips for scanning

- When using the ADF, adjust the ADF paper guide to the width of the original document.
- When using the scanner glass, close the scanner lid to avoid dark edges on the scanned image.
- Do *not* load postcards, photos, small items, transparencies, photo paper, or thin media (such as magazine clippings) into the ADF. Place these items on the scanner glass.
- Select the PDF file type if you want to scan multiple pages and save them as one file.

Scanning to a local or network computer

1 Load an original document faceup into the ADF or facedown on the scanner glass.

2 From the home screen, navigate to **Scan to Computer**:

Scan > Scan to Computer

3 Touch **USB-Connected Computer** or the name of a network computer.

The local or network computer is the destination that will receive the scan. Wait until the printer has finished downloading a list of the scan applications available on the selected computer.

Notes:

- If the printer is connected only to a local computer, then the printer will automatically download a list of the scan applications.
- You may be prompted to enter a PIN if the computer requires it. Enter the PIN using the keypad.
- To assign a computer name and a PIN to the computer, see the Help for the printer software associated with your operating system.

4 Select an application, and then touch **Accept**.

5 Select the color, resolution quality and the original image size. If necessary, touch **Accept** each time you make a selection.

6 Press  to start scanning.

The scan is complete when the application you selected in step 4 opens on the destination computer, and the scan appears within the application as a new file.

Scanning to a flash drive or memory card

Before you begin, make sure your flash drive or memory card is not write protected.

1 Load an original document faceup into the ADF or facedown on the scanner glass.

2 From the home screen, navigate to **Scan to Memory Device**:

Scan > Scan to Memory Device

3 Insert the flash drive or memory card.

Notes:

- The printer reads only one memory device at a time.
- If a flash drive is inserted into the USB port while a memory card is in the card slot, then a message appears on the display prompting you to select which memory device to use.

4 Select the output file type you want to create.

Note: Select the PDF file type if you want to scan multiple pages and save them as one file.

5 Select the color, resolution quality, and original image size. If necessary, touch **Accept** each time you make a selection.

6 Press  to start scanning.

The scan is complete when a message appears on the printer control panel indicating that the file you scanned has been saved.

Scanning photos into an editing application

Using the printer control panel

1 Load an original document faceup into the ADF or facedown on the scanner glass.

2 From the home screen, navigate to **Scan to Computer**:

Scan > Scan to Computer

3 Touch **USB-Connected Computer** or the name of a network computer.

The local or network computer is the destination that will receive the scan. Wait until the printer has finished downloading the list of scan applications available on the selected computer.

Notes:

- You may be prompted to enter a PIN if the computer requires it. Enter the PIN using the keypad.
- To assign a computer name and a PIN to the computer, see the Help for the printer software associated with your operating system.

4 Select an application, and then touch **Accept**.

5 Select the resolution quality and the original image size. Touch **Accept** each time you make a selection.

6 Press  to start scanning.

The scan is complete when the application you selected in step 5 opens on the destination computer, and the scan appears within the application as a new file.

Using the printer software

For Windows users

1 Load a photo or photos facedown on the scanner glass.

2 Click  or **Start**.

3 Click **All Programs** or **Programs**, and then select the printer program folder from the list.

4 Select **Printer Home**.

5 Choose your printer from the printer drop-down list.

6 Click **Photo**.

- If you want to scan a single photo, or multiple photos as a single image, then select **Single photo**.
- If you want to scan multiple photos at once and save them as separate images, then select **Split into individual photos**.

Note: Allow at least 1/4 inch of space between photos if you want to scan multiple photos at once and save them as separate images.

Scanning starts and the scan progress dialog appears.

7 Save the photo or photos and open in a photo editing application to edit.

For Macintosh users

1 Load a photo or photos facedown on the scanner glass.

2 From the Finder desktop, double-click the printer program folder.

3 Double-click the printer Center to open the All-In-One Center.

4 From the "What is being scanned?" menu on the main screen, select **Photo**.

5 From the "How will the scanned image be used?" pop-up menu, choose **To be printed** or **To be viewed on monitor/Web page**.

6 From the "Send scanned image to" menu, choose a destination folder or application for the scanned image.

- 7 If you have several images to scan, then select **Prompt for multiple pages**.
- 8 Click **Preview/Edit**.
The Scan dialog appears.
- 9 Adjust the image and scan settings as needed.
- 10 Click **Scan**.

Scanning documents into an editing application

An Optical Character Recognition (OCR) application allows you to edit an original text document that has been scanned. In order for this to work, you must have an OCR application stored on a local or network computer and you must be able to choose it from the list of applications when you set up the scan.

When selecting settings for the scan:

- Select to scan to the local computer or network computer where the OCR is installed.
- Select to scan to the highest resolution.

For Windows users

- 1 Load an original document faceup into the ADF or facedown on the scanner glass.
- 2 Click  or **Start**.
- 3 Click **All Programs** or **Programs**, and then select the printer program folder from the list.
- 4 Select **Printer Home**.
- 5 Choose your printer from the printer drop-down list.
- 6 Click **Document**.
Scanning starts and the scan progress dialog appears.
- 7 When the scan is finished, save the document in a word-processing application.
- 8 Open the document in the selected application to edit it.

For Macintosh users

- 1 Load an original document faceup into the ADF or facedown on the scanner glass.
- 2 From the Finder desktop, double-click the printer program folder.
- 3 Double-click the printer Center to open the All-In-One Center.
- 4 From the "What is being scanned?" menu on the main screen, select a document type other than Photo.
- 5 From the "How will the scanned image be used?" pop-up menu, choose **To be edited (OCR)**.
- 6 From the "Send scanned image to" menu, choose a word-processing application to use for editing.
- 7 Click **Scan**.
- 8 Open the scanned document from a word-processing application to edit it.

Scanning directly to e-mail using the printer software

For Windows users

- 1 Load an original document faceup into the ADF or facedown on the scanner glass.
- 2 Click  or **Start**.
- 3 Click **All Programs** or **Programs**, and then select the printer program folder from the list.
- 4 Select **Printer Home**.
- 5 Choose your printer from the printer drop-down list.
- 6 Click **Email**, and then select **Photo, Document** or **PDF**.
Note: You can select Document only if an OCR application is stored on your computer.
Scanning starts and the scan progress dialog appears.
- 7 When the scan is finished, a new e-mail message is created with the scanned document automatically attached.
- 8 Compose your e-mail message.

Note: If your e-mail program does not open automatically, then you can scan the document to the computer and then send it through e-mail as an attachment.

For Macintosh users

- 1 Load an original document faceup into the ADF or facedown on the scanner glass.
- 2 From the Finder desktop, double-click the printer program folder.
- 3 Double-click the printer Center to open the All-In-One Center.
- 4 From the “What is being scanned?” menu on the main screen, select a document type.
- 5 From the “How will the scanned image be used?” menu, choose **To be viewed on monitor/web page**.
- 6 From the “Send scanned image to” menu, choose an application.
- 7 Click **Scan**.
- 8 Retrieve the scanned image from the application, and then send it through e-mail as an attachment.

Scanning to a PDF

For Windows users

- 1 Load an original document faceup into the ADF or facedown on the scanner glass.
- 2 Click  or **Start**.
- 3 Click **All Programs** or **Programs**, and then select the printer program folder from the list.
- 4 Select **Printer Home**.

- 5 Choose your printer from the printer drop-down list.
- 6 Click **PDF**.
Scanning starts and the scan progress dialog appears.
- 7 Save the document as a PDF.

For Macintosh users

- 1 Load an original document faceup into the ADF or facedown on the scanner glass.
- 2 From the Finder desktop, double-click the printer program folder.
- 3 Double-click the printer Center to open the All-In-One Center.
- 4 From the “What is being scanned?” menu on the main screen, choose a document type.
- 5 Customize the settings as needed.
- 6 Click **Scan**.
- 7 Save the document as a PDF.

Scanning FAQ

How can I improve the quality of a scan?

- Make sure your original documents are in good condition.
- Make sure the application that receives the scanned document is appropriate. For example, if you are scanning a photo to edit it, then make sure you choose a photo editing application to receive the scan. If you are scanning a document to edit the text, then make sure you choose an OCR application.
- Use a high resolution.

How do I scan in black and white?

Color is the default for all scans. To scan in black and white, do the following:

- 1 From the home screen of the printer control panel, touch **Scan**.
- 2 Choose a scan destination.
- 3 Select the settings for the scan.
- 4 From the Scan Options screen, touch .

Why am I being asked for a PIN?

PINs are a security measure used to restrict the scanned information from going into certain locations, or to keep what is being scanned from being seen or used by others. You may be prompted to enter a PIN if the network computer you are scanning to requires one.

To learn how PINs get assigned to network computers, see the Help for the printer software associated with your operating system.

What is an application list, and how do I update it?

When you scan a file, you can choose which application to use to open it on your computer. The printer downloads this application list from your computer when scanning for the first time. If you do not see the application you want on the list, or if you install new applications on your computer, then update the application list in the printer.

Updating the application list

- 1 From the home screen of the printer control panel, navigate to **Scan to Computer**:
Scan > Scan to Computer
- 2 Select a local or network computer to receive the scan.
- 3 From the list of scan applications available on the selected computer, touch **REFRESH**, and then touch **Accept**.
This updates the application list in the printer.

Canceling scan jobs

Press  on the printer control panel, or click **Cancel** on the computer screen.

E-mailing

You can use your printer to send e-mail to one or more recipients without using a computer. To do this, you can either scan a document or photo and then send it as an e-mail, or you can attach a saved document or photo from a memory device to an e-mail.

Before you can send e-mail using the printer control panel, you must first configure the e-mail settings of your printer.

Setting up the printer to e-mail

Setting up the e-mail function

- 1 From the home screen, navigate to **E-mail Setup**:

 > **E-mail Setup**

- 2 Touch **Yes** to set up e-mail.

- 3 Enter your e-mail address, and then touch **OK**.

The printer compares your e-mail address to the list of known e-mail providers.

- 4 Follow the prompts on the display:

- If your e-mail address matches one of the domains on the list, then the printer automatically assigns the SMTP server settings.

Note: You may be required to enter your e-mail account user name and password depending on the e-mail address you entered.

- If the e-mail domain is not known, then the Advanced E-mail Setup Wizard appears on the display. Enter the necessary information. Touch **OK** or **Accept** to save each item.

Changing the e-mail settings after setup

If you want to change the SMTP server settings

- 1 From the home screen, navigate to **E-mail Setup**:

 > **E-mail Setup** > **SMTP Setup**

- 2 Touch each item to enter the necessary information. Touch **OK** or **Accept** to save each item.

- **Server**—Enter the name or address of the SMTP server.
- **Port**—Enter the SMTP port.
- **Authentication Type**—Select the authentication type for your e-mail account. If you select None, then you will not be required to enter the User Name and Password. For more information, contact your e-mail provider or your system support person.

Note: The Authentication Type screen may not appear on the display, depending on the e-mail address you entered during e-mail setup.

- **Sender's Name**—Enter your name.
- **User Name**—Enter your e-mail address.

- **Password**—Enter your e-mail account password.
- **Domain**—Enter your e-mail account domain.

Note: This setting appears only when the Authentication Type is set to NTLM. For more information, contact your e-mail provider or your system support person.

3 To check if the SMTP server settings are correct, touch **Test SMTP Settings**.

If you want to change the e-mail settings

1 From the home screen, navigate to **E-mail Setup**:

 > **E-mail Setup**

2 Touch each item, and then enter the necessary information. If necessary, touch **OK** or **Accept** to save each item.

- **Return E-mail Address**—Enter your e-mail address.
- **Send Me a Copy**—Touch **Yes** to send yourself a copy of every e-mail sent from your printer.
- **Subject Line**—Enter your default e-mail subject.
- **Message**—Enter your default e-mail message.

Creating an e-mail contact list

Creating an e-mail contact list using the printer control panel

1 From the home screen, navigate to **Address Book**:

 > **Address Book**

2 Add a contact or an e-mail group:

- To add a contact:
 - Touch **Add a Contact**.
 - Touch **Add Contact Name**.
 - Enter the contact name, and then touch **OK**.
 - Touch **Add E-mail Address**.
 - Enter the e-mail address of the contact, and then touch **OK**.
 - Touch **Accept**.
 - If you want to add another entry, then repeat steps a through f. You can enter up to 89 contacts.
- To add an e-mail group:
 - Touch **Add a Group**.
 - Touch **Add Group Name**.
 - Enter a group name, and then touch **OK**.
 - Touch **Add Group Member**, and then select whether you want to add a contact manually or import a contact:
 - **Address Book**—Import a contact from the Address Book.
 - **History**—Import a contact from the e-mail history.
 - **New Entry**—Add a new contact.
 - Touch **Accept** to save the entry every time you import a contact or add a contact.

Creating an e-mail contact list using the printer software

For Windows users

- 1 Click  or **Start**.
- 2 Click **All Programs** or **Programs**, and then select the printer program folder from the list.
- 3 Click **Printer Home**.
- 4 Click the **Fax** tab, and then click **Edit contact list**.
The Contacts tab of the Printer Setup Utility opens.
- 5 Click **Select from phonebook**.
- 6 From the Phonebook field, choose a phone book.
You can choose any mail client phone book where you store e-mail addresses.
- 7 Select the contact that you want to add, and then click **Add to or change list** to import the contact.
- 8 Click **OK**.

For Macintosh users

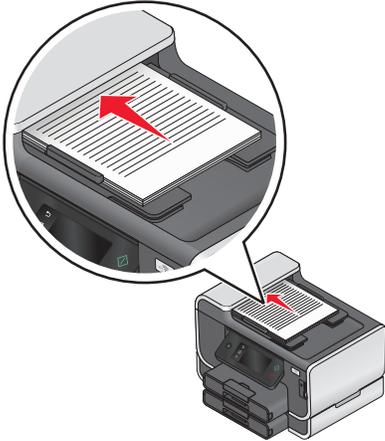

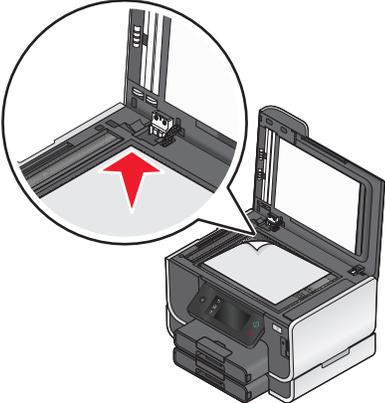

- 1 From the Finder desktop, double-click the printer folder.
- 2 Double-click the AIO Setup Utility for your printer.
- 3 Click the **Contacts** tab.
- 4 Click the **Individuals** tab to add contacts.
- 5 Click  to open the Address Book.

Note: To add contacts, you need to import contacts from the Address Book on your Macintosh computer. If the contact is not in the Mac Address Book, then first add the contact to the address book and then import it.

- 6 From the Address Book, click and drag the contacts that you want to add to the Contacts list.

For more information, click **Help** or  to view the help information for the fax software.

Sending e-mail

ADF	Scanner glass
 <p>Use the ADF for multiple-page documents.</p> <p>Note: The ADF is available only on selected models. If you purchased a printer without an ADF, then load original documents or photos on the scanner glass.</p>	 <p>Use the scanner glass for single pages, small items (such as postcards or photos), transparencies, photo paper, or thin media (such as magazine clippings).</p>

Tips for e-mailing

- When using the ADF, adjust the paper guide on the ADF to the width of the original document.
- When using the scanner glass, close the scanner lid to avoid dark edges on the scanned image.
- Do *not* load postcards, photos, small items, transparencies, photo paper, or thin media (such as magazine clippings) into the ADF. Place these items on the scanner glass.
- Make sure to enter your e-mail account information and set up the SMTP server before sending an e-mail.
- Make sure the printer is connected to an Ethernet or wireless network before sending an e-mail.

If necessary, make sure the network is connected to the Internet for the printer to communicate with the SMTP server. If the printer cannot connect to the Internet, then contact your system support person.

The printer supports only one active network connection (Ethernet or wireless) at a time.

- Add contacts to your address book. When sending an e-mail, you can just select contacts from your address book instead of typing their e-mail addresses repeatedly.

Scanning a document or photo to e-mail

- 1 Load an original document faceup into the ADF or facedown on the scanner glass.

Note: You can attach only one document or photo to each e-mail.

- 2 From the home screen, navigate to **Scan to E-mail**:

Scan > Scan to E-mail

- 3 Select the output file type you want to create.

Note: Select the PDF file type if you want to scan multiple pages and save them as one file.

4 Touch an option to enter or select the recipients:

- **Enter E-mail Address**—Enter the e-mail address manually.
- **Address Book**—Touch **Sort by Name** or **Sort by Group**, and then select the contact.
- **History**—Select the name or e-mail address from the history list.

If necessary, touch **OK** or **Accept** each time you make a selection.

5 To enter additional recipients, touch **Add Recipient**, and then enter the e-mail address, name, or group you want to add.

Touch **Accept** every time you add a recipient.

Note: You can send an e-mail to up to 30 recipients.

6 Select the file type, color, quality, and original size of the document or photo you want to send. If necessary, touch **Accept** to save each setting.

7 If you want to change the default e-mail subject:

- a Touch **Subject**.
- b Enter your subject, and then touch **OK**.

8 If you want to change the default e-mail message:

- a Touch **Message**.
- b Enter your message, and then touch **OK**.

9 Press .

Attaching a document or photo to e-mail

1 Insert the flash drive or memory card.

The Memory Device screen appears on the display.

Notes:

- The printer reads only one memory device at a time.
- If a flash drive is inserted into the USB port while a memory card is in the card slot, then a message appears on the display prompting you to select which memory device to use.

2 Touch **Attach File to E-mail**.

3 If you want to change the default e-mail subject:

- a Touch **Subject**.
- b Enter your subject, and then touch **OK**.

4 If you want to change the default e-mail message:

- a Touch **Message**.
- b Enter your message, and then touch **OK**.

5 Select the file to attach:

Note: You can attach only one document or photo to each e-mail.

- If you want to attach a document:
 - a Touch **Attach document to E-mail**.
 - b Touch the file name of the document that you want to attach.

- c Touch **Continue**.
- If you want to attach a photo:
 - a Touch **Attach Photo to E-mail**.
 - b Touch the photo you want to attach.
 - c Touch **Continue**.

6 Touch an option to enter or select the recipients:

- **Enter E-mail Address**—Enter the e-mail address manually.
- **Address Book**—Touch **Sort by Name** or **Sort by Group**, and then select the contact.
- **History**—Select the name or e-mail address from the history list.

If necessary, touch **OK** or **Accept** each time you make a selection.

7 To enter additional recipients, touch **Add Recipient**, and then enter the e-mail address, name, or group you want to add.

Touch **Accept** every time you add a recipient.

Note: You can send an e-mail to up to 30 recipients.

8 Touch **Send**.

Canceling an e-mail

To cancel an e-mail, press .

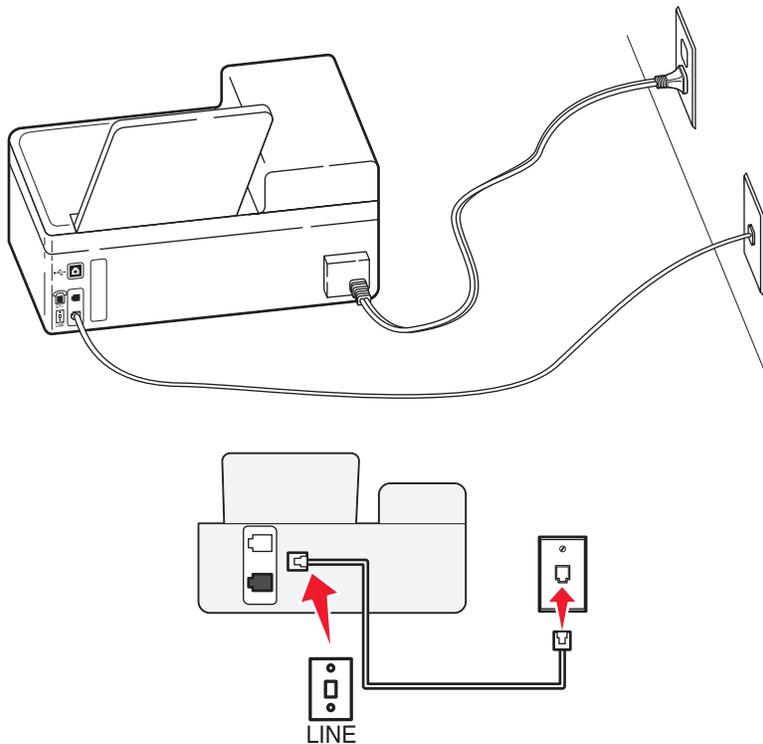

Faxing

CAUTION—SHOCK HAZARD: Do not use the fax feature during a lightning storm. Do not set up this product or make any electrical or cabling connections, such as the power supply cord or telephone, during a lightning storm.

Setting up the printer to fax

Scenario 1: Standard telephone line

Setup 1: Printer is connected to a dedicated fax line

To connect:

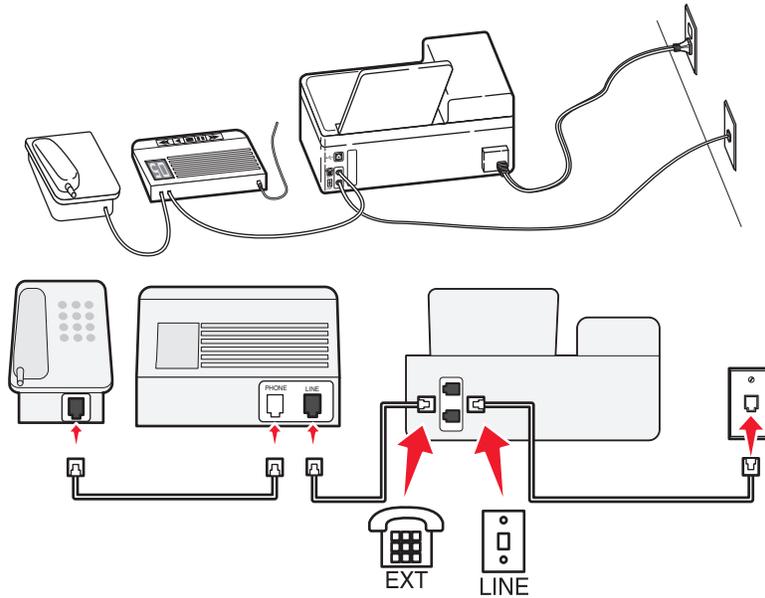

Connect the cable from the wall jack to the  port of the printer.

Tips for this setup:

- You can set the printer to receive faxes automatically (Auto Answer On) or manually (Auto Answer Off).
- If you want to receive faxes automatically (Auto Answer On), then set the printer to pick up on any number of rings that you want.

Setup 2: Printer is sharing the line with an answering machine

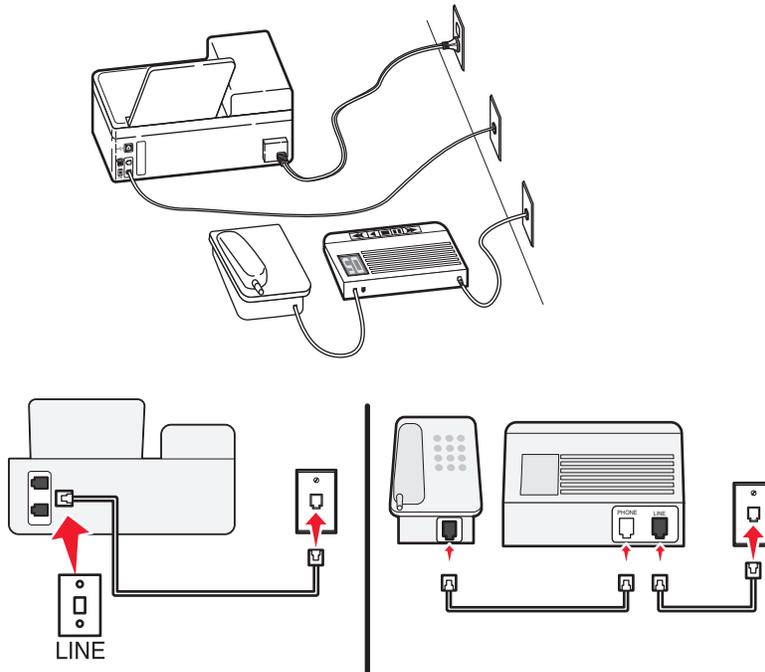

Connected to the same telephone wall jack

To connect:

- 1 Connect the cable from the wall jack to the  port of the printer.
- 2 Remove the protective plug from the  port of the printer, and then connect the answering machine to the port.

Connected to different wall jacks

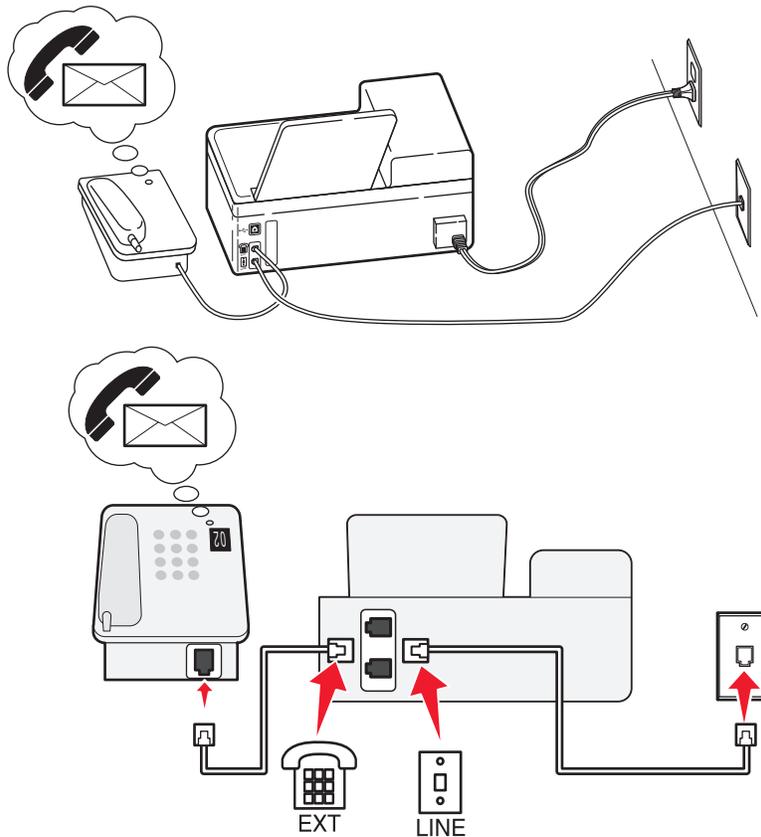

To connect:

Connect the cable from the wall jack to the  port of the printer.

Tips for this setup:

- If you have only one telephone number on your line, then you need to set the printer to receive faxes automatically (Auto Answer On).
- Set the printer to pick up calls two rings after the answering machine. For example, if the answering machine picks up calls after four rings, then set the printer to pick up after six rings. This way, the answering machine picks up calls first and your voice calls are received. If the call is a fax, then the printer detects the fax signal on the line and takes over the call.
- If you subscribe to a distinctive ring service provided by your telephone company, then make sure that you set the correct ring pattern for the printer. Otherwise, the printer will not receive faxes even if you have set it to receive faxes automatically.

Setup 3: Printer is sharing the line with a telephone subscribed to voice mail service

To connect:

- 1 Connect the cable from the wall jack to the  port of the printer.
- 2 Remove the protective plug from the  port of the printer, and then connect the telephone to the port.

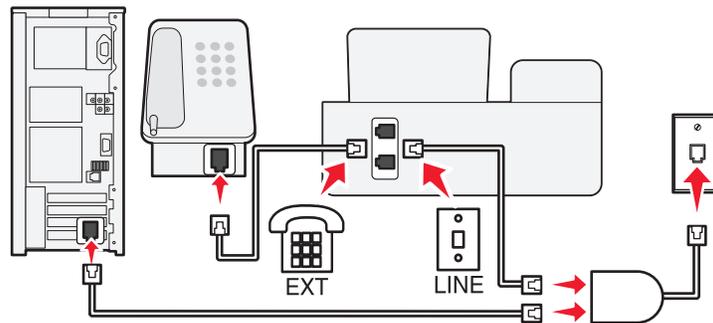

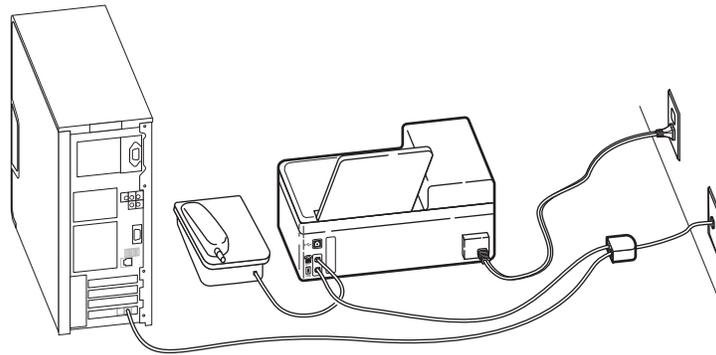

Tips for this setup:

- This setup works best if you subscribe to a distinctive ring service. If you have distinctive ring service, then make sure that you set the correct ring pattern for the printer. Otherwise, the printer will not receive faxes even if you have set it to receive faxes automatically.
- If you have only one telephone number on your line, then you need to set the printer to receive faxes manually (Auto Answer Off).

When you answer the telephone and you hear fax tones, press *9* or the manual answer code on the telephone to receive the fax.

- You can also set the printer to receive faxes automatically (Auto Answer On), but you need to turn off the voice mail service when you are expecting a fax. This setting works best if you are using voice mail more often than fax.

Scenario 2: Digital Subscriber Line (DSL)

A Digital Subscriber Line splits your regular telephone line into two channels: voice and Internet. Telephone and fax signals travel through the voice channel, and Internet signals pass through the other channel. This way, you can use the same line for analog voice calls (including faxes) and digital Internet access.

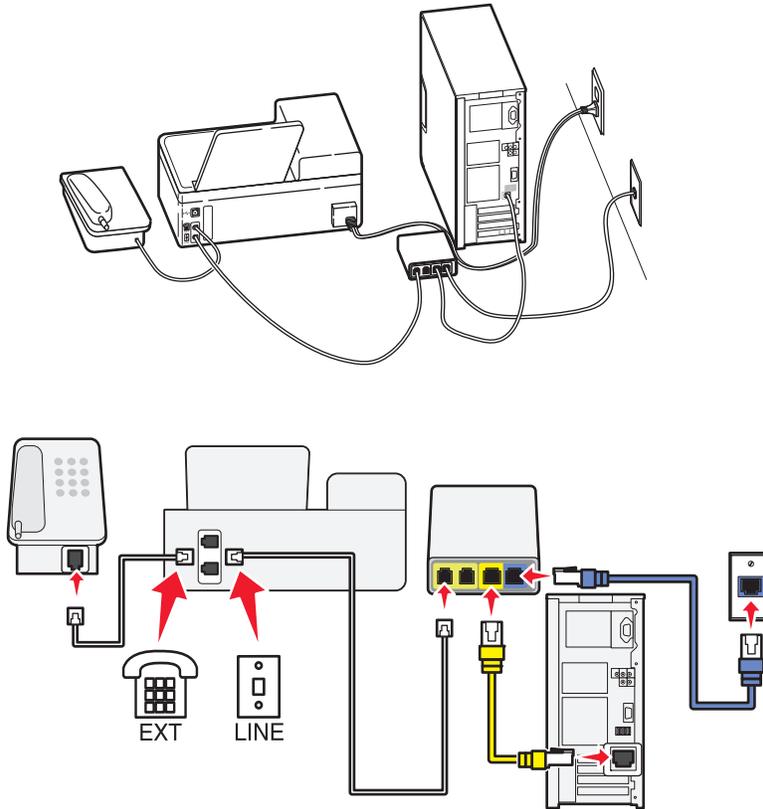

To minimize interference between the two channels and ensure a quality connection, you need to install a DSL filter for the analog devices (fax machine, telephone, answering machine) in your network. Interference causes noise and static on the telephone, failed and poor quality faxes for the printer, and slow Internet connection on your computer.

To install a filter for the printer:

- 1 Connect the line port of the DSL filter to the wall jack.
- 2 Connect a telephone cable from the  port on the back of the printer to the phone port on the DSL filter.

- 3 To continue using a computer for Internet access, connect the computer to the DSL HPN port on the DSL filter.
- 4 To connect a telephone to the printer, remove the protective plug from the ☎ port of the printer and then connect the telephone to the port.

Scenario 3: VoIP telephone service

To connect:

- 1 Connect one end of a telephone cable to the ☎ port of the printer.
- 2 Connect the other end of the cable to the port labeled **Phone Line 1** or **Phone Port** on the VoIP adapter.
The port labeled **Phone Line 2** or **Fax Port** is not always active. You may need to pay extra to your VoIP provider if you want to activate the second phone port.
- 3 Remove the protective plug from the ☎ port of the printer, and then connect the telephone to the port.

Tips for this setup:

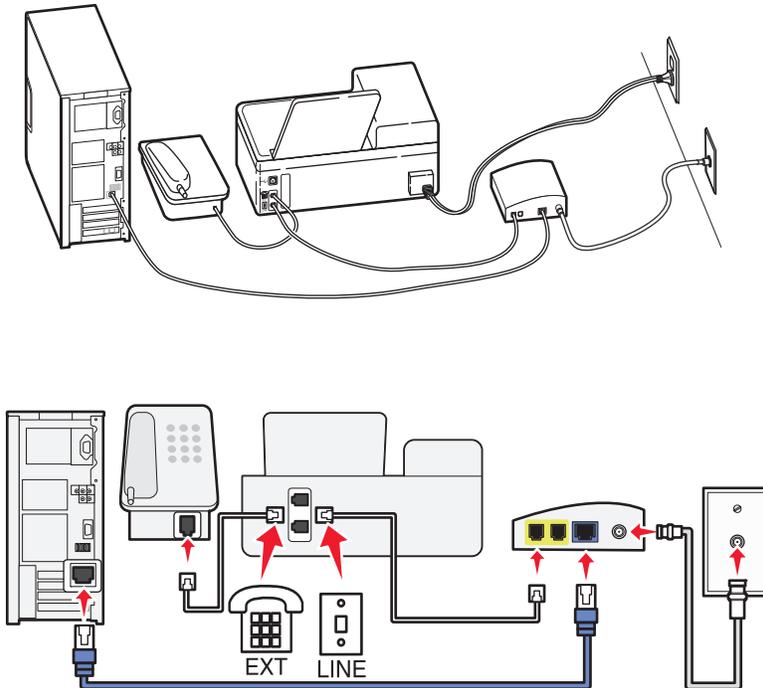

- To make sure that the phone port on the VoIP adapter is active, plug an analog telephone into the phone port, and then listen for a dial tone. If you hear a dial tone, then the port is active.
- If you need two phone ports for your devices but do not want to pay extra, then do not plug the printer into the second phone port. You can use a phone splitter. Plug the phone splitter into the **Phone Line 1** or **Phone Port**, and then plug the printer and telephone into the splitter.

Make sure you use a phone splitter, *not* a line splitter. To make sure that you are using the correct splitter, plug an analog telephone into the splitter and then listen for a dial tone.

Scenario 4: Digital telephone service through a cable provider

Setup 1: Printer is connected directly to a cable modem

Follow this setup if you normally connect your telephone to a cable modem.

To connect:

- 1 Connect one end of a telephone cable to the  port of the printer.
- 2 Connect the other end of the cable to the port labeled **Phone Line 1** or **Phone Port** on the cable modem.
The port labeled **Phone Line 2** or **Fax Port** is not always active. You may need to pay extra to your cable provider if you want to activate the second phone port.
- 3 Remove the protective plug from the  port of the printer, and then connect the telephone to the port.

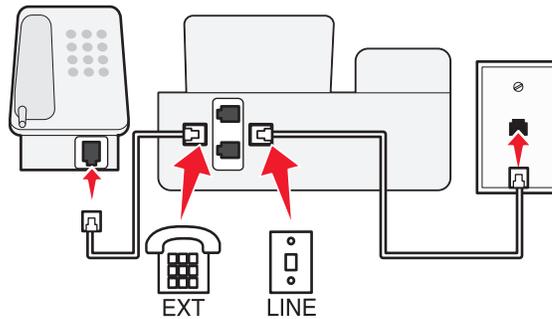

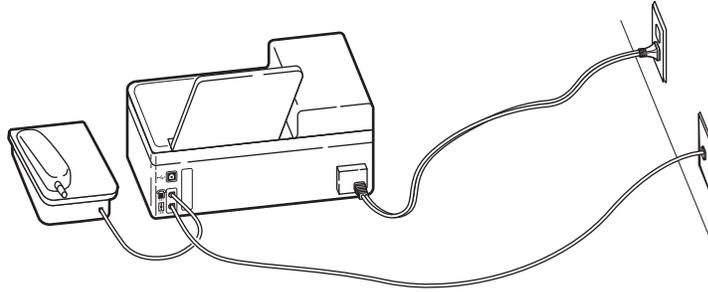

Tips for this setup:

- To make sure that the phone port on the cable modem is active, plug an analog telephone into the phone port, and then listen for a dial tone. If you hear a dial tone, then the port is active.
- If you need two phone ports for your devices but do not want to pay extra, then do not plug the printer into the second phone port. You can use a phone splitter. Plug the phone splitter into the **Phone Line 1** or **Phone Port**, and then plug the printer and telephone into the splitter.

Make sure you use a phone splitter, *not* a line splitter. To make sure that you are using the correct splitter, plug an analog telephone into the splitter and then listen for a dial tone.

Setup 2: Printer is connected to a wall jack; cable modem is installed elsewhere in the house

Follow this setup if your cable provider activated the wall jacks in your house so that you do not have to plug your devices into the cable modem. Your cable telephone service comes from the wall jacks.

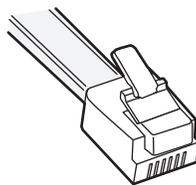

To connect:

- 1 Connect the cable from the wall jack to the  port of the printer.
- 2 Remove the protective plug from the  port of the printer, and then connect the telephone to the port.

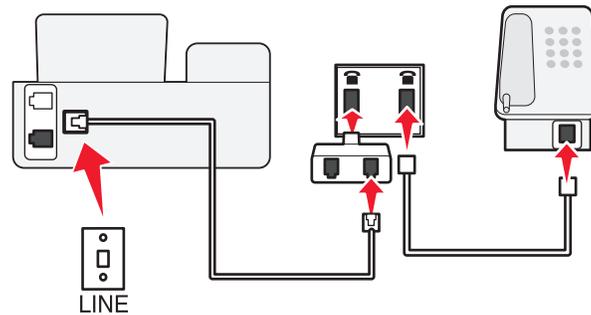

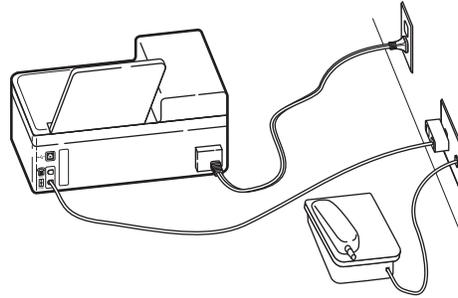

Scenario 5: Country-specific setup

Different countries have different types of telephone wall jacks. The most common wall jack is the Registered Jack-11 (RJ-11), the standard adopted by most countries. You need to have an RJ-11 plug, or a telephone cable that has an RJ-11 connector, so you can connect a device to an RJ-11 wall jack.

The fax ports on the back of the printer and the telephone cable that comes with the printer have RJ-11 connectors. If you have a different type of connector in your country or region, then you may need to use an RJ-11 adapter.

Connecting the printer to a non-RJ-11 wall jack

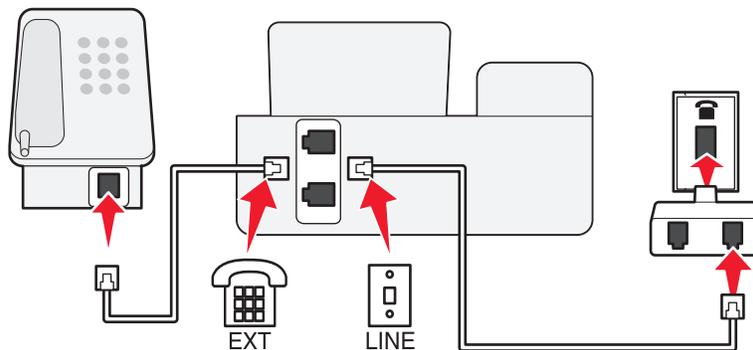

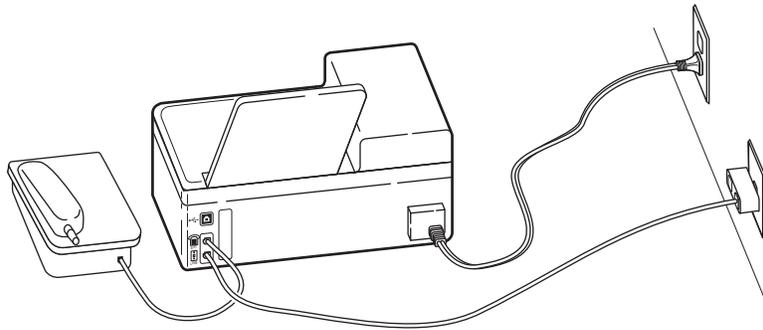

To connect:

- 1 Connect one end of a telephone cable to the  port of the printer.
- 2 Connect the other end of the cable to the RJ-11 adapter, and then connect the adapter to the wall jack.
- 3 If you want to connect another device (telephone or answering machine) to the same wall jack, and if the device has a non-RJ 11 connector, then connect it directly to the wall jack.

Notes:

- Do *not* remove the wrap plug from the  port of the printer.
- The printer may not come with an RJ-11 adapter in your country or region.

If the additional device (telephone or answering machine) has an RJ-11 connector, then you can remove the wrap plug and connect the device to the ☎ port of the printer.

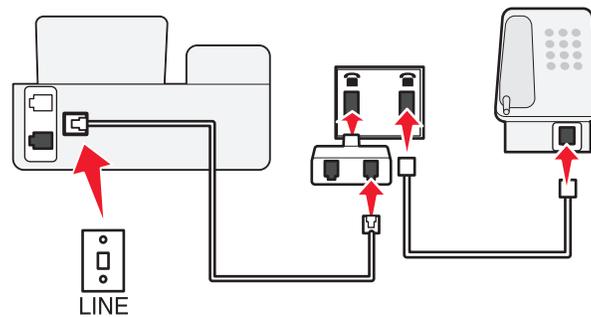

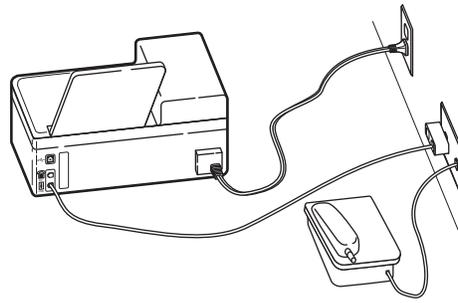

Connecting the printer in countries that use serial connection

In some countries or regions, you need to plug all devices into the wall jack. You cannot plug a telephone or answering machine into the ☎ port of the printer. This is called *serial connection*.

Austria	Germany	Portugal
Belgium	Ireland	Spain
Denmark	Italy	Sweden
France	Netherlands	Switzerland
Finland	Norway	United Kingdom

Warning—Potential Damage: If your country is on the list, then do *not* remove the wrap plug from the ☎ port of the printer. It is necessary for the proper functioning of the devices on the telephone line.

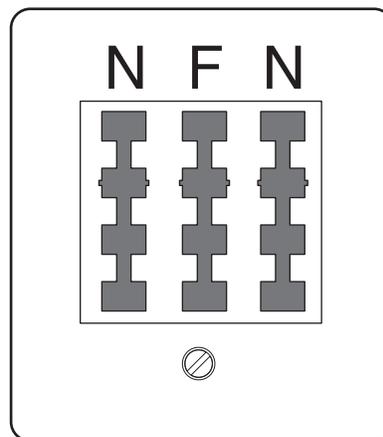

To connect:

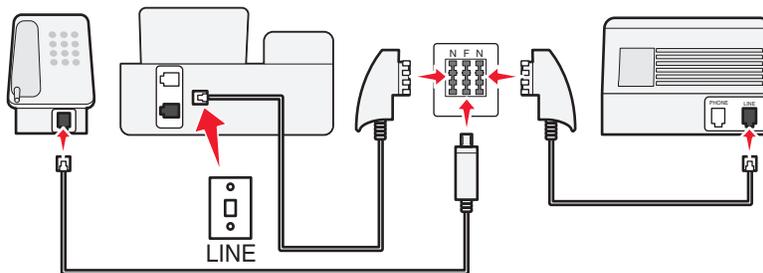

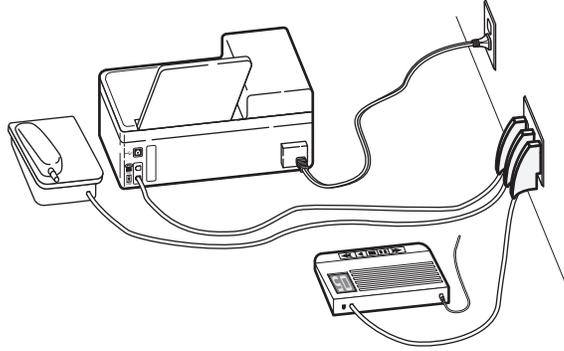

Connect the cable from the wall jack to the  port of the printer.

Connecting the printer to a wall jack in Germany

The German wall jack has two kinds of ports. The N ports are for fax machines, modems, and answering machines. The F port is for telephones.

Connect the printer to any of the N ports.

To connect:

- 1 Connect one end of a telephone cable to the  port of the printer.
- 2 Connect the other end of the cable to the RJ-11 adapter, and then connect the adapter to an N port.
- 3 If you want to connect a telephone and answering machine to the same wall jack, then connect the devices as shown.

Entering your user information

Your user information includes your name or your company name, your fax number (your fax number is your telephone number, unless you have a dedicated fax telephone line), and the time and date on your fax machine when a transmission is made. This information appears in the header and footer of the faxes that you send.

In some countries, you cannot send a fax without this information. Some fax machines also block faxes without sender information, so make sure that you enter this information in your printer.

Setting the fax header

- 1 From the home screen, navigate to **Your Fax Name**:
 > **Fax Setup** > **Dialing and Sending** > **Your Fax Name**
- 2 Enter your name or your company name, and then touch **OK**.
- 3 Touch **Your Fax Number**.
- 4 Enter your fax number or your telephone number, and then touch **Accept**.

Setting the fax footer

1 From the home screen, navigate to **Fax Footer**:

 > **Fax Setup** > **Fax Printing** > **Fax Footer**

2 Touch **ON**, and then touch **Accept**.

Configuring the fax settings

You can configure the fax settings through the printer control panel or the fax software. If you configure the fax settings in the printer control panel, then the fax software imports those settings. The changes appear the next time you launch the fax software. The printer also saves the settings that you choose in the fax software, unless you set the printer to block changes made from the computer.

Configuring fax settings using the fax software

Before opening the fax software to configure the fax settings, make sure that:

- The printer is properly connected to the telephone line.
- The printer is turned on and connected to the computer.
- The printer is not in Power Saver mode. If the printer is in Power Saver mode, then press  to wake up the printer.

Using the Fax Setup Wizard in Windows

1 Click  or **Start**.

2 Click **All Programs** or **Programs**, and then select the printer program folder from the list.

3 Click **Printer Home**.

4 Click the **Fax** tab, and then click **Set up the printer to fax**.

The Fax Setup Wizard opens.

5 Run the Fax Setup Wizard. Make sure you select the correct telephone service and connection. The wizard configures optimal fax settings based on your connection.

Note: If you want to configure the advanced fax settings, then click **Configure the advanced fax settings** in the Fax tab of the Printer Home. This launches the Printer Setup Utility.

Using the Fax Setup Utility in Macintosh

1 From the Finder desktop, double-click the printer folder.

2 Double-click the Fax Setup Utility for your printer.

3 Configure the fax settings using the software.

For more information, click **Help** or  to view the help information for the fax software.

Configuring fax settings using the printer control panel

1 From the home screen, navigate to **Fax Setup**:

 > **Fax Setup**

2 Configure the fax settings using the selections in the menu:

From here	You can
Reports	<ul style="list-style-type: none"> • Print confirmation pages or transmission reports. These reports let you know if the faxes that you send are sent successfully. • View the fax history on the screen. • Print activity logs. Activity logs let you view the sent and received fax history of your printer.
Ringing and Answering	<ul style="list-style-type: none"> • Set the printer to receive faxes automatically or manually. Turn Auto Answer to On or Off. • Adjust the ringing volume. • Set the number of rings. This is important if you choose to receive faxes automatically (Auto Answer On). • Set the distinctive ring. If you subscribe to the distinctive ring feature on your telephone line, then set the correct pattern for the printer in this menu. • Enable fax forwarding. • Set a manual answer code. This is the code you press to receive faxes manually.
Fax Printing	Set the printer to print incoming faxes to fit a page, print the fax footer, or print on both sides of the paper (duplexing).
Dialing and Sending	<ul style="list-style-type: none"> • Set your fax name and fax number. • Adjust the dialing volume. • Set the dial method, redial time, number of redial attempts, dialing prefix, and fax sending speed. • Convert sent faxes into modes that receiving fax machines recognize. Otherwise, such faxes are aborted. • Enable error correction during transmission. • Set whether the printer scans the original document before or after dialing the recipient. <p>Set the printer to scan before dialing so that you do not have to scan the document again if the fax fails. The scanned document is saved in the printer memory. The printer can then retrieve it and automatically redial the number.</p> <p>If you set the printer to scan after dialing, then the printer does not automatically redial, even when the phone line is busy.</p>
Fax Blocking	Block unwanted incoming faxes.

Creating a contact list

You can create a contact list using the Address Book in the printer control panel or the phone book in the fax software. If you create a contact list in the printer control panel, then the fax software automatically saves those contacts as Phonebook entries. Likewise, when you add contacts to the fax software, the printer automatically saves them to the printer Address Book.

You can save up to 89 contacts and 10 fax groups in the contact list.

Creating a contact list using the fax software

For Windows users

- 1 Click  or **Start**.
- 2 Click **All Programs** or **Programs**, and then select the printer program folder from the list.
- 3 Click **Printer Home**.
- 4 Click the **Fax** tab, and then click **Edit contact list**.
The Contacts tab of the Printer Setup Utility opens.
- 5 Click **Select from phonebook**.
- 6 From the Phonebook field, choose a phone book.
- 7 Select the contact that you want to add, and then click **Add to or change list** to import the contact.

Note: To add contacts, you need to import contacts from the phone books on your computer that are supported by the fax software. In addition to the software Address Book, you may also have phone books of the mail clients installed on your computer, such as Microsoft Outlook.

- 8 Click **OK**.

For Macintosh users

- 1 From the Finder desktop, double-click the printer folder.
- 2 Double-click the AIO Setup Utility for your printer.
- 3 Click the **Contacts** tab.
 - To add contacts, click the **Individuals** tab.
 - To add fax groups, click the **Groups** tab.
- 4 Click  to open the Address Book.

Note: To add contacts, you need to import contacts from the Address Book on your Macintosh computer. If the contact is not in the Mac Address Book, then first add the contact to the address book, and then import it.

- 5 From the Address Book, click and drag the contacts that you want to add to the Contacts list.

For more information, click **Help** or  to view the help information for the fax software.

Creating a contact list using the printer control panel

1 From the home screen, navigate to **Address Book**:

 > **Address Book**

2 To add a contact:

a Navigate to **Add Contact Name**:

Add a Contact > Add Contact Name

b Enter the contact name, and then touch **OK**.

c Touch **Add Fax Number**.

d Enter the fax number of the contact, and then touch **Accept**.

e Touch **Accept** again.

f If you want to add another entry, then repeat steps a through e. You can enter up to 89 contacts.

3 To add a fax group:

a Navigate to **Add Group Name**:

Add a Group > Add Group Name

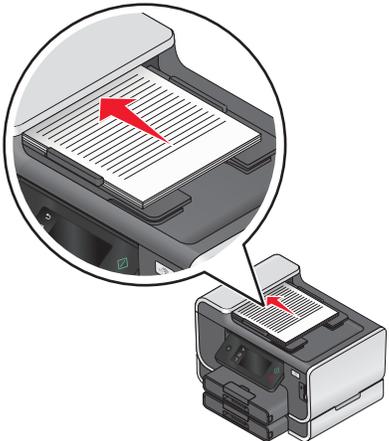

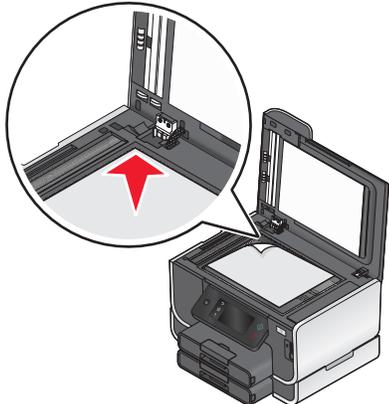

b Enter a group name, and then touch **OK**.

c Touch **Add Group Member**, and then select whether you want to add a contact manually or import a contact:

- **Address Book**—Import a contact from the Address Book.
- **History**—Import a contact from the fax history.
- **New Entry**—Add a new contact.

d Touch **Accept** to save the entry every time you import a contact or add a contact.

Sending faxes

ADF	Scanner glass
 <p>Use the ADF for multiple-page documents.</p> <p>Note: The ADF is available only on selected models. If you purchased a printer without an ADF, load original documents or photos on the scanner glass.</p>	 <p>Use the scanner glass for single pages, small items (such as postcards or photos), transparencies, photo paper, or thin media (such as magazine clippings).</p>

Tips for sending faxes

Before you send a fax:

- Make sure that the printer is on and connected to a working telephone, DSL, or VoIP line. The line is working if you hear a dial tone.
- Load an original document faceup into the ADF or facedown on the scanner glass.
- When using the ADF, adjust the paper guide on the ADF to the width of the original document.
- When using the scanner glass, close the scanner lid to avoid dark edges on the scanned image.

Sending faxes using the printer control panel

1 From the home screen, touch **Fax**.

2 Send the fax:

To send a fax to a single recipient:

- a Enter a fax number, or touch **Address Book** or **History** to import a contact.
- b Touch  to start the fax job.

To send a fax to multiple recipients (broadcast fax):

- a Touch **Fax To Multiple**, and then touch **Add a Number**.
- b Enter a fax number, or touch **Address Book** or **History** to import a contact. Repeat this step until you have entered the numbers of all the recipients.
Touch **Accept** every time you add a recipient.
- c Touch  to start the fax job.

Warning—Potential Damage: Do not touch the cables or the  and  ports while actively sending a fax.

Tip:

- You can send a broadcast fax to up to 30 recipients.
- Touch **More Options** to set a color or black-and-white fax, adjust the quality of the fax, set the size of the document, add a cover page, schedule the fax, or view pending faxes.

Sending faxes using the computer

For Windows users

- 1 With a document open, click **File → Print**.
- 2 From the Printer Name menu, select the fax version of your printer, and then click **OK**.
The Send Fax Wizard appears.
- 3 Follow the instructions on the computer screen.

For Macintosh users

1 With a document open, choose **File > Print**.

2 From the Printer pop-up menu, select the fax version of your printer.

Note: In order to see the fax options on the Print dialog, you must use the fax driver for your printer. If the fax version of the printer is not on the list, choose **Add a printer**, and then choose the fax version of the printer.

3 Enter the name and number of the recipient.

4 Click **Fax**.

Receiving faxes

Tips for receiving faxes

When receiving faxes:

- Make sure that the printer is on and connected to a working telephone, DSL, or VoIP line. The line is working if you hear a dial tone.
- If you set the printer to receive faxes manually (Auto Answer Off), then make sure that the ringer volume is not set to Off.
- If you have set the printer to receive faxes automatically (Auto Answer On), then load paper in the printer.

Receiving faxes automatically

1 Make sure that Auto Answer is on:

a From the home screen, navigate to **Auto Answer**:

 > **Fax Setup > Ringing and Answering > Auto Answer**

b If Auto Answer is not set to On, touch **ON**, and then touch **Accept**.

2 Set the number of rings before the printer picks up incoming faxes:

a Touch **Pick Up On**.

b Set the number of rings, and then touch **Accept** to save the setting.

When the number of rings you set is detected, the printer automatically receives the incoming fax.

Warning—Potential Damage: Do not touch the cables or the  and  ports while actively receiving a fax.

Tips:

- If the printer is sharing the line with other analog devices (telephone, answering machine), then set the printer to pick up calls two rings after the answering machine. For example, if the answering machine picks up calls after four rings, then set the printer to pick up after six rings. This way, the answering machine picks up calls first and your voice calls are received. If the call is a fax, then the printer detects the fax signal on the line and takes over the call. If the printer is on a dedicated fax line, then you may set the printer to pick up on any number of rings.
- If you have multiple numbers on a single line, or if you subscribe to a distinctive ring service provided by your telephone company, then make sure that you set the correct ring pattern for the printer. Otherwise, the printer will not receive faxes even if you have set it to receive faxes automatically.

Receiving a fax manually

- 1 Turn off Auto Answer:
 - a From the home screen, navigate to **Auto Answer**:
🔑 > **Fax Setup** > **Ring and Answering** > **Auto Answer**
 - b Touch **OFF**, and then touch **Accept**.
- 2 When the telephone rings and you hear fax tones when you pick up the handset, press  on the printer or ***9*** on the telephone attached to the printer.

Warning—Potential Damage: Do not touch the cables or the  and  ports while actively receiving a fax.

Tips:

- The default code for answering faxes manually is *9*, but for increased security, you can change it to a number that only you know. You can enter up to 7 characters for your code. The valid characters are the digits 0-9 and the characters # and *.
- Make sure that the telephone is plugged into the  port on the back of the printer and that the printer is connected to the wall jack through the  port.

Faxing FAQ

If I skipped the fax setup initially, do I need to run the installer again to set up the fax?

You do not need to run the installer again. You can set up and configure the fax through the fax software that was installed with the printer software.

To set up the fax:

- 1 Connect the printer to the telephone line. For more information, see “Setting up the printer to fax” on page 77.
- 2 Configure the fax settings using the fax software. To access the fax software:

For Windows users

- a Click  or **Start**.
- b Click **All Programs** or **Programs**, and then select the printer program folder from the list.
- c Click **Printer Home**.
The Printer Home opens.
- d Click the **Fax** tab, and then click **Set up the printer to fax**.
The Fax Setup Wizard opens.
- e Run the wizard. Make sure you select the correct telephone service and connection. The wizard configures optimal fax settings based on your connection.

For Macintosh users

- a From the Finder desktop, double-click the printer folder.
- b Double-click the AIO Setup Utility for your printer.

- c Configure the fax settings.

What is a splitter and what type of splitter should I use?

If there are limited wall jacks in your home or limited ports on your adapter, then you can use a phone splitter. A splitter splits the telephone signal and allows you to connect multiple devices to the wall jack. It has two or more ports where you can plug the devices. Do *not* use a line splitter.

To make sure that you are using the correct splitter, plug an analog telephone into the splitter and then listen for a dial tone.

What is my fax number?

In most cases, your telephone number is also your fax number. If you subscribe to the Distinctive Ring Pattern Detection (DRPD) service offered by telephone companies, then your fax number is the number that you assigned to the printer. Make sure that you enter the correct distinctive ring pattern for that number in the fax software or in the Fax Setup menu of the printer control panel.

If you have more than one telephone line, then make sure that you enter the number for the line on which the printer is connected.

What is my dialing prefix?

The dialing prefix is the number or series of numbers that you press before you can dial the actual fax number or telephone number. If the printer is an office setting or in a private branch exchange, this can be a specific number that you need to press so you can make a call outside the office. This can also be a country code or an area code that you need to enter if you are sending faxes outside of town. This can be very useful if you frequently send faxes to the same country or area. When you set the dialing prefix in the utility, you do not need to press the number or series of numbers every time you dial the fax number or telephone number. The printer automatically inputs the prefix every time you dial.

You can enter up to 8 characters as your dialing prefix. The valid characters are the numbers 0-9 and the characters # and *. If you are using the fax software to enter the dial prefix, then you may also include the characters period, comma, star, pound, plus, minus, and parenthesis.

When do I need to set Auto Answer to On?

Set Auto Answer to On if you want the printer to receive faxes automatically.

If the printer is connected to the same telephone line with an answering machine, then you must set Auto Answer to On so that you can receive both your voice calls and your faxes. Make sure that the answering machine is set to pick up on fewer rings than the rings set in the printer. This lets the other devices pick up the voice calls first. If an incoming call is a fax, the printer can detect fax signals on the line and takes the call.

How many rings should I set?

If the printer is sharing a line with an answering machine, then set the printer to pick up on the greater number of rings. Because you have only one line, there is no way of distinguishing a voice call from an incoming fax. You can set the number of rings so that the answering machine takes the voice calls and the printer takes the incoming faxes. If you set the other devices to pick up on fewer rings, then the devices pick up calls first, and your voice calls are received. If a call is a fax, then the printer can detect it and will take over the call.

If the printer is on a dedicated fax line, then you may set the printer to pick up on any number of rings that you want.

How do I set the distinctive ring for the printer?

Setting the correct ring is important if you subscribe to the Distinctive Ring Pattern Detection (DRPD) feature offered by telephone companies. This feature allows you to have multiple telephone numbers on one telephone line. Each telephone number has a designated ring pattern (a single ring, a double ring, a triple ring). The different ring patterns let you know what telephone number was dialed, and what device you should use to answer the call.

Assign one of your telephone numbers to the printer as the fax number, and then set the printer to answer the ring pattern of that number. If the pattern is set incorrectly, then the printer rings, but it never receives the fax.

To set the ring pattern in the printer:

- 1 From the home screen, navigate to **Ring Pattern**:

 > **Fax Setup** > **Ring and Answering** > **Ring Pattern**

- 2 Touch the correct ring pattern for the printer, and then touch **Accept**.

Distinctive Ring is also called Ident-a-Call, Smart Ring, Teen Ring, RingMaster, and Identaring.

How can I check the dial tone?

A dial tone lets you know if the telephone line is working or if the printer is properly connected to the telephone line. If you encounter problems sending and receiving faxes, then make sure you can hear a dial tone on the line and through the printer.

Make sure the telephone line and the wall jack are working

- 1 Plug an analog telephone into the wall jack.
- 2 Listen for a dial tone through the telephone handset.

If you hear a dial tone, then the telephone line and the wall jack are working.

If you do not hear a dial tone, plug the analog telephone into a second wall jack, and then listen for a dial tone.

If you hear a dial tone, then the telephone line is working but the first wall jack is not working.

Make sure the printer is connected properly to the telephone line

- 1 While the printer is connected to a telephone line through the  port on the back of the printer, plug an analog telephone into the  port of the printer.
- 2 Listen for a dial tone.

If you hear a dial tone, then the telephone line is working and properly connected to the printer.

If you do not hear a dial tone through both the wall jack and the printer, then see the “Fax troubleshooting checklist” on page 150.

How do I adjust the speaker volume on the printer?

Listen to the dial tone to check if the telephone line is working and to check if the cables and devices are connected properly in your telephone network. Make sure that the dialing volume is not set to Off, especially if you are dialing a number on hook. If you set the printer to receive faxes manually, then make sure that you set the ringer volume loud enough for you to hear it.

Adjusting the dialing volume

- 1 From the home screen, navigate to **Dial Volume**:
 > **Fax Setup** > **Dialing and Sending** > **Dial Volume**
- 2 Select a dial volume setting, and then touch **Accept**.

Adjusting the ringer volume

- 1 From the home screen, navigate to **Ringer Volume**:
 > **Fax Setup** > **Ringing and Answering** > **Ringer Volume**
- 2 Select a ringer volume setting, and then touch **Accept**.

How can I make sure that fax calls go to the printer and voice calls go to the answering machine?

To make sure the printer picks up incoming faxes, set Auto Answer to On, and then set the printer to pick up after a greater number of rings than the answering machine. For example, if the answering machine picks up calls after four rings, then set the printer to pick up after six rings. This way, the answering machine picks up calls first and your voice calls are received. If the call is a fax, then the printer detects the fax signal on the line and takes over the call.

What settings work best with digital voice mail?

Voice mail and fax can share the same telephone line if you subscribe to a distinctive ring service. This feature allows you to have multiple telephone numbers on one telephone line. Each telephone number has a designated ring pattern (a single ring, a double ring, a triple ring). The different ring patterns let you know which telephone number was dialed, and which device you should use to answer the call.

If you do not have distinctive ring service, then set the printer to receive faxes manually (Auto Answer Off). This setting lets you receive both voice calls and fax calls, but works best if you use voice mail more often. You need to turn off voice mail whenever you are expecting a fax.

How do I change the resolution of the documents that I fax?

The resolution, or fax quality, of the documents that you send may affect fax transmission. The receiving fax machine may not support high resolutions and may not be able to receive your fax. You can fix this by enabling Auto Fax Conversion, but the automatic conversion may result in an unreadable fax, especially if the original document is already blurred.

Choose a fax quality that best suits the capacity of the receiving fax machine and the quality of the original document.

Quality	Black resolution	Color resolution
Standard	200 x 100	200 x 200
Fine	200 x 200	200 x 200
Superfine	300 x 300	200 x 200
Ultrafine	300 x 300 (half-toned)	200 x 200

To set the quality of the fax:

1 From the home screen, navigate to fax **Quality**:

Fax > More Options > Quality

2 Select a resolution, and then touch **Accept**.

How do I send a fax at a scheduled time?

1 From the home screen, touch **Fax**.

2 Enter a fax number, or touch **Address Book** to import a contact.

3 Navigate to **Schedule a Fax**:

More Options > Schedule a Fax

4 Enter the time you want to send the fax, and then touch **Accept**.

5 Touch  to save the scheduled fax.

The printer sends the fax at the designated time. Do *not* turn off the printer or unplug it from the telephone line before the scheduled time.

How do I send a fax using a phone calling card?

1 From the home screen, navigate to **Dialtone**:

Fax > More Options > Dialtone

You should hear the dial tone of the telephone line.

2 Enter the calling card information, and then when you are connected to the telephone carrier, follow the prompts.

3 When prompted, enter the fax number of the recipient, and then touch .

How do I know that the fax was sent successfully?

You can set the printer to print a confirmation page, or transmission report, every time you send a fax. This report includes the date and time that the fax was sent. If the fax job is unsuccessful, then the report also includes the cause of the error.

1 From the home screen, navigate to **Confirmation**:

 > **Fax Setup** > **Reports** > **Confirmation**

2 Select a report printing option:

- If you want to print a report every time you send a fax, then touch **For All**.
- If you want to save on ink and print a report only when a fax job is unsuccessful, then touch **On Error**.

3 Touch **Accept**.

How do I view the fax history of the printer?

You can view the fax history of the printer on the touch screen. You can also print reports of sent and/or received faxes.

To print fax history reports:

1 From the home screen, navigate to **Reports**:

 > **Fax Setup** > **Reports**

2 Select a report printing option:

- **Print Activity Report**—Print sent and received fax history.
- **Print Send Log**—Print sent fax history only.
- **Print Receive Log**—Print received fax history only.

To view the fax history on the screen:

1 From the home screen, navigate to **History on Screen**:

 > **Fax Setup** > **Reports** > **History on Screen**

2 View the fax history.

Note: Touch an entry to redial the number or add the number to the Address Book.

How do I print a fax on both sides of the paper?

1 From the home screen, navigate to **2-Sided Faxes**:

 > **Fax Setup** > **Fax Printing** > **2-Sided Faxes**

2 Select a duplex setting:

- **Use Button Setting**—Incoming faxes are printed on both sides of the paper if the 2-Sided icon on the home screen is set to On.
- **Always**—Incoming faxes are printed on both sides of the paper regardless of the 2-Sided icon setting.

3 Touch **Accept**.

How do I forward a fax?

- 1 From the home screen, navigate to **Fax Forward**:
 > **Fax Setup** > **Ringing and Answering** > **Fax Forward**
- 2 Select **Forward** or **Print & Forward**, and then touch **Accept**.
- 3 Enter the number to which you want to forward the fax, and then touch **Accept**.

When you enable this option, all the faxes that you receive are automatically forwarded until you disable it.

To disable fax forwarding, return to the Fax Forward menu, and then select **OFF**.

Can I block faxes?

You can block faxes from specific numbers. You can also block junk faxes and faxes from unidentified senders (senders without a Caller ID). This feature is helpful if you want to receive faxes automatically but want to filter the faxes that you receive.

- 1 Turn on fax blocking:
 - a From the home screen, navigate to **Fax Blocking**:
 > **Fax Setup** > **Fax Blocking**
 - b Touch **Turn On/Off**.
 - c Touch **ON**, and then touch **Accept**.
- 2 Add a number to block:
 - a Navigate to **Add a Name**:
Block Faxes From > **Add a Number to Block** > **Add a Name**
 - b Enter the contact name, and then touch **OK**.
 - c Touch **Add a Fax Number**.
 - d Enter the fax number of the contact, and then touch **Accept**.
 - e Touch **Accept** again.

You can block up to 50 numbers.

- 3 Block unidentified faxes (faxes without a Caller ID number):
 - a Touch .
 - b Touch **Block No ID**.
 - c Touch **ON**, and then touch **Accept**.

Can I retrieve failed faxes?

The printer saves an incoming fax to the printer memory before it prints the fax. If the printer runs out of ink or runs out of paper, then you can print the fax later after resolving the error. The printer prompts you if there are faxes to be printed.

If an incoming fax or an outgoing fax fails due to power loss, then the printer automatically prints an error report the next time it is turned on. For incoming faxes, the error report lets you know who sent the fax and how many pages were not printed. For outgoing faxes, it lets you know how many pages were not sent. Faxes lost due to power loss are not retrievable.

Networking

Installing the printer on a wireless network

Wireless network compatibility

Your printer contains an IEEE 802.11n wireless print server. Your printer is compatible with IEEE 802.11 b/g/n routers that are Wi-Fi certified.

Supported network security options

The printer supports three wireless security options: no security, WEP, and WPA/WPA2.

No Security

It is not recommended to use no security at all on a home wireless network. Using no security means that anyone within range of your wireless network can use your network resources—including Internet access, if your wireless network is connected to the Internet. The range of your wireless network may extend far beyond the walls of your home, allowing access to your network from the street or from your neighbors' homes.

WEP

WEP (Wired Equivalent Privacy) is the most basic and the weakest type of wireless security. WEP security relies on a series of characters called the WEP key.

Every device on the wireless network must use the same WEP key. WEP security can be used on both ad hoc and infrastructure networks.

A valid WEP key has:

- Exactly 10 or 26 hexadecimal characters. Hexadecimal characters are A–F, a–f, and 0–9
- or*
- Exactly 5 or 13 ASCII characters. ASCII characters are letters, numbers, punctuation, and symbols found on a keyboard.

WPA/WPA2

WPA (Wi-Fi Protected Access) and WPA2 (Wi-Fi Protected Access 2) offer stronger wireless network security than WEP. WPA and WPA2 are similar types of security. WPA2 uses a more complex encryption method and is more secure than WPA. Both WPA and WPA2 use a series of characters, called the WPA pre-shared key or passphrase, to protect wireless networks from unauthorized access.

A valid WPA passphrase has:

- From 8 to 63 ASCII characters. ASCII characters in a WPA passphrase are case-sensitive.
- or*
- Exactly 64 hexadecimal characters. Hexadecimal characters are A–F, a–f, and 0–9.

Every device on the wireless network must use the same WPA passphrase. WPA security is an option only on infrastructure networks with wireless access points and network cards that support WPA. Most newer wireless network equipment also offers WPA2 security as an option.

Note: If your network uses WPA or WPA2 security, then select **WPA Personal** when you are prompted to select the type of security your network uses.

Printing a network setup page

A *network setup page* lists the configuration settings of the printer, including the IP address and MAC address of the printer.

- 1 Load plain paper.
- 2 From the home screen, navigate to **Print Setup Page**:

 > **Network Setup** > **Print Setup Page**

The network setup page prints.

Information you will need to set up the printer on a wireless network

To set up the printer for wireless printing, you need to know:

- The name of your wireless network. This is also known as the *Service Set Identifier (SSID)*.
- If encryption was used to secure your network.
- The security key (either a WEP key or WPA passphrase) that allows other devices to communicate on the network if encryption was used to secure your network.

You can locate your network WEP key or WPA passphrase by accessing your wireless access point or router and checking the security information.

If your wireless access point (wireless router) is using *Wired Equivalent Privacy (WEP)* security, the WEP key should be:

- Exactly 10 or 26 hexadecimal characters. Hexadecimal characters are A–F, a–f, and 0–9.
- or
- Exactly 5 or 13 ASCII characters. ASCII characters are letters, numbers, punctuation, and symbols found on a keyboard.

If your wireless access point is using *Wi-Fi Protected Access (WPA)* security, the WPA passphrase should be:

- From 8 to 63 ASCII characters. ASCII characters in a WPA passphrase are case-sensitive.
- or
- Exactly 64 hexadecimal characters. Hexadecimal characters are A–F, a–f, and 0–9.

If your wireless network is not using security, then you will not have a security key.

Note: If you do not know the SSID of the network that your computer is connected to, launch the wireless utility of the computer network adapter and look for the network name. If you cannot find the SSID or the security information for your network, see the documentation that came with the wireless access point, or contact your system support person.

Installing the printer on a wireless network

Before you install the printer on a wireless network, make sure that:

- Your wireless network is set up and working properly.
- The computer you are using is connected to the same wireless network where you want to set up the printer.

For Windows users

1 Close all open software programs.

2 Insert the installation software CD.

If the Welcome screen does not appear after a minute, then launch the CD manually:

a Click , or click **Start** and then click **Run**.

b In the Start Search or Run box, type `D:\setup.exe`, where **D** is the letter of your CD or DVD drive.

3 Follow the instructions on the Welcome screen to set up the printer.

For Macintosh users

1 Close all open software applications.

2 Insert the installation software CD.

If the installation dialog does not appear after a minute, then click the CD icon on the desktop.

3 Double-click **Install**.

4 Follow the instructions on the installation dialog to set up the printer.

Installing the printer on other computers

Once the printer is set up on the wireless network, it can be accessed wirelessly by any other computer on the network. However, you will need to install the printer driver on every computer that will access it. You do not need to configure the printer again, although you will need to run the setup software on each computer to install the driver.

For Windows users

1 Close all open software programs.

2 Insert the installation software CD.

If the Welcome screen does not appear after a minute, then launch the CD manually:

a Click , or click **Start** and then click **Run**.

b In the Start Search or Run box, type `D:\setup.exe`, where **D** is the letter of your CD or DVD drive.

3 Follow the instructions on the computer screen for installing a configured printer on a new computer.

For Macintosh users

1 Close all open software applications.

2 Insert the installation software CD.

If the installation dialog does not appear after a minute, then click the CD icon on the desktop.

3 Double-click **Install**.

4 Select **My printer is already set up. I am installing it on a new computer.**

5 Click **Continue**, and then follow the instructions on the computer screen for installing a configured printer on a new computer.

Interpreting the colors of the Wi-Fi indicator light

The colors of the Wi-Fi indicator light show the network status of the printer.

- **Off** means one of the following:
 - The printer is turned off or is powering up.
 - The printer is not connected to a wireless network and is in Power Saver mode. In Power Saver mode, the power light pulses on and off.
 - The printer is connected to an Ethernet network. Refer to the *Quick Reference Guide* to find out if your printer has Ethernet capability.
- **Solid orange** means one of the following:
 - The printer has not yet been configured for a wireless network.
 - The printer is configured for an ad hoc connection, but it is not currently communicating with another ad hoc device.
- **Blinking orange** means one of the following:
 - The printer is out of the range of the wireless access point (wireless router).
 - The printer is trying to communicate with the wireless access point, but the wireless access point is turned off or not working properly.
 - Either the configured printer or the wireless access point has been turned off and back on, and the printer is trying to establish communications with the network.
 - The wireless settings of the printer may no longer be valid.
- **Green** means that the printer is connected to a wireless network and is ready for use.

Special wireless installation instructions

The following instructions apply to customers outside of North America who are using a wireless broadband box. Some examples of these boxes include LiveBox, AliceBox, N9UF Box, FreeBox, and Club Internet.

Before you begin

- Make sure your box is wireless-enabled and activated to work on a wireless network. For more information about configuring the box to work wirelessly, see the documentation that came with your box.
- Make sure your box is turned on and that your computer is on and connected to your wireless network.

Adding the printer to your wireless network

1 Set up your printer for wireless networking using the setup instructions provided.

Stop when you are prompted to select a network.

2 If there is an association/registration button on the back of your box, press it before selecting a network.

Note: After pressing the association/registration button, you have five minutes to complete the printer installation.

3 Return to the computer screen.

From the wireless networks list that appears, select your network, and then click **Continue**.

If your wireless network does not appear in the list:

- a Connect to another wireless network.

For Windows users

Click **Unlisted Network**.

For Macintosh users

Select **Other Wireless Network**, and then click **Continue**.

- b Enter the details about your wireless network.

Note: Your WEP, WPA, or WPA2 key may be obtained from the bottom of the box, the user's guide that came with the box, or from the box Web page. If you have already changed the key for your wireless network, use the key you created.

- 4 Follow the instructions on your screen to complete installation.

Assigning a static IP address

The printer will be assigned an IP address automatically through DHCP on most wireless networks.

- 1 Complete the wireless setup, allowing the printer to receive a DHCP address from a DHCP server on the network.
- 2 Print a network setup page to see what IP address is currently assigned to the printer.
- 3 Open a Web browser and then type the printer IP address in the address field. Press **Enter**.

The printer Web page loads.

Note: If you are using a proxy server, then temporarily disable it to load the printer Web page correctly.

- 4 Click the **Configuration** link.
- 5 Click the **TCP/IP** link.
- 6 Click the **Set static IP address** link.
- 7 Type the IP address you want to assign to the printer in the **IP Address** field.
- 8 Click the **Submit** button.

The Submitting selection message appears.

To confirm that the address was successfully assigned, type the static IP address in the Web browser address field and then press **Enter**. The printer Web page loads if the address was successfully assigned.

For more information, contact your system support person.

Changing wireless settings after installation

To change wireless settings on the printer, such as the configured network, the security key, or other settings, do the following:

For Windows users

- 1 Click  or **Start**.
- 2 Click **All Programs** or **Programs**, and then select the printer program folder from the list.
- 3 Select **Printer Home**.
- 4 Click the **Settings** tab.
- 5 Click the **Wireless setup utility** link.
- 6 Follow the instructions on the computer screen to configure the printer for wireless access with the new settings.

For Macintosh users

- 1 From the Finder desktop, double-click the printer folder.
- 2 Double-click **Wireless Setup Assistant**.
- 3 Follow the instructions on the computer screen.

Advanced wireless setup

Creating an ad hoc wireless network

The recommended way to set up your wireless network is to use a wireless access point (wireless router). A network set up this way is called an *infrastructure network*. If you have an infrastructure network, you should configure the printer for use on that network.

Note: The printer can communicate on only one wireless network at a time. Configuring the printer for an ad hoc wireless network will keep it from working on any other wireless network, either ad hoc or infrastructure.

You can set up an ad hoc network if you:

- Do not have an access point or wireless router
- Do not already have a wireless network (but do have a wireless adapter for your computer)
- Want to set up a standalone network between the printer and a computer with a wireless network adapter

In Windows Vista or later

- 1 Click .
- 2 Click **Control Panel**.
- 3 Click **Network and Internet**.
- 4 Open the Network and Sharing Center.
- 5 Click **Set up a connection or network** when you are prompted to select a network to connect to.

- 6** Click **Set up a wireless ad-hoc (computer-to-computer) network**, when you are prompted to choose a connection option, and then click **Next**.
 - 7** Follow the instructions for setting up a wireless ad hoc network. As part of the setup:
 - a** Create a network name or SSID for the network between the computer and your printer.
 - b** Write down the name of your network. Be sure to use the exact spelling and capitalization.
 - c** Go to the Security Type list, select **WPA2-Personal** or **WEP**, and then create a WPA passphrase or WEP key.

WPA passphrases must be:

 - From 8 to 63 ASCII characters. ASCII characters in a WPA passphrase are case-sensitive.
or
 - Exactly 64 hexadecimal characters. Hexadecimal characters are A-F, a-f, and 0-9.

WEP keys must be:

 - Exactly 10 or 26 hexadecimal characters. Hexadecimal characters are A-F, a-f, and 0-9.
or
 - Exactly 5 or 13 ASCII characters. ASCII characters are letters, numbers, and symbols found on a keyboard
 - d** Write down the password for your network. Be sure to use the exact spelling and capitalization.

Windows Vista will enable the ad hoc network for you. It will appear in the "Connect to a network" dialog under "Available networks," indicating that the computer is configured for the ad hoc network.
 - 8** Close the Windows Control Panel and any remaining windows.
 - 9** Insert the installation software CD, and follow the directions for wireless installation.

Note: Do not connect the installation or network cables until instructed to do so by the setup software.
 - 10** When the available networks are displayed, provide the network name and the security information you created in step 7. The installer will configure the printer for use with your computer.
 - 11** Store a copy of your network name and security information in a safe place for future reference.
- Note:** You may need to reconnect Windows Vista computers to the ad hoc network after restarting.

In Windows XP

- 1** Click **Start**.
- 2** Click **Control Panel**.
- 3** Click **Network and Internet Connections**.
- 4** Click **Network Connections**.
- 5** Right-click the icon for your wireless network connection.
- 6** Click **Enable**, if it appears in the pop-up menu.

Note: If Disable appears, your wireless connection is already enabled.
- 7** Right-click the **Wireless Network Connection** icon.
- 8** Click **Properties**.

9 Click the **Wireless Networks** tab.

Note: If the Wireless Networks tab does not appear, your computer has third-party software that controls your wireless settings. You must use that software to set up the ad hoc wireless network. For more information, see the documentation for the third-party software to learn how to create an ad hoc network.

10 Select the **Use Windows to configure my wireless network settings** check box.

11 Under Preferred Networks, delete any existing networks.

a Select the network to be removed.

b Click **Remove** to delete the network from the list.

12 Click **Add** to create an ad hoc network.

13 In the Network Name (SSID) box, type the name you want to give your wireless network.

14 Write down the network name you chose so you can refer to it when running the wireless setup. Be sure to use the exact spelling and capitalization.

15 If Network Authentication appears in the list, select **Open**.

16 In the "Data encryption" list, select **WEP**.

17 If necessary, clear the "The key is provided for me automatically" check box.

18 In the Network Key box, type in a WEP key.

19 Write down the WEP key you chose so you can refer to it when running the wireless setup. Make sure you copy it down exactly, including any capital letters.

20 In the "Confirm network key" box, type the same WEP key.

21 Select **This is a computer-to-computer (ad hoc) network; wireless access points are not used**.

22 Click **OK** twice to close the two open windows.

23 It may take a few minutes for your computer to recognize the new settings. To check on the status of your network:

a Right-click the **Wireless Network Connections** icon.

b Select **View Available Wireless Networks**.

- If the network is listed but the computer is not connected, select the ad hoc network and then click **Connect**.
- If the network does not appear, wait a minute and then click **Refresh network list**.

24 Insert the installation software CD, and follow the directions for wireless installation.

Note: Do not connect the installation or network cables until instructed to do so by the setup software.

25 When the available networks are displayed, provide the network name and the security information you created beginning in step 13. The installer will configure the printer for use with your computer.

26 Store a copy of your network name and security information in a safe place for future reference.

In Windows 2000

- Refer to the documentation that came with your wireless network adapter for information on configuring an ad hoc network with Windows 2000.

For Macintosh users

1 Access the Airport settings:

In Mac OS X version 10.5

- a From the Apple menu, choose **System Preferences**.
- b Click **Network**.
- c Click **AirPort**.

In Mac OS X version 10.4 and earlier

- a From the Finder desktop, choose **Go > Applications**.
- b From the Applications folder, double-click **Internet Connect**.
- c From the toolbar, click **AirPort**.

2 From the Network menu, click **Create Network**.

3 Create a name for the ad hoc network, and then click **OK**.

Note: Store the network name and password in a safe place for future reference.

Adding a printer to an existing ad hoc wireless network

Note: The printer can communicate on only one wireless network at a time. Configuring the printer for an ad hoc wireless network will remove it from any other wireless network, either ad hoc or infrastructure, for which it is configured.

For Windows users

1 Click  or **Start**.

2 Click **All Programs** or **Programs**, and then select the printer program folder from the list.

3 Select **Printer Home**.

4 Click the **Settings** tab.

5 Click **Wireless setup utility** link.

6 Follow the instructions on the computer screen.

Note: Windows Vista computers may need to be reconnected to the ad hoc network after restarting.

For Macintosh users

1 From the Finder desktop, double-click the printer folder.

2 Double-click **Wireless Setup Assistant**.

3 Follow the instructions on the computer screen.

Configuring the printer wirelessly using WPS (Wi-Fi Protected Setup)

Wi-Fi Protected Setup (WPS) is a method of configuring computers and printers on a secure wireless network. WPS is faster than manual configuration, and it reduces typing errors when new devices are added to a wireless network. The SSID and WPA passphrase are automatically detected and configured for you. The printer supports WPS and can be configured for wireless access using WPS. In order to use WPS to configure the printer, the wireless router must also support WPS.

If you want to use WPS to set up your printer, then insert the CD and follow the instructions on the computer screen.

Notes:

- To use WPS to configure the printer wirelessly, all of the devices on your wireless network must support WPS. If any device on your network does not support WPS, then you must type the SSID and security information when prompted.
- If you are using the PIN method to add your printer using WPS, make sure you type all eight digits when you are asked to enter your PIN.

Switching between USB, Ethernet, and wireless connections (Windows only)

You can change the way you access your printer, depending on your needs. The following procedures assume that you have configured your printer for one type of connection and that the printer drivers are installed on the computer. See related topics on troubleshooting specific connection types if you encounter difficulties during configuration.

Note: The printer supports one active local connection (USB) and one active network connection (Ethernet or wireless) at a time. It is not possible to use both Ethernet and wireless at the same time.

Using the printer wirelessly

Select the connection type that describes how you currently access your printer:

If the printer is currently set up locally (using USB connection)

- 1 Click  or **Start**.
- 2 Click **All Programs** or **Programs**, and then select the printer program folder from the list.
- 3 Select **Printer Home**.
- 4 Click the **Settings** tab.
- 5 Click the **Wireless setup utility** link.
- 6 Follow the instructions on the computer screen to set up the printer wirelessly.

Note: There is no need to remove the USB cable connecting the printer to the computer during wireless configuration.

If the printer is currently set up for Ethernet

- 1 Unplug the Ethernet cable from the printer.
- 2 Place the printer close to the computer you want to use to configure the printer for wireless access.
Note: You will need to connect the printer to the computer with a USB cable. Make sure the printer is close enough to the computer for your USB cable to reach both.
- 3 Click  or **Start**.
- 4 Click **All Programs** or **Programs**, and then select the printer program folder from the list.
- 5 Select **Printer Home**.
- 6 Click the **Settings** tab.
- 7 Click the **Wireless setup utility** link.
- 8 Follow the instructions on the computer screen to set up the printer wirelessly.

Using the printer locally (USB)

Select the connection type that describes how you currently access your printer:

If the printer is currently set up for Ethernet

- 1 Attach a USB cable to the computer and to the printer.
- 2 Wait for a moment for Windows to locate the driver and finish setting up the printer.
- 3 Select the USB printer (see “Selecting the printer” on page 112).

If the printer is currently set up for wireless

- 1 Attach a USB cable to the computer and to the printer.
- 2 Wait a moment for Windows to locate the driver and finish setting up the printer.
- 3 Select the USB printer (see “Selecting the printer” on page 112).

Note: You can continue to use the printer through Ethernet or wireless connection.

Using the printer over an Ethernet network

Select the connection type that describes how you currently access your printer:

If the printer is currently set up for wireless

- 1 Plug an Ethernet cable into the printer and into an available port on a switch or wall jack.
- 2 Wait for a minute for the Ethernet network interface to become active and acquire an IP address from the network.
- 3 Select the Network printer (see “Selecting the printer” on page 112).

Note: The wireless interface of the printer is disabled while it is connected to an Ethernet network.

If the printer is currently set up locally (using USB connection)

- 1 Plug an Ethernet cable into the printer and into an available port on a switch or wall jack.
- 2 Insert the software and installation CD into the computer you want to use to configure the printer.

- 3 Follow the instructions on the computer screen for configuring a printer on an Ethernet network.
- 4 Select the Network printer (see “Selecting the printer” on page 112).

Note: You will need a USB cable to complete the configuration.

Selecting the printer

- 1 Click  or **Start**.
- 2 In the Start Search or Run box, type **control printers**.
- 3 Press **Enter**, or click **OK**.
The printer folder opens.
- 4 Right-click the printer you want to use, either Network or USB.
- 5 Select **Set as Default Printer** from the menu.
- 6 Close the Printers or Printers and Faxes window.

Switching between USB, Ethernet, and wireless connections (Macintosh only)

You can change the way you access your printer depending on your needs. The following procedures below assume that you have configured your printer for one type of connection and that the drivers are installed on the computer. See related topics on troubleshooting specific connection types if you encounter difficulties during configuration.

Note: The printer supports one active local connection (USB) and one active network connection (Ethernet or wireless) at a time. It is not possible to use both Ethernet and wireless at the same time.

Using the printer wirelessly

Select the connection type that describes how you currently access your printer:

If the printer is currently set up locally (using USB connection)

- 1 Close all open software applications.
- 2 Insert the installation software CD.
If the installation dialog does not appear after a minute, then click the CD icon on the desktop.
- 3 Double-click the **Lexmark Extras** folder.
- 4 Double-click **Lexmark Setup Assistant**.
- 5 Follow the instructions on the computer screen for configuring the printer wirelessly.

Note: There is no need to remove the USB cable connecting the printer to the computer during wireless configuration.

If the printer is currently set up for Ethernet

- 1 Unplug the Ethernet cable from the printer.
- 2 Place the printer close to the computer you want to use to configure the printer for wireless access.

Note: You will need to connect the printer to the computer with a USB cable. Make sure the printer is close enough to the computer for your USB cable to reach both.

- 3 Close all open software applications.
- 4 Insert the installation software CD.
If the installation dialog does not appear after a minute, then click the CD icon on the desktop.
- 5 Double-click the **Lexmark Extras** folder.
- 6 Double-click **Lexmark Setup Assistant**.
- 7 Follow the instructions on the computer screen for configuring the printer wirelessly.
- 8 A second print queue will be created. Remove the Ethernet queue if you do not want to switch back to accessing the printer over an Ethernet connection.

Using the printer locally (USB)

Select the connection type that describes how you currently access your printer:

If the printer is currently set up for Ethernet

- 1 Attach a USB cable to the computer and to the printer.
- 2 Add the printer (see "Add the printer" on page 114).
- 3 A second print queue will be created. Remove the Ethernet queue if you do not want to switch back to accessing the printer over an Ethernet connection.

If the printer is currently set up for wireless

- 1 Attach a USB cable to the computer and to the printer.
- 2 Add the printer (see "Add the printer" on page 114).
- 3 A second print queue will be created. Remove the wireless queue if you do not want to switch back to accessing the printer over a wireless connection.

Using the printer over an Ethernet network

Select the connection type that describes how you currently access your printer:

If the printer is currently set up for wireless

- 1 Plug an Ethernet cable into the printer and to an available port on a switch or wall jack.
- 2 Wait for a minute for the Ethernet network interface to become active and acquire an IP address from the network.
- 3 Add the printer (see "Add the printer" on page 114).
- 4 A second print queue will be created. Remove the wireless queue if you do not want to switch back to accessing the printer over a wireless network.

If the printer is currently set up locally (using USB connection)

- 1 Plug an Ethernet cable into the printer and to an available port on a switch or wall jack.
- 2 Insert the software and installation CD into the computer you want to use to configure the printer.
- 3 Follow the instructions on the computer screen for configuring a printer on an Ethernet network.

Note: You will need a USB cable to complete the configuration.

Add the printer

In Mac OS X version 10.5

- 1 From the Apple menu, choose **System Preferences**.
- 2 Click **Print & Fax** under the Hardware section.
- 3 Click + .
- 4 Select the printer from the list and click **Add**.

In Mac OS X version 10.4 or earlier

- 1 From the Finder desktop, choose **Go > Utilities**.
- 2 Double-click **Print Center** or **Printer Setup Utility**, depending on the operating system version you are using. The Printer List dialog appears.
- 3 Choose the printer you want to use.
- 4 Click **Add**.
The Printer Browser appears.
- 5 Select your printer.
- 6 Click **Add**.

Sharing a printer in a Windows environment

- 1 Prepare the computers to share the printer:
 - a Make all computers printing to the printer accessible through Network Neighborhood by enabling File and Print Sharing. See the Windows documentation for instructions on enabling File and Print Sharing.
 - b Install the printer software on all computers that will print to the printer.
- 2 Identify the printer:
 - a On the computer that is attached to the printer, do one of the following:
 - 1 Click , or click **Start** and then click **Run**.
 - 2 In the Start Search or Run box, type `control printers`.
 - 3 Press **Enter**, or click **OK**.
The printer folder opens.
 - b Right-click the name of your printer.
 - c Click **Sharing** or **Printer Properties**.
 - d From the Sharing tab, select **Share this printer** or **Shared as**, and then assign a distinctive name.
 - e Click **OK**.
- 3 Locate the printer from the remote computer:

Note: The remote computer is the one that is not attached to the printer.

 - a Do one of the following:
 - 1 Click , or click **Start** and then click **Run**.
 - 2 In the Start Search or Run box, type `control printers`.

- 3** Press **Enter**, or click **OK**.
The printer folder opens.
- b** Right-click the name of your printer.
- c** Click **Properties** or **Printer properties**.
- d** Click the **Ports** tab, and then click **Add Port**.
- e** Select **Local Port**, and then click **New Port**.
- f** Type the **Universal Naming Convention (UNC) Port name**, which consists of the server name and the distinctive printer name that was specified in step 2 on page 114. The name should be in the form `\\server\printer`.
- g** Click **OK**.
- h** Click **Close** on the Printer Ports dialog.
- i** Make sure the new port is selected on the Ports tab, and then click **Apply**.
The new port is listed with the printer name.
- j** Click **OK**.

Sharing a printer in a Macintosh environment

- 1** From the Apple menu, choose **System Preferences**.
- 2** From the menu bar, click **Help → System Preferences Help**.
- 3** In the Search field, type `sharing the printer on a network`, and then press **return**.
- 4** To let other Macintosh computers on the network that use Mac OS X version 10.3 or later use any printer connected to your Macintosh computer, double-click **Sharing your printer with Mac OS X users**.
or
To let Windows computers on the network use any printer connected to your Macintosh computer, double-click **Sharing your printers with Windows users**.
- 5** Follow the instructions on the computer screen.

Note: Windows users should see the Windows documentation for information on adding a network printer connected to a Macintosh computer.

Installing the printer on an Ethernet network

Information you will need to set up the printer on an Ethernet network

To configure your printer for an Ethernet network, organize the following information before you begin:

Note: If your network automatically assigns IP addresses to computers and printers, continue on to installing the printer.

- A valid, unique IP address for the printer to use on the network
- The network gateway

- The network mask
- A nickname for the printer (optional)

Note: A printer nickname can make it easier for you to identify your printer on the network. You can choose to use the default printer nickname, or assign a name that is easier for you to remember.

You will need an Ethernet cable to connect the printer to the network and an available port where the printer can physically connect to the network. Use a new network cable when possible to avoid potential problems caused by a damaged cable.

Installing the printer on an Ethernet network

Before you install the printer on an Ethernet network, make sure that:

- You have completed the initial setup of the printer.
- Your network is set up and working properly.
- Your computer is connected to your network.

For Windows users

- 1 Close all open software programs.
- 2 Insert the installation software CD.

If the Welcome screen does not appear after a minute, do one of the following:

a Click , or click **Start** and then click **Run**.

b In the Start Search or Run box, type `D:\setup.exe`, where **D** is the letter of your CD or DVD drive.

- 3 Follow the instructions on the computer screen to set up the printer, selecting **Ethernet connection** when you are prompted to select a connection type.

For Macintosh users

- 1 Close all open software applications.
- 2 Insert the installation software CD.

If the installation dialog does not appear after a minute, then click the CD icon on the desktop.

- 3 Double-click **Install**.

- 4 Follow the instructions on the computer screen to set up the printer, selecting **Ethernet connection** when you are prompted to select a connection type.

Networking FAQ

What is Wi-Fi Protected Setup?

Wi-Fi Protected Setup (WPS) is a simple and secure configuration that allows you to establish a wireless home network and enable network security without requiring prior knowledge of Wi-Fi technology. It is no longer necessary to configure the network name (SSID) and WEP key or WPA passphrase for network devices.

Note: WPS only supports networks that communicate through wireless access points (wireless routers).

The printer supports the following methods in connecting to a wireless network:

- *Personal Identification Number (PIN)*—A PIN on the printer is entered into the wireless settings of the wireless access point.
- *Push Button Configuration (PBC)*—Buttons on both the printer and the wireless access point are pushed within a given period of time.

Look for any of these identifier marks to check if your wireless access point is WPS certified:

You can find these WPS logos on the side, back, or top of your wireless access point.

For more information on accessing the wireless settings and determining the WPS capability of your wireless access point, see the documentation that came with the wireless access point or contact your system support person.

Where do I find my WEP key or WPA passphrase?

To find the WEP key or WPA passphrase for the wireless network, view the security settings on the access point or wireless router. Most access points have a Web page that can be accessed using a Web browser.

You can also check the manual that came with your access point or router. If your access point or router is using the default settings, you can find the information in the manual. If someone else set up your network for you, that person or company may have included the information in the manual.

If you do not know how to access the Web page, or if you do not have administrator access to the wireless access point on your network, and are unable to locate the information in the manual, contact your system support person.

What is an SSID?

A Service Set Identifier (SSID) is the name that identifies a wireless network. All devices on the network must know the SSID of the wireless network or they will not be able to communicate with each other. Usually, the wireless network broadcasts the SSID to allow wireless devices in the area to connect to it. Sometimes, the SSID is not broadcast for security reasons.

If the SSID of your wireless network is not broadcast, it cannot be detected automatically and will not show up in the list of available wireless networks. You must enter the network information manually in this situation.

An SSID can contain up to 32 alphanumeric characters.

Where do I find my SSID?

You can find the SSID for the wireless network by viewing the settings on the access point or wireless router. Most access points have a built-in Web server that can be accessed using a Web browser.

Many network adapters provide a software application that allows you to view the wireless settings of your computer, including your SSID. Check your computer to see if a program was installed with your network adapter.

If you are unable to locate your SSID using either of these methods, contact your system support person.

What is a network?

A network is a collection of devices such as computers, printers, Ethernet hubs, wireless access points, and routers connected together for communication through cables or through a wireless connection. A network can be wired, wireless, or designed to have both wired and wireless devices.

Devices on a wired network use cables to communicate with each other.

Devices on a wireless network use radio waves instead of cables to communicate with each other. For a device to be able to communicate wirelessly, it must have a wireless network adapter attached or installed that lets it receive and transmit radio waves.

How do I find out what type of security my network is using?

You must know the WEP key or WPA passphrase and the type of security (WEP, WPA, or WPA2) used on the wireless network. To obtain this information, see the documentation that came with your wireless access point (wireless router), see the Web page associated with the wireless access point, or consult your system support person.

Note: The WEP key or WPA passphrase is not the same as the password for the wireless access point. The password allows you to access the wireless access point settings. The WEP key or WPA passphrase allows printers and computers to join your wireless network.

How are home networks configured?

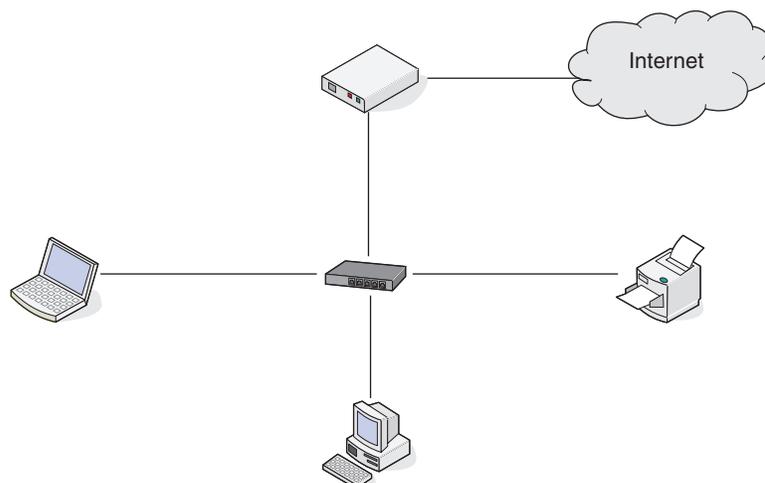

For desktop computers, laptops, and printers to communicate with each other over a network, they must be connected by cables and/or have wireless network adapters built in or installed in them.

There are many different ways a network can be set up. Five common examples appear below.

Note: The printers in the following diagrams represent printers with internal print servers built in to them so that they can communicate over a network.

Wired network example

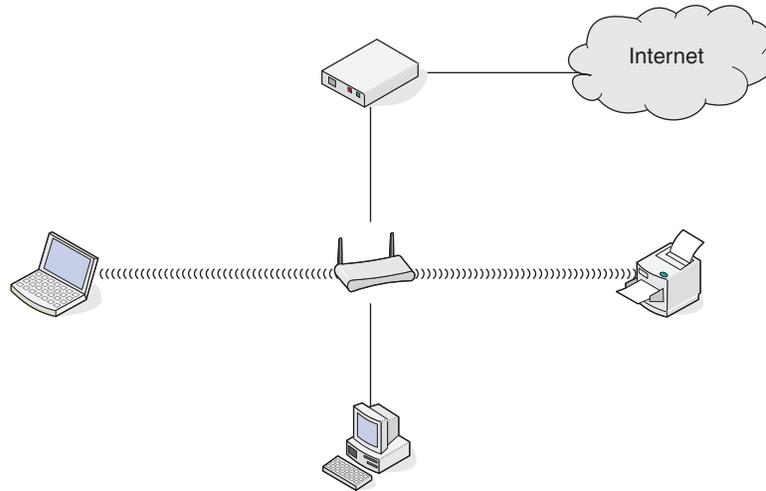

- A desktop computer, a laptop, and a printer are connected by Ethernet cables to a hub, router, or switch.
- The network is connected to the Internet through a DSL or cable modem.

Wireless network examples

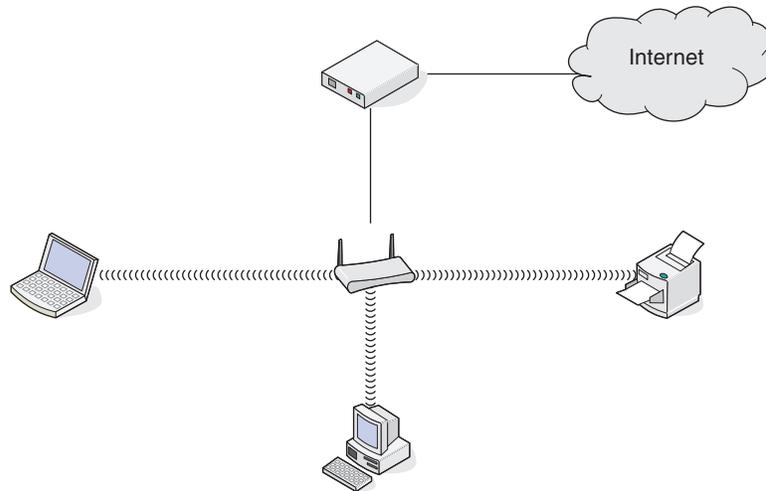

Scenario 1: Mixed wired and wireless connections on a network with Internet access

- All computers and printers connect to the network through a router with Ethernet and wireless capabilities.
- Some computers and printers connect wirelessly to the router; others connect over a wired connection.
- The network is connected to the Internet through a DSL or cable modem.

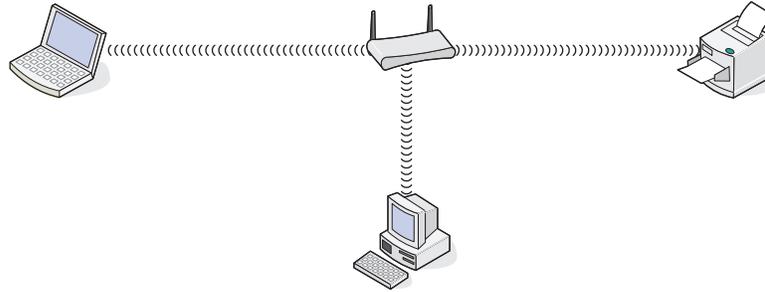

Scenario 2: Wireless network with Internet access

- All computers and printers connect to the network using a wireless access point or wireless router.
- The wireless access point connects the network to the Internet through a DSL or cable modem.

Scenario 3: Wireless network with no Internet access

- Computers and printers connect to the network using a wireless access point.
- The network has no connection to the Internet.

Scenario 4: Computer connected wirelessly to a printer without Internet access

- A computer is directly connected to a printer without going through a wireless router.
- This configuration is referred to as an ad hoc network.
- The network has no connection to the Internet.

Note: Most computers can connect to only one wireless network at a time. If you access the Internet over a wireless connection, you will lose Internet access if you are connect to an ad hoc network.

Why do I need an installation cable?

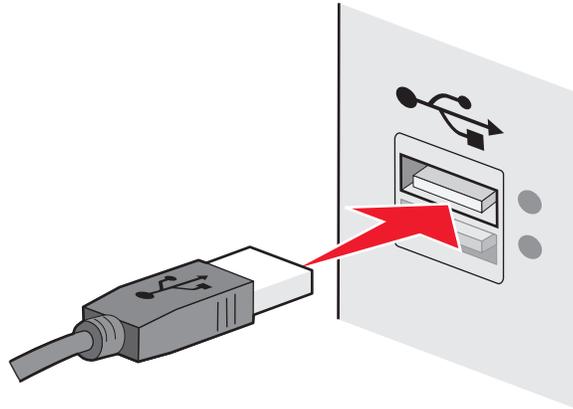

When setting up the printer on your wireless network, the printer will need to temporarily connect to a computer using the installation cable. This temporary connection is used to set up the wireless settings of the printer.

The installation cable connects to a rectangular USB port on the installing computer and the square USB port on the printer.

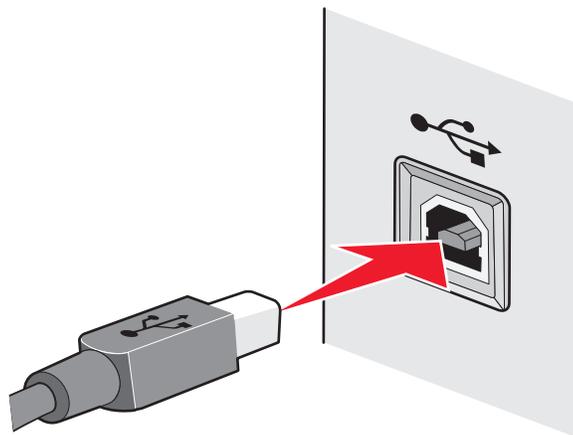

How do I attach the installation cable?

The installation cable attaches to a USB port on the computer and to the square connector on the back of the printer. This connection allows you to configure the printer for a networked or locally attached installation.

- 1 Attach the large, rectangular connector to any USB port on your computer. USB ports may be on the front or the back of the computer, and may be horizontal or vertical.

- 2 Attach the small, square connector to the printer.

- 3 Continue following the on-screen instructions.

How are infrastructure and ad hoc networks different?

Wireless networks can operate in one of two modes: infrastructure or ad hoc.

In *infrastructure* mode, all devices on a wireless network communicate with each other through a wireless router (wireless access point). Devices on the wireless network must have valid IP addresses for the current network and share the same SSID and channel as the wireless access point.

In *ad hoc* mode, a computer with a wireless network adapter communicates directly with a printer equipped with a wireless print server. The computer must have a valid IP address for the current network and be set to ad hoc mode. The wireless print server must be configured to use the same SSID and channel that the computer is using.

The following table compares the characteristics and requirements of the two types of wireless networks.

	Infrastructure	Ad hoc
Characteristics		
Communication	Through wireless access point	Directly between devices
Security	More security options	WEP or no security
Range	Determined by range and number of wireless access points	Restricted to range of individual devices on network
Speed	Usually faster	Usually slower
Requirements for all devices		
Unique IP address for each device	Yes	Yes
Mode set to	Infrastructure mode	Ad hoc mode
Same SSID	Yes, including the wireless access point	Yes
Same channel	Yes, including the wireless access point	Yes

We recommend setting up a network in infrastructure mode using the installation CD that came with the printer.

Infrastructure mode is the recommended setup method because it provides:

- Increased network security
- Increased reliability
- Faster performance
- Easier setup

Finding the signal strength

Wireless devices have built-in antennas that transmit and receive radio signals. The signal strength listed on the printer network setup page indicates how strongly a transmitted signal is being received. Many factors can affect the signal strength. One factor is interference from other wireless devices or other devices such as microwave ovens. Another factor is distance. The farther two wireless devices are from each other, the more likely it is that the communication signal will be weaker.

The strength of the signal received by your computer can also affect the connectivity of the printer with the network during configuration. When you installed the wireless adapter in your computer, the adapter software probably placed an icon in your system tray. Try double-clicking this icon, and it will tell you how strongly the computer is receiving the wireless signal from the network.

To improve signal quality, remove sources of interference and/or move wireless devices closer to the wireless access point (wireless router).

How can I improve wireless signal strength?

A common reason wireless printers fail to communicate over a network is poor wireless signal quality. If the signal is too weak, too distorted, or blocked by an object, it cannot carry information between the access point and the printer. To determine if the printer is receiving a strong signal from the access point, print a network setup page. The Quality field indicates the relative strength of the wireless signal the printer is receiving. Drops in signal strength can be intermittent, however, and although the signal quality appears high, it may drop during certain conditions.

If you think signal strength is a problem between your access point and the printer, try one or more of the following:

Notes:

- The solutions below are for infrastructure networks. If you are using an ad hoc network, adjust the computer when the solution suggests adjusting the access point.
- Ad hoc networks have a much shorter range than infrastructure networks. Try moving the printer closer to the computer if they seem to have trouble communicating.

MOVE THE PRINTER CLOSER TO THE WIRELESS ACCESS POINT/WIRELESS ROUTER

If the printer is too far away from the access point, it will not be able to communicate with other devices on the network. For most indoor wireless networks, the maximum distance between the access point and the printer is approximately 100 feet (30 meters). This distance could be longer or shorter, depending upon the layout of the network and the limitations of the access point.

REMOVE OBSTACLES BETWEEN THE ACCESS POINT AND THE PRINTER

The wireless signal from your access point will pass through most objects. Most walls, floors, furniture and other objects will not block the wireless signal. However, there are materials that are too dense for the signal to pass through. Objects containing metal and concrete can block the signal. Arrange your printer and access point so that the signal is not blocked by such objects.

REMOVE SOURCES OF INTERFERENCE

Other types of radio frequencies can cause problems with the wireless signal on your network. These sources of interference can cause printing issues that seem to come and go. Turn off potential sources of interference where possible. Avoid using microwaves and cordless phones when printing over your wireless network.

If another wireless network is operating in the vicinity, change the wireless channel on the access point.

Do not place your access point on a printer or other electronic device. Such devices can also interfere with the wireless signal.

ARRANGE THE NETWORK TO REDUCE SIGNAL ABSORPTION

Even when the wireless signal is able to pass through an object, it is slightly weakened. If it passes through too many objects, it can be significantly weakened. All objects absorb part of the wireless signal when it passes through them, and certain types of objects absorb enough to cause communications problems. Place your access point as high in the room as possible to avoid signal absorption.

How can I make sure my computer and printer are connected to the same wireless network?

If the printer is not on the same wireless network as the computer, you will not be able to print wirelessly. The SSID of the printer must match the SSID of the computer, if the computer is already connected to the wireless network.

For Windows users

- 1** Obtain the SSID of the network that the computer is connected to:
 - a** Type the IP address of your wireless access point (wireless router) into the address field of your Web browser.
If you do not know the IP address of the wireless access point:
 - 1** Click , or click **Start** and then click **Run**.
 - 2** In the Start Search or Run box, type **cmd**.
 - 3** Press **Enter**, or click **OK**.
The Command Prompt window opens.
 - 4** Type **ipconfig**, and then press **Enter**. Check the Wireless Network Connection section:
 - The “Default Gateway” entry is typically the wireless access point.
 - The IP address appears as four sets of numbers separated by periods, such as 192.168.2.134.
 - b** Type the user name and password of the router when prompted.
 - c** Click **OK**.
 - d** On the main page, click **Wireless** or any other selection where settings are stored. The SSID will be displayed.
 - e** Write down the SSID.

Note: Make sure you copy it exactly, including any capital letters.

- 2** Print the printer network setup page.
In the Wireless section, look for **SSID**.
- 3** Compare the SSID of the computer and SSID of the printer.
If the SSIDs are the same, then the computer and the printer are connected to the same wireless network.
If the SSIDs are not the same, then run the utility again to set up the printer on the wireless network used by the computer.

For Macintosh users with an AirPort base station

In Mac OS X version 10.5

- 1** From the Apple menu, choose **System Preferences**.
- 2** Click **Network**.
- 3** Click **AirPort**.
The SSID of the network the computer is connected to is displayed in the Network Name pop-up menu.
- 4** Write down the SSID.

In Mac OS X version 10.4 and earlier

- 1 From the Finder desktop, choose **Go > Applications**.
- 2 From the Applications folder, double-click **Internet Connect**.
- 3 From the toolbar, click **AirPort**.
The SSID of the network the computer is connected to is displayed in the Network pop-up menu.
- 4 Write down the SSID.

For Macintosh users with a wireless access point

- 1 Type the IP address of the wireless access point in the address field of your Web browser and continue to step 2.
If you do not know the IP address of the wireless access point, then do the following:
 - a From the Apple menu, choose **System Preferences**.
 - b Click **Network**.
 - c Click **AirPort**.
 - d Click **TCP/IP**, or click **Advanced**, and then click **TCP/IP**.
- 2 Type your user name and password when prompted.
- 3 Click **OK**.
- 4 On the main page, click **Wireless** or another selection where settings are stored. The SSID will be displayed.
- 5 Write down the SSID, security type and the WEP key/WPA passphrase (if shown).

Notes:

- Make sure you copy the network information down exactly, including any capital letters.
- Store the SSID and the WEP key or WPA passphrase in a safe place for future reference.

Can I use my printer on a USB and a network connection at the same time?

Yes; the printer supports a simultaneous USB and network connection. The printer can be configured in the following ways:

- Locally attached (connected to a computer using a USB cable)
- Wireless network
- Ethernet network
- Wireless network and locally attached simultaneously
- Ethernet network and locally attached simultaneously

What is a MAC address?

A Media Access Control (MAC) address is a 48-bit identifier associated with the hardware of network equipment. The MAC address may also be called the physical address because it is connected to the hardware of a device instead of its software. The MAC address is displayed as a hexadecimal number in this format: 01-23-45-67-89-AB.

Every device capable of communicating on a network has a MAC address. Network printers, computers, and routers, whether Ethernet or wireless, all have MAC addresses.

While it is possible to change the MAC address of a network device, it is not common practice to do so. For this reason, MAC addresses are considered permanent. IP addresses are easily changed, so MAC addresses are a more reliable method of identifying a specific device on a network.

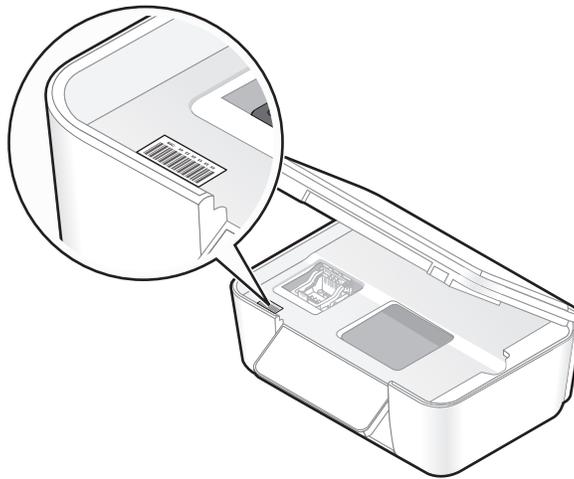

Routers with security capabilities may allow filtering of MAC addresses on networks. This allows a managed list of devices to access the network, identified by their MAC addresses. MAC address filtering can help prevent access on the network from unwanted devices, such as from intruders on a wireless network. MAC address filtering can also prevent legitimate access if you forget to add a new device to the router's list of allowed addresses. If your network uses MAC address filtering, be sure to add the MAC address of the printer to the list of allowed devices.

How do I find the MAC address?

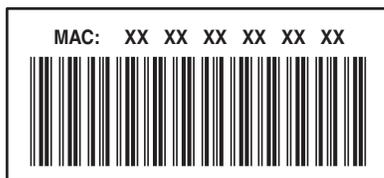

Most network equipment has a unique hardware identification number to distinguish it from other devices on the network. This is called the *Media Access Control (MAC)* address.

When installing the printer on a network, make sure you select the printer with the correct MAC address.

The MAC address label is located inside the printer.

The MAC address of the internal print server is a series of letters and numbers. Other devices sometimes use a type of MAC address called *Universally Administered Address (UAA)*.

Note: A list of MAC addresses can be set on an access point (router) so that only devices with matching MAC addresses are allowed to operate on the network. This is called *MAC filtering*. If MAC filtering is enabled in your access point and you want to add a printer to your network, then the MAC address of the printer must be included in the MAC filter list.

What is an IP address?

An IP address is a unique number used by devices (such as a wireless printer, computer, or wireless access point) on an IP network to locate and communicate with each other. Devices on an IP network can communicate with each other only if they have unique and valid IP addresses. A unique IP address means no two devices on the same network have the same IP address.

An IP address is a group of four numbers separated by periods. An example of an IP address is 192.168.100.110.

What is TCP/IP?

Networks are able to function because computers, printers, and other devices are able to send data to each other, either through cables or by using wireless signals. This transfer of data is made possible by sets of data transmission rules called *protocols*. A protocol can be thought of as a language, and like a language, it has rules allowing participants to communicate with each other.

Different types of networks use different protocols, but *Transmission Control Protocol/Internet Protocol* (TCP/IP) is the most popular. TCP/IP is used to send data over the Internet as well as over most corporate and home networks.

Because computers do not understand words and instead rely upon numbers for communication, TCP/IP requires that every device on a network using TCP/IP to communicate must have an IP address. IP addresses are essentially unique computer names in a numeric format, used to transfer data around a network. IP addresses allow TCP/IP to confirm requests for and receipt of data by various devices on the network.

How do I locate IP addresses?

For Windows users

- 1 Click , or click **Start** and then click **Run**.
- 2 In the Start Search or Run box, type `cmd`.
- 3 Press **Enter**, or click **OK**.
The Command Prompt window opens.
- 4 Type `ipconfig`, and then press **Enter**.
The IP address appears as four sets of numbers separated by periods, such as 192.168.0.100.

For Macintosh users

- 1 From the Apple menu, choose **About This Mac**.
- 2 Click **More Info**.
- 3 From the Contents pane, choose **Network**.
- 4 If you are connected over a wireless network, choose **AirPort** from the Active Services list.

How to locate a printer IP address

- You can locate the printer IP address by viewing the printer network setup page.

How are IP addresses assigned?

An IP address may be assigned automatically by the network using DHCP. Once the printer is set up on a computer, the computer sends all print jobs across the network to the printer using this address.

If the IP address is not automatically assigned, you will be asked during wireless setup to manually enter an address and other network information after selecting your printer from the available list.

What is a key index?

A wireless access point (wireless router) can be configured with as many as four WEP keys. Only one key is used on the network at a time, however. The keys are numbered, and the number of a key is referred to as its key index. All devices on the wireless network must be configured to use the same key index when multiple WEP keys are configured on the wireless access point.

Select the same key index on your printer as you are using on your wireless access point.

Using SmartSolutions

What is SmartSolutions?

SmartSolutions is a set of solutions that you can create, customize, and download from the SmartSolutions Web site (<http://smartsolutions.lexmark.com>) to your printer. It lets you create one-touch custom solutions to streamline repetitive copying, scanning, and printing tasks. SmartSolutions also lets you view RSS feeds, Google Calendar, and online photo albums from the printer control panel.

To access a solution you created or customized, touch **SmartSolutions** on the printer control panel, and then select the icon or name of the solution.

The following are some of the solutions that may be available; be sure to check the SmartSolutions Web site for an updated list.

Pre-loaded solutions

Use	To
ID Card Copy	Copy both sides of an ID card onto a single page.
Photo Reprint	Create photo reprints.
Tell Me More	Learn more about SmartSolutions and how you can create and download your custom solutions.

Custom solutions

Solution	Description
Cartridge Finder	View information on local stores where you can purchase cartridges, with options to print or e-mail cartridge and retailer information as well as print a map of the retailer location.
Copy	Copy documents or photos using pre-defined copy settings.
Eco-Copy	Copy documents or photos using settings that have positive environmental impact.
Google Calendar*	View your Google Calendar with an option to print the daily agenda or event details.
Photo Viewer* Photobucket Viewer* Picasa Photo Viewer*	View photos from Web sites, such as Photobucket and Picasa, with options to print or send an e-mail with a link to the selected photo.
Print a File (Windows only)	Use the printer to print document files on your computer or external storage device that were previously selected in the Solution Center.
RSS Headlines*	View news headlines and article summaries, as well as other RSS feeds (for example, on weather, word of the day, trivia, and poetry), with options to e-mail the complete articles or launch them for viewing on a computer.

* You can select one or more of these solutions as your printer screen saver.

Solution	Description
Scan to Email	E-mail scanned documents directly from the printer using pre-defined names or contacts from the address book.
Scan to Fax	Fax documents directly from the printer using pre-defined names or contacts from the address book.
Scan to File	Scan and save files to a previously selected directory on a computer using pre-defined settings.

* You can select one or more of these solutions as your printer screen saver.

Examples:

- If you are a business owner or supervisor who frequently prints a work schedule, then you could create a Print a File solution. Specify the location of your schedule file, and then name the solution Print Schedule. The next time you need to print a copy of the current schedule, simply select Print Schedule from the SmartSolutions menu on the printer control panel. The printer automatically finds the file and prints it.
- If you frequently scan and fax a document to your lawyer using the same settings, then you could create a Scan to Fax solution and name it Fax to Lawyer. The next time you want to fax a document, you simply have to load the document and select Fax to Lawyer from the SmartSolutions menu on the printer control panel. The printer automatically applies your chosen settings, selects your lawyer as the fax recipient, and then sends the fax.

Note: You need to add your printer to the Solution Center before you can start creating or customizing solutions.

Creating and customizing printer solutions

Before you begin, make sure:

- Your printer and computer are each connected to the Internet through an Ethernet or wireless connection.
- Your printer is powered on.

1 Launch the SmartSolutions Web site:

Using the printer software

a Open the printer program folder:

For Windows users

- 1 Click  or **Start**.
- 2 Click **All Programs** or **Programs**, and then select the printer program folder from the list.

For Macintosh users

From the Finder desktop, double-click the printer program folder.

b Click **Visit Lexmark SmartSolutions**.

Using a Web browser

- a Open a Web browser.
- b Type `smartsolutions.lexmark.com` in the address bar, and then press **Enter**.

2 From the SmartSolutions Web site, log in or create an account.

3 Add your printer.

4 Use the Web site to create, customize, and download solutions to your printer.

For more information, see the SmartSolutions *User's Guide* on the Web site.

Maintaining the printer

Maintaining ink cartridges

In addition to the following tasks that you can perform, your printer performs an automatic maintenance cycle every week if it is plugged into an electrical outlet. It will briefly come out of Power Saver mode or will temporarily power on if it is turned off.

Checking ink levels

Using the printer control panel

From the home screen, touch .

The graphic of the ink levels appears on the display.

Using the printer software

For Windows users

- 1 Click  or **Start**.
- 2 Click **All Programs** or **Programs**, and then select the printer program folder from the list.
- 3 Select **Printer Home**.
- 4 Choose your printer from the printer drop-down list.
- 5 From the Maintenance tab, click **Check ink levels**.

For Macintosh users

- 1 From the Finder desktop, double-click the printer program folder.
- 2 Select **Printer Utility** from the list.
- 3 Check the ink levels from the Maintenance tab.

Aligning the printhead

If the characters or lines on your printer image appear jagged or wavy, then you may need to align the printhead.

Using the printer control panel

- 1 Load plain paper.
- 2 From the home screen, navigate to **Align Printer**:
 > **More Options** > **Align Printer**.

An alignment page prints.

Note: Do not remove the alignment page until printing is finished.

Using the printer software

For Windows users

- 1 Load plain paper.
- 2 Click  or **Start**.
- 3 Click **All Programs** or **Programs**, and then select the printer program folder from the list.
- 4 Select **Printer Home**.
- 5 Choose your printer from the printer drop-down list.
- 6 From the Maintenance tab, click **Align cartridges**.
- 7 Follow the instructions on the computer screen.

For Macintosh users

- 1 Load plain paper.
- 2 From the Finder desktop, double-click the printer program folder.
- 3 Select **Printer Utility** from the list.
- 4 From the Maintenance tab of the Printer Utility dialog, click **Print Alignment Page**.
- 5 Follow the instructions on the computer screen.

If you aligned the cartridges to improve print quality, then print your document again. If print quality has not improved, then clean the printhead nozzles.

Cleaning the printhead nozzles

Poor print quality is sometimes due to clogged printhead nozzles. Clean the printhead nozzles to improve the quality of your prints.

Notes:

- Cleaning the printhead nozzles uses ink, so clean them only when necessary.
- Deep cleaning uses more ink, so try the Clean Printhead option first to save ink.
- If the ink levels are too low, you must replace the ink cartridges before you can clean the printhead nozzles.

Using the printer control panel

From the home screen, navigate to **Clean Printhead** or **Deep Clean Printhead**:

 > **More Options** > **Clean Printhead** or **Deep Clean Printhead**

A cleaning page prints.

Using the printer software

For Windows users

- 1 Click  or **Start**.
- 2 Click **All Programs** or **Programs**, and then select the printer program folder from the list.

- 3 Select **Printer Home**.
- 4 Choose your printer from the printer drop-down list.
- 5 From the Maintenance tab, click **Clean cartridges**.
- 6 Follow the instructions on the computer screen.

For Macintosh users

- 1 From the Finder desktop, double-click the printer program folder.
- 2 Select **Printer Utility** from the list.
- 3 From the Maintenance tab, select **Clean Print Nozzles**.
A cleaning page prints.

Cleaning the exterior of the printer

- 1 Make sure that the printer is turned off and unplugged from the wall outlet.

CAUTION—SHOCK HAZARD: To avoid the risk of electric shock when cleaning the exterior of the printer, unplug the power cord from the wall outlet and disconnect all cables to the printer before proceeding.

- 2 Remove all paper from the printer.
- 3 Dampen a clean, lint-free cloth with water.

Warning—Potential Damage: Do not use household cleaners or detergents, as they may damage the finish of the printer.

- 4 Wipe only the outside of the printer, making sure to remove any ink residue that has accumulated on the paper exit tray.

Warning—Potential Damage: Using a damp cloth to clean the interior may cause damage to your printer.

- 5 Make sure the printer is dry before beginning a new print job.

Cleaning the scanner glass

- 1 Dampen a clean, lint-free cloth with water.
- 2 Gently wipe the scanner glass clean.

Note: Make sure all ink or corrective fluid on a document is dry before placing the document on the scanner glass.

Cleaning the touch screen

The touch screen of your printer control panel may need to be cleaned from time to time to remove fingerprints and smudges.

- 1 Make sure the printer is turned off and unplugged from the wall outlet.

CAUTION—SHOCK HAZARD: To avoid the risk of electric shock when cleaning the exterior of the printer, unplug the power cord from the wall outlet and disconnect all cables from the printer before proceeding.

- 2 Wipe the touch screen with the cloth that came with your printer or with another clean, dry, lint-free cloth.

Warning—Potential Damage: Do not use liquids, household cleaners, or detergents, as they may damage the touch screen.

Troubleshooting

Before you troubleshoot

Use this checklist to solve most printer problems:

- Make sure the power cord is plugged into the printer and into a properly grounded electrical outlet.
- Make sure the printer is not plugged into any surge protectors, uninterrupted power supplies, or extension cords.
- Make sure the printer is turned on.
- Make sure the printer is securely connected to the host computer, print server, or other network access point.
- Check the printer for error messages, and resolve any errors.
- Check for paper jam messages, and clear any jams.
- Check the ink cartridges, and install new cartridges if necessary.
- Use the Service Center to locate and solve the problem (Windows only).
- Turn the printer off, wait about 10 seconds, and then turn the printer back on.

Using the Service Center to solve printer problems

The Service Center provides step-by-step troubleshooting help and contains links to printer maintenance tasks and customer support.

To open the Service Center, use one of these methods:

Method 1	Method 2
If it appears on an error message dialog, click the For additional assistance, use the Service Center link.	<ol style="list-style-type: none">1 Click  or Start.2 Click All Programs or Programs, and then select the printer program folder from the list.3 Select Printer Home.4 From the Support tab, select Service Center.

If Troubleshooting does not solve your problem

Visit our Web site at <http://support.lexmark.com> to find the following:

- Knowledgebase articles with the latest information and troubleshooting for your printer
- Live online technical support
- Contact numbers for telephone technical support

Setup troubleshooting

- "Incorrect language appears on the display" on page 137
- "Printhead errors" on page 137
- "Software did not install" on page 138

- "Print job does not print or is missing pages" on page 139
- "Printer is printing blank pages" on page 140
- "Printer is busy or does not respond" on page 140
- "Cannot delete documents from the print queue" on page 141
- "Cannot print through USB" on page 141

Incorrect language appears on the display

If the "Before you troubleshoot" checklist does not solve the problem, then try the following:

CHANGE THE LANGUAGE USING THE PRINTER MENUS

- 1 From the home screen, navigate to **Use Factory Defaults**:

 > **Use Factory Defaults**

- 2 Touch **Yes**.

The printer resets and starts the initial printer setup.

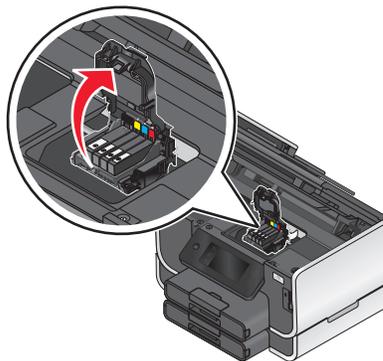

- 3 Complete the initial printer setup.

Printhead errors

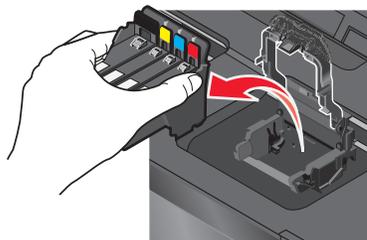

If the "Before you troubleshoot" checklist does not solve the problem, then try the following:

REMOVE AND REINSERT THE PRINthead

- 1 Open the printer and lift the latch.

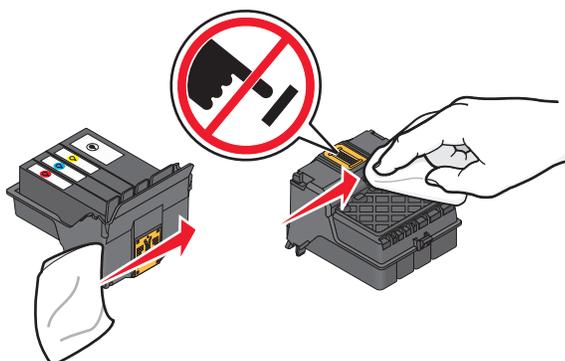

2 Remove the printhead.

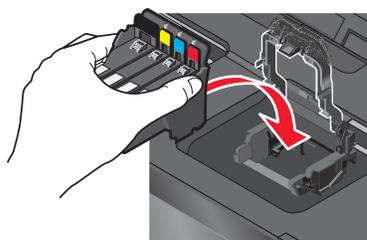

Warning—Potential Damage: Do not touch the printhead nozzles.

3 Wipe the printhead contacts using a clean, lint-free cloth.

4 Reinsert the printhead, and then close the latch until it clicks.

5 Close the printer.

Note: If removing and reinserting the printhead does not resolve the error, then contact technical support.

Software did not install

If you encountered problems while installing, or if your printer does not appear in the list in the Printers folder or as a printer option when sending a print job, then try removing and reinstalling the software.

Before you reinstall the software, do the following:

MAKE SURE THAT YOUR COMPUTER MEETS THE MINIMUM SYSTEM REQUIREMENTS LISTED ON THE PRINTER BOX

TEMPORARILY DISABLE SECURITY PROGRAMS IN WINDOWS BEFORE INSTALLING THE SOFTWARE

CHECK THE USB CONNECTION

- 1 Check the USB cable for any obvious damage. If the cable is damaged, then use a new one.
- 2 Firmly plug the square end of the USB cable into the back of the printer.
- 3 Firmly plug the rectangular end of the USB cable into the USB port of the computer.

The USB port is marked with a  USB symbol.

Note: If you continue to have problems, then try another USB port on the computer. You may have connected to a defective port.

RECONNECT THE PRINTER POWER SUPPLY

- 1 Turn off the printer, and then unplug the power cord from the wall outlet.
- 2 Gently remove the power supply from the printer, and then reinsert it.
- 3 Plug the power cord into the wall outlet, and then turn on the printer.

Print job does not print or is missing pages

If the "Before you troubleshoot" checklist does not solve the problem, then try one or more of the following:

MAKE SURE THE INK CARTRIDGES ARE INSERTED CORRECTLY

- 1 Turn the printer on, and then open the printer.
- 2 Make sure the cartridges are inserted correctly.
The cartridges should *click* firmly into the matching color slot of the printhead.
- 3 Close the printer.

SELECT YOUR PRINTER FROM THE PRINT DIALOG BEFORE SENDING THE PRINT JOB

MAKE SURE THE PRINT JOB IS NOT PAUSED

MAKE SURE YOUR PRINTER IS SET AS THE DEFAULT PRINTER

RECONNECT THE PRINTER POWER SUPPLY

- 1 Turn off the printer, and then unplug the power cord from the wall outlet.
- 2 Gently remove the power supply from the printer, and then reinsert it.
- 3 Plug the power cord into the wall outlet, and then turn on the printer.

REMOVE AND RECONNECT THE USB CABLE CONNECTED TO YOUR PRINTER

CHECK THE USB CONNECTION

- 1 Check the USB cable for any obvious damage. If the cable is damaged, then use a new one.
- 2 Firmly plug the square end of the USB cable into the back of the printer.
- 3 Firmly plug the rectangular end of the USB cable into the USB port of the computer.

The USB port is marked with a  USB symbol.

Note: If you continue to have problems, then try another USB port on the computer. You may have connected to a defective port.

REMOVE AND REINSTALL THE PRINTER SOFTWARE

Printer is printing blank pages

Blank pages may be caused by improperly installed ink cartridges.

REINSTALL THE INK CARTRIDGES AND DEEP CLEAN AND ALIGN THE PRINTHEAD

- 1 Reinstall the ink cartridges, see “Replacing ink cartridges” on page 14 for more information.
If the cartridges do not seem to fit, make sure the printhead is properly seated, and then try installing the cartridges again.

- 2 Load plain paper.

- 3 From the home screen of the printer control panel, navigate to **Deep Clean Printhead**:

 > **More Options** > **Deep Clean Printhead**

A cleaning page prints.

- 4 Navigate to **Align Printer**:

 > **More Options** > **Align Printer**.

An alignment page prints.

Note: Do not remove the alignment page until printing is finished.

Printer is busy or does not respond

If the "Before you troubleshoot" checklist does not solve the problem, then try one or more of the following:

MAKE SURE THE PRINTER IS NOT IN POWER SAVER MODE

If the power light is blinking on and off slowly, then the printer is in Power Saver mode. Press  to wake up the printer.

If the printer will not come out of Power Saver mode, then reset the power:

- 1 Unplug the power cord from the wall outlet, and then wait 10 seconds.
- 2 Insert the power cord into the wall outlet, and then turn on the printer.

If this problem persists, then check our Web site for updates for your printer software or firmware.

RECONNECT THE PRINTER POWER SUPPLY

- 1 Turn off the printer, and then unplug the power cord from the wall outlet.
- 2 Gently remove the power supply from the printer, and then reinsert it.
- 3 Plug the power cord into the wall outlet, and then turn on the printer.

Cannot delete documents from the print queue

If you have jobs stuck in the print queue and cannot delete them to get other jobs to print, then the computer and printer may not be communicating.

RESTART THE COMPUTER AND TRY AGAIN

Cannot print through USB

If the "Before you troubleshoot" checklist does not solve the problem, then try one or more of the following:

CHECK THE USB CONNECTION

- 1 Check the USB cable for any obvious damage. If the cable is damaged, then use a new one.
- 2 Firmly plug the square end of the USB cable into the back of the printer.
- 3 Firmly plug the rectangular end of the USB cable into the USB port of the computer.

The USB port is marked with a  USB symbol.

Note: If you continue to have problems, then try another USB port on the computer. You may have connected to a defective port.

MAKE SURE THE USB PORT IS ENABLED IN WINDOWS

- 1 Click , or click **Start** and then click **Run**.
- 2 In the Start Search or Run box, type `devmgmt.msc`.
- 3 Press **Enter**, or click **OK**.

The Device Manager opens.

- 4 Click the plus sign (+) beside Universal Serial Bus controllers.

If USB Host Controller and USB Root Hub are listed, then the USB port is enabled.

For more information, see the computer documentation.

REMOVE AND REINSTALL THE PRINTER SOFTWARE

Jams and misfeeds troubleshooting

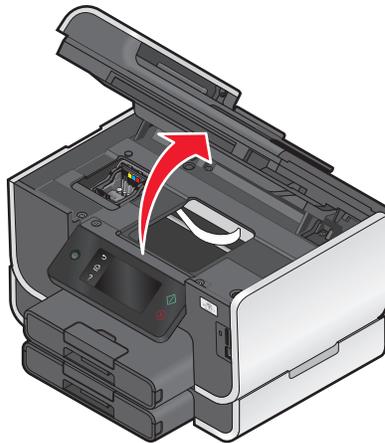

- "Paper jam in the printer" on page 142
- "Paper jam in the duplex unit" on page 142

- “Paper jam in the ADF (selected models only)” on page 143
- “Paper or specialty media misfeeds” on page 144

Paper jam in the printer

Note: The parts inside the printer are sensitive. Avoid unnecessarily touching these parts while clearing jams.

- 1 Press  to turn off the printer.
- 2 Check the paper tray or lift the scanner unit to check for jammed paper.

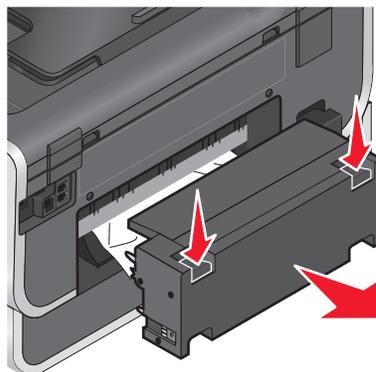

- 3 Firmly grasp the paper, and then gently pull it out.
Note: Be careful not to tear the paper while removing it.
- 4 Press  to turn the printer back on.

Paper jam in the duplex unit

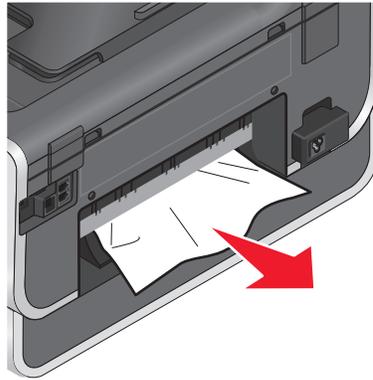

Note: The parts inside the printer are sensitive. Avoid unnecessarily touching these parts while clearing jams.

- 1 Push down the duplex latches and pull out the duplex unit.

 **CAUTION—POTENTIAL INJURY:** The area behind the duplex cover has protruding ribs as part of the paper path. To avoid injury, use caution when accessing this area for clearing a paper jam.

2 Firmly grasp the paper, and then gently pull it out.

Note: Be careful not to tear the paper while removing it.

3 Reinsert the duplex unit.

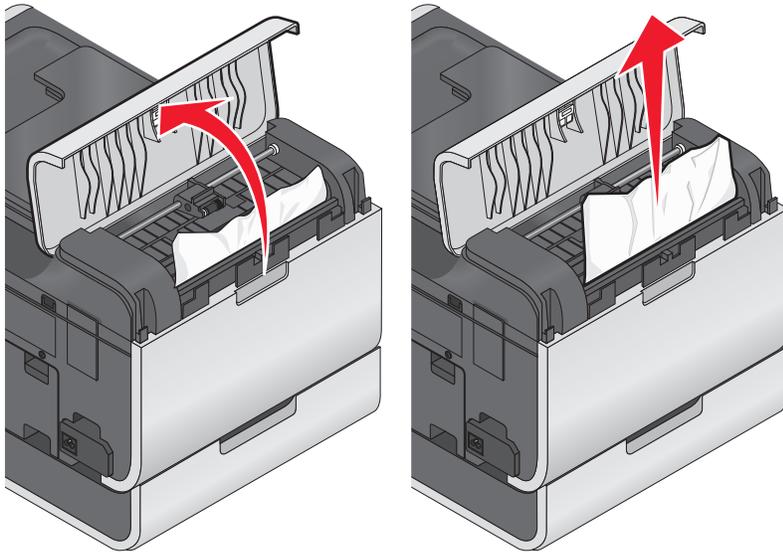

4 Touch **DONE** or press **OK**, depending on your printer model.

5 From your computer, resume the print job.

Paper jam in the ADF (selected models only)

Note: The parts inside the printer are sensitive. Avoid unnecessarily touching these parts while clearing jams.

- 1 Open the ADF door, and then gently pull out the jammed paper.

Note: Be careful not to tear the paper while removing it.

- 2 Close the ADF door.
- 3 Touch **DONE** or press **OK**, depending on your printer model.
- 4 From your computer, resume the print job.

Paper or specialty media misfeeds

These are possible solutions if paper or specialty media misfeeds or skews, or if multiple sheets feed or stick together. Try one or more of the following:

CHECK PAPER CONDITION

Use only new, unwrinkled paper.

CHECK PAPER LOADING

- Load a smaller amount of paper into the printer.
- Load paper with the print side facedown. (If you are not sure which side is the printable side, see the instructions that came with the paper.)
- Check the loading instructions for your paper or specialty media.

REMOVE EACH PAGE AS IT IS PRINTED

ADJUST THE PAPER GUIDES TO FIT THE LOADED PAPER

Print troubleshooting

- “Poor quality at the edges of the page” on page 145
- “Streaks or lines on printed image” on page 145
- “Print speed is slow” on page 146
- “Computer slows down when printing” on page 146

Poor quality at the edges of the page

If the "Before you troubleshoot" checklist does not solve the problem, then try one or more of the following:

CHECK MINIMUM PRINT SETTINGS

Unless you are using the borderless feature, use these minimum print margin settings:

- Left and right margins:
 - 6.35 mm (0.25 in.) for letter-size paper
 - 3.37 mm (0.133 in.) for all paper sizes except letter
- Top margin: 1.7 mm (0.067 in.)
- Bottom margin: 12.7 mm (0.5 in.)

SELECT THE BORDERLESS PRINT FEATURE

For Windows users:

- 1 With a document or photo open, click **File → Print**.
- 2 Click **Properties, Preferences, Options, or Setup**.
- 3 From the Paper Options section of the Print Setup tab, select **Borderless**.

For Macintosh users:

- 1 With a document or photo open, choose **File > Print**.
- 2 From the Printer pop-up menu, choose the printer.
- 3 If necessary, click **Advanced**.
- 4 From the print options pop-up menu, choose **Paper Handling**.
- 5 From the Destination Paper Size section, select **Scale to fit paper size**.
- 6 From the Paper Size pop-up menu, choose a paper size that has “(Borderless)” in the name. For example, if you are printing on a 4 x 6 photo card, then choose **US 4 x 6 in (Borderless)**.

Streaks or lines on printed image

If the "Before you troubleshoot" checklist does not solve the problem, then try one or more of the following:

CHECK THE INK LEVELS

Replace low or empty ink cartridges.

SELECT A HIGHER PRINT QUALITY FROM THE PRINTER SOFTWARE

MAKE SURE THE INK CARTRIDGES ARE PROPERLY INSTALLED

ALIGN THE PRINTHEAD

CLEAN OR DEEP CLEAN THE PRINTHEAD NOZZLES

Note: If these solutions do not remove the streaks or lines on the printed image, then contact technical support.

Print speed is slow

If the "Before you troubleshoot" checklist does not solve the problem, then try one or more of the following:

MAXIMIZE COMPUTER PROCESSING SPEED

- Close all applications not in use.
- Minimize the number and size of graphics and images in the document.
- Remove as many unused fonts as possible from your system.

ADD MEMORY

Consider purchasing more RAM.

SELECT A LOWER PRINT QUALITY FROM THE PRINTER SOFTWARE

MANUALLY SELECT A PAPER TYPE THAT MATCHES THE TYPE OF PAPER YOU ARE USING

REMOVE AND REINSTALL THE PRINTER SOFTWARE

Computer slows down when printing

These are possible solutions. Try one of the following:

IF YOU ARE USING A USB CONNECTION, THEN TRY A DIFFERENT USB CABLE

IF YOU ARE ON A NETWORK, THEN RESET THE POWER OF THE ACCESS POINT (ROUTER)

- 1 Unplug the power cord from the access point.
- 2 Wait ten seconds, and then insert the power cord.

Copy and scan troubleshooting

- "Copier or scanner does not respond" on page 147
- "Scanner unit does not close" on page 147

- “Poor copy or scanned image quality” on page 147
- “Partial copies or scans of documents or photos” on page 147
- “Scan was not successful” on page 148
- “Scanning takes too long or freezes the computer” on page 148
- “Cannot scan to a computer over a network” on page 148

Copier or scanner does not respond

If the "Before you troubleshoot" checklist does not solve the problem, then try one or more of the following:

SET YOUR PRINTER AS THE DEFAULT PRINTER

REMOVE AND REINSTALL THE PRINTER SOFTWARE

Scanner unit does not close

- 1 Lift the scanner unit.
- 2 Remove any obstruction keeping the scanner unit open.
- 3 Lower the scanner unit.

Poor copy or scanned image quality

If the "Before you troubleshoot" checklist does not solve the problem, then try one or more of the following:

CLEAN THE SCANNER GLASS

ADJUST THE SCAN QUALITY FROM THE PRINTER SOFTWARE

REVIEW THE TIPS FOR COPYING, SCANNING, AND IMPROVING PRINT QUALITY

USE A CLEARER VERSION OF THE ORIGINAL DOCUMENT OR IMAGE

MAKE SURE THE DOCUMENT OR PHOTO IS LOADED FACEDOWN ON THE SCANNER GLASS AND IN THE CORRECT CORNER

Partial copies or scans of documents or photos

If the "Before you troubleshoot" checklist does not solve the problem, then try one or more of the following:

MAKE SURE THE DOCUMENT OR PHOTO IS LOADED FACEDOWN ON THE SCANNER GLASS AND IN THE CORRECT CORNER

SELECT A PAPER SIZE FROM THE PRINTER SOFTWARE THAT MATCHES THE LOADED PAPER

MAKE SURE THE ORIGINAL SIZE SETTING MATCHES THE SIZE OF THE DOCUMENT YOU ARE SCANNING

Scan was not successful

If the "Before you troubleshoot" checklist does not solve the problem, then try one or more of the following:

CHECK THE USB CONNECTION

- 1 Check the USB cable for any obvious damage. If the cable is damaged, then use a new one.
- 2 Firmly plug the square end of the USB cable into the back of the printer.
- 3 Firmly plug the rectangular end of the USB cable into the USB port of the computer.

The USB port is marked with a  USB symbol.

Note: If you continue to have problems, then try another USB port on the computer. You may have connected to a defective port.

RESTART THE COMPUTER

Scanning takes too long or freezes the computer

If the "Before you troubleshoot" checklist does not solve the problem, then try one or more of the following:

CLOSE OTHER SOFTWARE PROGRAMS THAT ARE NOT BEING USED

USE A LOWER SCANNING RESOLUTION

Cannot scan to a computer over a network

If the "Before you troubleshoot" checklist does not solve the problem, then try one or more of the following:

MAKE SURE THE PRINTER AND THE DESTINATION COMPUTER ARE CONNECTED TO THE SAME NETWORK

MAKE SURE THE PRINTER SOFTWARE IS INSTALLED ON THE DESTINATION COMPUTER

E-mail troubleshooting

- "Cannot send e-mail" on page 149
- "Cannot attach files" on page 149

Cannot send e-mail

CHECK YOUR E-MAIL CONFIGURATION SETTINGS

Make sure you have correctly completed the e-mail setup and successfully configured an SMTP server.

CHECK YOUR NETWORK CONNECTION

Make sure the printer is connected to an Ethernet or wireless network. Your network must be connected to the Internet for the printer to communicate with the SMTP server.

CHECK YOUR PROXY CONFIGURATION

Your proxy server configuration should allow SMTP server connections. For help with your proxy server or SMTP settings, contact your system support person.

MAKE SURE TO ENTER A VALID RECIPIENT E-MAIL ADDRESS

MAKE SURE THE RECIPIENT MAILBOX IS NOT FULL

This causes e-mail to bounce back to your inbox.

Cannot attach files

SELECT A SUPPORTED FILE TYPE (JPEG OR PDF)

MAKE SURE THE FILE SIZE IS NOT TOO LARGE

Fax troubleshooting

- "Fax troubleshooting checklist" on page 150
- "Cannot send faxes" on page 150
- "Cannot receive faxes" on page 152
- "Cannot run the fax software" on page 153
- "Fax error messages on the printer control panel" on page 153

For detailed descriptions of common terms and tasks, see the following:

- "Setting up the printer to fax" on page 77
- "Faxing FAQ" on page 94

Fax troubleshooting checklist

If you encounter problems sending and receiving faxes, then check the connection first:

- 1 Check for a dial tone on the telephone line by plugging an analog telephone into the wall jack, DSL filter, VoIP device, or cable modem where you connected the printer. Make sure you plug the telephone into the same port. If you do not hear a dial tone, then contact your line provider.
- 2 While the printer is connected to the telephone line, check for a dial tone by plugging an analog telephone into the  port of the printer. If you do not hear a dial tone, then use the checklist below. Listen for a dial tone after checking each item. If you hear a dial tone but still have problems sending and receiving faxes, then see the other topics in this section.

Connection checklist

- Make sure that the printer and other devices on the line (if applicable) are set up and configured correctly according to your setup scenario.
- Make sure that the cables are connected to the correct ports.
- Make sure that the cables are securely plugged in.

Check the cable connections for the following hardware, if applicable:

Power supply	Answering machine	Cable modem	Splitter
Telephone	VoIP adapter	DSL filter	RJ-11 adapter

- If the printer is connected to a Digital Subscriber Line, then make sure you are using a DSL filter for the printer.
- If the printer is connected to a VoIP adapter or cable modem, then make sure that the printer is plugged into the first phone port.
- If you are using a splitter, then make sure that you are using a phone splitter. Do *not* use a line splitter.

Cannot send faxes

If the “Fax troubleshooting checklist” does not solve the problem, then try one or more of the following:

MAKE SURE THAT YOU HAVE REGISTERED YOUR USER INFORMATION IN THE PRINTER

If you did not enter your user information during initial setup, then enter your fax name and fax number. In some countries, you cannot send a fax without entering your fax name or company name. Some fax machines also block unknown faxes or faxes without sender information.

DECREASE THE TRANSMISSION SPEED OF THE FAX MODEM

The modem of the printer can transmit data at 33,600 bps. This is the maximum speed at which the printer can send and receive faxes. It is not necessary, however, to set the modem to its fastest transmission capability. The speed of the modem of the receiving fax machine must match or be greater than the speed at which you are sending your fax. Otherwise, your fax will not be received.

To decrease the transmission speed of the modem:

- 1 From the home screen, navigate to **Max Send Speed**:
 > **Fax Setup > Dialing and Sending > Max Send Speed**
- 2 Select a sending speed, and then touch **Accept**.

SET THE PRINTER TO SCAN THE ORIGINAL DOCUMENT BEFORE DIALING THE NUMBER

The printer does not automatically redial if you set it to scan the original document after dialing the number.

Set the printer to scan before dialing so that you do not have to scan the document again if the fax fails. The scanned document is saved in the printer memory. The printer can then retrieve it and automatically redial the number.

To set the printer to scan before dialing:

- 1 From the home screen, navigate to **Scan**:
 > **Fax Setup > Dialing and Sending > Scan**
- 2 Touch **Before Dial**, and then touch **Accept**.

ENABLE ERROR CORRECTION

Errors and blurs may appear in the faxed document if there is too much noise on the line. This option enables the printer to transmit the bad blocks of data again and correct the errors. When a fax has too many errors, the fax may be rejected by the receiving fax machine.

To make sure that error correction is enabled:

- 1 From the home screen, navigate to **Error Correction**:
 > **Fax Setup > Dialing and Sending > Error Correction**
- 2 Check to see if error correction is set to On.
If it is not set to On, touch **ON**, and then touch **Accept**.

ENABLE AUTOMATIC FAX CONVERSION

If the receiving fax machine does not support color fax, then this option automatically converts the outgoing color fax to black and white. It also automatically reduces the resolution of the fax to a resolution that the receiving machine can support.

To make sure that automatic fax conversion is enabled:

- 1 From the home screen, navigate to **Auto Fax Convert**:
 > **Fax Setup > Dialing and Sending > Auto Fax Convert**
- 2 Check to see if automatic fax conversion is set to On.
If it is not set to On, touch **ON**, and then touch **Accept**.

MAKE SURE THAT THE DIAL PREFIX SETTING IS CORRECT

The dialing prefix is the number or series of numbers that you press before you can dial the actual fax number or telephone number. If the printer is in an office setting or in a private branch exchange, this can be a specific number that you need to press so you can make a call outside the office.

Make sure that the dial prefix entered in the printer is correct for your network.

To check the dial prefix setting:

- 1 From the home screen, navigate to **Dial Prefix**:
 > **Fax Setup** > **Dialing and Sending** > **Dial Prefix**
- 2 Check the prefix.
If the prefix is not correct, enter the correct prefix, and then touch **Accept**.

Cannot receive faxes

If the “Fax troubleshooting checklist” does not solve the problem, then try one or more of the following:

MAKE SURE THAT YOU HAVE CONFIGURED THE CORRECT SETTINGS FOR YOUR SETUP

The fax settings depend on whether the printer is connected to its own fax line or shares the line with other devices.

If the printer is sharing the line with other devices, then make sure that the following are set:

- Auto Answer is On.
- The printer picks up on a greater number of rings than the other devices.
- The printer picks up on the correct distinctive ring, if you subscribe to a distinctive ring service.

MAKE SURE THAT THE PRINTER IS CONNECTED TO AN ANALOG PORT

The printer is an analog device. If you are using a PBX system, then make sure that the printer is connected to an analog port on the PBX. You may need a digital line converter that converts digital signals into analog signals.

MAKE SURE THAT THE PRINTER MEMORY IS NOT FULL

The printer saves an incoming fax to the printer memory before it prints the fax. If the printer runs out of ink or runs out of paper while receiving the fax, then the printer saves the fax so you can print it later. However, if the printer memory is full, then the printer may not be able to receive more incoming faxes. An error message appears on the display when the printer memory is full. Resolve the error to free up space in the printer memory.

MAKE SURE THAT FAX FORWARDING IS DISABLED

You may have turned on Fax Forwarding. Disable this option so that the printer can receive the fax.

- 1 From the home screen, navigate to **Fax Forward**:
 > **Fax Setup** > **Ringing and Answering** > **Fax Forward**
- 2 Touch **OFF**, and then touch **Accept**.

INCREASE THE RINGER VOLUME

If you set the printer to receive faxes manually (Auto Answer Off), then increase the ringer volume.

MAKE SURE THAT YOU HAVE THE CORRECT MANUAL ANSWER CODE

If you set the printer to receive faxes manually (Auto Answer Off), then you need to press the correct code when a fax comes in so that the printer can receive it.

To retrieve the correct code:

- 1 From the home screen, navigate to **Manual Answer Code**:
🔧 > **Fax Setup > Ringing and Answering > Manual Answer Code**
- 2 Copy the manual answer code that appears on the touch screen.

Cannot run the fax software

The printer must be connected to a telephone, DSL, VoIP, or cable service before you can configure the fax settings in the fax software.

MAKE SURE THE FAX SOFTWARE IS INSTALLED

The Fax Solutions Software is optional for Windows users and is installed with the printer software only if you select it on the "Install Additional Software" screen during installation. If you did not install the fax software, then the Fax tab on the Printer Home takes you to our Web site where you can download the software.

MAKE SURE THE PRINTER IS CONNECTED TO A TELEPHONE LINE

You need to connect the printer to your telephone line (through a standard wall jack, a DSL filter, a VoIP adapter, or a cable modem) before you can open the fax software and configure the fax settings.

MAKE SURE THAT THE PRINTER IS CONNECTED TO THE COMPUTER

MAKE SURE THAT THE PRINTER IS NOT IN POWER SAVER MODE

Fax error messages on the printer control panel

Error Message:	What it indicates:	Possible solutions:
Remote Fax Error	The receiving fax machine cannot receive the fax. The error on the receiving end could be due to several factors.	<ul style="list-style-type: none">• Resend the fax. There may have been a problem with the quality of the connection.• Decrease the transmission speed of your fax modem.• Register your user information. In some countries, you cannot send a fax without registering your fax name and fax number. Some fax machines also block faxes without sender information.
Fax Mode Unsupported	The receiving fax machine does not support color fax or the scan resolution of the document that you are sending.	<ul style="list-style-type: none">• Enable Auto Fax Conversion. The printer automatically converts color faxes to black and lowers the scan resolution of the document.• Lower the fax quality.• Reformat the document on Letter-size paper.

Error Message:	What it indicates:	Possible solutions:
Unsupported Compression	The fax modem of the receiving fax machine does not support data compression. Fax modems compress data to speed up transmission, but the receiving fax modem needs to have the same compression code.	<ul style="list-style-type: none"> • Lower the transmission speed of the fax modem, and then resend the fax. • Enable Auto Fax Conversion.
Unsupported Resolution	The receiving fax machine does not support the scan resolution of the document that you are sending.	<ul style="list-style-type: none"> • Lower the fax quality. • Enable Auto Fax Conversion.
Unrecoverable Fax Error	The fax modem encountered critical errors.	Turn off the printer, turn it back on, and then resend the fax.
Fax Modem Error	The fax modem of the printer may be busy, or the fax modem may have encountered problems during transmission.	Turn off the printer, turn it back on, and then resend the fax.
Phone Line is connected to the incorrect jack on the back of the machine.	The telephone cable is connected to the wrong port on the back of the printer.	Connect the phone cable to the  port on the back of the printer.
Digital line detected	The printer is connected to a digital line.	<p>The printer is an analog device and must be connected to an analog line. To connect the printer to a digital line, you must use a digital line converter or a filter.</p> <p>For more information, see the "Setting up the printer to fax" section.</p>
Failed to Connect Phone Line Error Phone Line Not Connected	The printer cannot detect a dial tone.	See the "Fax troubleshooting checklist."
Phone Line Busy	Your telephone line or the telephone line of the receiving fax machine is busy. This happens especially if the printer is sharing the line with other devices (telephone, answering machine).	<ul style="list-style-type: none"> • Set the printer to redial. • Increase the time between the redial attempts. • Place a test call to the number to which you want to send a fax to make sure that it is working correctly. • If the telephone line is being used by another device, then wait until the other device is finished before sending the fax. • Schedule to resend the fax at a later time. • Set the printer to scan before dialing. The scanned document is saved in the printer memory. The printer can then retrieve it and automatically redial the number.

Error Message:	What it indicates:	Possible solutions:
No Answer	Auto Answer may have been turned off on the receiving fax machine.	<ul style="list-style-type: none"> • Verify the number, and then resend the fax. • Set the printer to redial. Note: Depending on your country or region, there may be a limit on the number of redial attempts, regardless of the redial settings that you set in your printer. • Schedule to resend the fax at a later time.
No Caller ID Call Stopped	Your printer stopped the call because the incoming fax has no sender information. You may have chosen to block faxes with no Caller ID or faxes without Caller IDs are not allowed in your country or region.	Disable Block No-ID.

To troubleshoot error messages in the fax software, click **Help** to view the help information for the fax software.

Memory card troubleshooting

- “Memory card troubleshooting checklist” on page 155
- “Nothing happens when a memory card is inserted” on page 155
- “Cannot print documents from a memory card or flash drive” on page 156
- “Photos do not transfer from a memory card across a wireless network” on page 156

Memory card troubleshooting checklist

Before you troubleshoot, use the following checklist to solve most memory card problems:

- Make sure that the memory card you are using can be used in the printer.
- Make sure the memory card is not damaged.
- Make sure memory card contains supported file types.

Nothing happens when a memory card is inserted

If the “Memory card troubleshooting checklist” does not solve the problem, then try one or more of the following:

REINSERT THE MEMORY CARD

The memory card may have been inserted too slowly. Remove and then reinsert the memory card quickly.

CHECK THE USB CONNECTION

- 1 Check the USB cable for any obvious damage. If the cable is damaged, then use a new one.
- 2 Firmly plug the square end of the USB cable into the back of the printer.

- 3 Firmly plug the rectangular end of the USB cable into the USB port of the computer.

The USB port is marked with a  USB symbol.

Note: If you continue to have problems, then try another USB port on the computer. You may have connected to a defective port.

CHECK THE NETWORK CONNECTION

If the printer and computer are connected over a network, then make sure that the correct host and device are communicating. Select the printer from the computer or the computer from the printer.

Cannot print documents from a memory card or flash drive

If the "Memory card troubleshooting checklist" does not solve the problem, then try the following:

CHECK THE USB CONNECTION

- 1 Check the USB cable for any obvious damage. If the cable is damaged, then use a new one.
- 2 Firmly plug the square end of the USB cable into the back of the printer.
- 3 Firmly plug the rectangular end of the USB cable into the USB port of the computer.

The USB port is marked with a  USB symbol.

Note: If you continue to have problems, then try another USB port on the computer. You may have connected to a defective port.

CHECK THE NETWORK CONNECTION

If the printer and computer are connected over a network, then make sure that the correct host and device are communicating. Select the printer from the computer or the computer from the printer.

Photos do not transfer from a memory card across a wireless network

If the "Memory card troubleshooting checklist" does not solve the problem, then try one or more of the following:

MAKE SURE THAT BOTH THE PRINTER AND THE DESTINATION COMPUTER ARE TURNED ON AND READY

SELECT THE CORRECT COMPUTER NAME FROM THE LIST ON THE PRINTER

MAKE SURE YOUR WIRELESS NETWORK IS CONNECTED AND ACTIVE

If your wireless connection is down, then use a USB cable to connect your printer to your computer.

Network troubleshooting

- “Network troubleshooting checklist” on page 157
- “The Continue button is unavailable” on page 158
- “Cannot print and there is a firewall on the computer” on page 159
- “Communication with printer lost when connected to Virtual Private Network (VPN)” on page 160

Network troubleshooting checklist

Before beginning to troubleshoot the wireless printer, verify the following:

General Networking

Make sure:

- The printer, the computer, and the wireless access point are all plugged in and turned on.
- The wireless network is working properly.
Try accessing other computers on your wireless network. If your network has Internet access, try connecting to the Internet over a wireless connection.
- The printer driver is installed on the computer from which you are performing a task.
- The correct printer port is selected.
- The IP address, gateway, and network mask are correct for your network.
Print a network setup page from the printer to check the network settings.
- All switches, hubs, and other connecting devices are turned on.

Ethernet Networking

Make sure:

- The Ethernet cable and connectors are not damaged.
Check the connectors at both ends for any obvious damage. If possible, use a new cable. Damage to the cable may not be obvious.
- The Ethernet cable is firmly plugged in to the printer and to the network hub or wall connection.

Wireless Networking

Make sure:

- The SSID is correct.
Print a network setup page from the printer to check the network settings.
- Your WEP key or WPA passphrase is correct (if your network is secure).
Log in to the wireless access point (wireless router) and check the security settings.
If you are not sure if your security information is correct, run the wireless setup again.
- The printer and the computer are within the range of the wireless network.
For most networks, the printer and the computer should be within 100 feet (30 meters) of the wireless access point (wireless router).
- The Wi-Fi indicator light is lit and is solid green.
- The computer and printer are both connected to the same wireless network.

- The printer is located away from obstacles or electronic devices that could interfere with the wireless signal.
Make sure the printer and wireless access point are not separated by poles, walls, or support columns containing metal or concrete.
Many devices can interfere with the wireless signal, including baby monitors, motors, cordless phones, security system cameras, other wireless networks, and some Bluetooth devices.
- The computer is not connected to a VPN.
- Any non-Microsoft firewalls on the computer are updated to the most recent version and allow the printer software to communicate over the network.

The Continue button is unavailable

Try the following solutions in the order they appear until the Continue button becomes active and can be clicked:

CHECK IF THE **USB** CABLE IS SECURELY PLUGGED INTO THE **USB** PORTS ON BOTH THE COMPUTER AND THE PRINTER

USB ports are marked with the  symbol.

MAKE SURE THAT THE PRINTER IS PLUGGED IN AND TURNED ON

Check to see if the  button is lit. If you have just turned on the printer, then you might need to disconnect the USB cable and reconnect it.

MAKE SURE THAT THE **USB** PORT ON THE COMPUTER IS WORKING

Test the USB port by connecting other devices to it. If you can successfully use other devices from the port, then the port is working.

If the USB port on the computer is not working, then try using the other USB ports on the computer.

MAKE SURE THAT THE **USB** CABLE IS WORKING

Try using a different USB cable. If you are using a cable longer than 10 feet, then try using a shorter cable.

MAKE SURE THAT YOU ARE USING THE CORRECT **CD** FOR YOUR PRINTER MODEL

Compare the printer model on the CD to the printer model on the printer. The numbers should either match exactly or be within the same series.

If you have any doubts, look for an updated version of the printer software on our Web site. For more information, see "Installing the printer software" in the *User's Guide*. You can access the *User's Guide* from the link at the bottom of the installation screen.

RECONNECT THE POWER SUPPLY

- 1 Turn off the printer.
- 2 Unplug the power cord from the power outlet.
- 3 Remove the power supply from the back of the printer and then plug it back in.

- 4 Plug the power cord back into the power outlet.
- 5 Turn on the printer, and then resume the installation on your computer.

TRY RUNNING THE INSTALLER AGAIN

- 1 Close the installer.
- 2 Remove the CD, and then restart the computer.
- 3 Insert the CD and then run the installer again.

Notes:

- When you get to the **Software Already Installed** screen, make sure you select **Install a printer**.
- If you have already set up your printer, select **Additional Computer** when you get to the **Setting up a new printer?** screen to skip the hardware setup wizard.

CHECK THAT YOUR COMPUTER IS ABLE TO ACKNOWLEDGE USB ACTIVITY ON THE USB PORT

Open the Device Manager to check if it has activity whenever a USB device is connected to a USB port:

- 1 Click , or click **Start** and then click **Run**.
- 2 In the Start Search or Run box, type `devmgmt.msc`.
- 3 Press **Enter**, or click **OK**.

The Device Manager opens.

- 4 Watch the Device Manager window while connecting a USB cable or another device to the USB port. The window refreshes when Device Manager recognizes the USB connection.
 - If there is activity on Device Manager but none of the previous solutions worked, call Customer Support.
 - If there is no activity on Device Manager, there may be a problem with your computer and its USB support. The computer must recognize the USB connection in order for installation to work.

Cannot print and there is a firewall on the computer

Third-party (non-Microsoft) firewalls can interfere with wireless printing. If the printer and computer are configured correctly, and the wireless network is working, but the printer will not print wirelessly, then a firewall could be the problem. If there is a firewall (other than the Windows firewall) on the computer, try one or more of the following:

- Update the firewall using the most recent update available from the manufacturer. Refer to the documentation that came with your firewall for instructions on how to do this.
- If programs request firewall access when you install the printer or try to print, make sure you allow those programs to run.
- Temporarily disable the firewall and install the wireless printer on the computer. Re-enable the firewall when you have completed the wireless installation.

Communication with printer lost when connected to Virtual Private Network (VPN)

You will lose your connection to a wireless printer on your local network when connected to most *Virtual Private Networks* (VPNs). Most VPNs allow users to communicate with only the VPN and no other network at the same time. If you would like to have the ability to connect to your local network and to a VPN at the same time, the system support person for the VPN must enable split tunneling. Be aware that some organizations will not allow split tunneling due to security or technical concerns.

Wireless troubleshooting

- “Resetting the wireless settings to factory defaults” on page 160
- “Cannot print over wireless network” on page 160
- “Wi-Fi indicator light is not lit” on page 164
- “Wi-Fi indicator light is green but the printer does not print (Windows only)” on page 164
- “Wi-Fi indicator light is still orange” on page 165
- “Wi-Fi indicator light is blinking orange during installation” on page 166
- “Wireless print server not installed” on page 170
- ““Communication not available” message displays when printing wirelessly” on page 171
- “Communication with printer lost when connected to Virtual Private Network (VPN)” on page 160
- “Resolving intermittent wireless communications issues” on page 173

Resetting the wireless settings to factory defaults

1 From the home screen, navigate to **Reset Network Settings**:

 > **Network Setup** > **Reset Network Settings**

2 Touch **Yes**.

The printer wireless settings are reset to factory default settings. To verify, print a network setup page.

Cannot print over wireless network

If you encountered problems while installing, or if your printer does not appear in the printers folder or as a printer option when sending a print job, then you can try uninstalling and reinstalling the software.

Before you reinstall the software, check the troubleshooting checklist, and then do the following:

TURN THE WIRELESS ACCESS POINT OFF AND THEN BACK ON

Turning the access point off and then back on again can sometimes refresh network connections and resolve connectivity issues.

DISCONNECT FROM VPN SESSION

When you are connected to another network through a VPN connection, you will not be able to access the printer over your wireless network. End your VPN session and try printing again.

MAKE SURE DEMO MODE IS TURNED OFF

Check to see if your printer has a Demo Mode. Selected printer features are not available when Demo Mode is turned on.

From the printer control panel, navigate to **Demo Mode**:

 > **Demo Mode**.

Select **Off**, and then save the setting.

CHECK YOUR WEP KEY OR WPA PASSPHRASE

If your wireless access point is using Wired Equivalent Privacy (WEP) security, then the WEP key should be:

- Exactly 10 or 26 hexadecimal characters. Hexadecimal characters are A–F, a–f, and 0–9.

or

- Exactly 5 or 13 ASCII characters. ASCII characters are letters, numbers, and symbols found on a keyboard. ASCII characters in a WEP key are case-sensitive.

If your wireless access point is using Wi-Fi Protected Access (WPA) security, then the WPA passphrase should be:

- From 8 to 63 ASCII characters. ASCII characters in a WPA passphrase are case-sensitive.

or

- Exactly 64 hexadecimal characters. Hexadecimal characters are A–F, a–f, and 0–9.

Note: If you do not know this information, then see the documentation that came with the wireless network, or contact the person who set up your wireless network.

CHECK IF YOUR WIRELESS ACCESS POINT HAS AN ASSOCIATION/REGISTRATION BUTTON

Wireless broadband boxes in Europe, the Middle East and Africa such as LiveBox, AliceBox, N9UF Box, FreeBox, or Club Internet may require you to press an association/registration button when adding the printer to your wireless network.

If you are using one of these boxes and need more information, see the documentation that came with your box, or contact your *Internet Service Provider* (ISP).

MOVE YOUR ACCESS POINT AWAY FROM OTHER ELECTRONIC DEVICES

There may be temporary interference from electronic devices such as microwave ovens or other appliances, cordless phones, baby monitors, and security system cameras. Make sure your access point is not positioned too closely to these devices.

MOVE THE COMPUTER AND/OR PRINTER CLOSER TO THE WIRELESS ROUTER

The range of your wireless network depends on many factors, including the abilities of your router and network adapters. If you are having trouble printing, try placing the computer and printer no more than 100 feet apart.

CHECK THE WIRELESS SIGNAL QUALITY

Print the network setup page and check the signal quality. If the signal quality is listed as good or excellent, then another factor is causing the problem.

CHECK YOUR ADVANCED SECURITY SETTINGS

- If you are using MAC (Media Access Control) address filtering to limit access to your wireless network, then you must add the printer MAC address to the list of addresses allowed to connect to the wireless access point.
- If you set the wireless access point to issue a limited number of IP addresses, then you must change this so that the printer can be added.

Note: If you do not know how to make these changes, then see the documentation that came with the wireless router, or contact the person who set up your wireless network.

MAKE SURE YOUR COMPUTER IS CONNECTED TO YOUR WIRELESS ACCESS POINT (WIRELESS ROUTER)

- See if you have access to the Internet by opening your Web browser and accessing any site.
- If there are other computers or resources on your wireless network, then check to see if you can access them from your computer.

MAKE SURE THAT YOUR COMPUTER AND PRINTER ARE CONNECTED TO THE SAME WIRELESS NETWORK

If the printer is not on the same wireless network as the computer, then you will not be able to print wirelessly. The SSID of the printer must match the SSID of the computer, if the computer is already connected to the wireless network.

For Windows users

- 1 Obtain the SSID of the network that the computer is connected to.
 - a Type the IP address of your wireless access point (wireless router) into the address field of your Web browser.

If you do not know the IP address of the wireless access point:

 - 1 Click , or click **Start** and then click **Run**.
 - 2 In the Start Search or Run box, type **cmd**.
 - 3 Press **Enter** or click **OK**.

The Command Prompt window opens.
 - 4 Type **ipconfig**, and then press **Enter**. Check the Wireless Network Connection section:
 - The "Default Gateway" entry is typically the wireless access point .
 - The IP address appears as four sets of numbers separated by periods, such as 192.168.2.134.
 - b Type the user name and password of the router when prompted.
 - c Click **OK**.
 - d On the main page, click **Wireless** or any other selection where settings are stored. The SSID will be displayed.
 - e Write down the SSID.

Note: Make sure you copy it exactly, including any capital letters.

- 2 Print the printer network setup page.

In the Wireless section, look for **SSID**.
- 3 Compare the SSID of the computer and SSID of the printer.

If the SSIDs are the same, then the computer and the printer are connected to the same wireless network.

If the SSIDs are not the same, then run the utility again to set up the printer on the wireless network used by the computer.

For Macintosh users with an AirPort base station

In Mac OS X version 10.5

- 1 From the Apple menu, choose **System Preferences**.
- 2 Click **Network**.
- 3 Click **AirPort**.

The SSID of the network the computer is connected to is displayed in the Network Name pop-up menu.

- 4 Write down the SSID.

In Mac OS X version 10.4 and earlier

- 1 From the Finder desktop, choose **Go > Applications**.
- 2 From the Applications folder, double-click **Internet Connect**.
- 3 From the toolbar, click **AirPort**.

The SSID of the network the computer is connected to is displayed in the Network pop-up menu.

- 4 Write down the SSID.

For Macintosh users with a wireless access point

- 1 Type the IP address of the wireless access point in the address field of your Web browser, and then continue to step 2.

If you do not know the IP address of the wireless access point, then do the following:

- a From the Apple menu, choose **System Preferences**.
- b Click **Network**.
- c Click **AirPort**.
- d Click **Advanced > TCP/IP or TCP/IP**.

The "Router" entry is typically the wireless access point.

- 2 Type your user name and password when prompted.
- 3 Click **OK**.
- 4 On the main page, click **Wireless** or another selection where settings are stored. The SSID will be displayed.
- 5 Write down the SSID, security type and the WEP key/WPA passphrase (if shown).

Notes:

- Make sure you copy the network information down exactly, including any capital letters.
- Store the SSID and the WEP key or WPA passphrase in a safe place for future reference.

MAKE SURE YOUR OS IS COMPATIBLE WITH WIRELESS PRINTING THROUGH AIRPORT

The printer only supports wireless printing through AirPort base stations for Mac OS X 10.5 or later.

Wi-Fi indicator light is not lit

CHECK POWER

If the Wi-Fi indicator light is off, make sure the  light is on. If the  light is not on, check the following:

- Make sure the printer is plugged in and turned on.
- Make sure the printer is plugged into a working outlet.
- If the printer is plugged into a power strip, make sure it is turned on and working.

Wi-Fi indicator light is green but the printer does not print (Windows only)

If you have completed the configuration for wireless printing and all of the settings appear to be correct, but the printer does not print, then try one or more of the following:

ALLOW THE WIRELESS INSTALLATION TO COMPLETE

Do not attempt to print, remove the installation CD, or detach the installation cable until you see the Wireless Setup Successful screen.

ENABLE THE PRINTER

Confirm that the printer is enabled:

- 1 Click , or click **Start** and then click **Run**.
- 2 In the Start Search or Run box, type `control printers`.
- 3 Press **Enter**, or click **OK**.
The printer folder opens.
- 4 Right-click the new printer; from the menu, select **Use Printer Online**.
- 5 Close the Printers or Printers and Faxes window and try printing again.

SELECT THE WIRELESS PRINTER

You may need to select the wireless printer from your computer to use the printer wirelessly.

- 1 Click , or click **Start** and then click **Run**.
- 2 In the Start Search or Run box, type `control printers`.
- 3 Press **Enter**, or click **OK**.
The printer folder opens.
- 4 Right-click the printer in the folder with the matching name and model number followed by "(Network)."
- 5 Select **Use Printer Online** from the menu.
- 6 Close the Printers or Printers and Faxes window and try printing again.

SELECT THE WIRELESS PORT

If you have previously set up your printer as a locally attached printer, then you may need to select the wireless printer to use the printer wirelessly.

- 1 Click , or click **Start** and then click **Run**.
- 2 In the Start Search or Run box, type **control printers**.
- 3 Press **Enter**, or click **OK**.
The printer folder opens.
- 4 Right-click the printer, and then select **Properties** or **Printer properties** from the menu.
- 5 Click the **Ports** tab.
- 6 Locate the selected port. The selected port has a check beside it in the Port column.
- 7 If the Description column of the selected port indicates that it is a USB port, scroll through the list and select the port with Printer Port in the Description column. Check the printer model in the Printer column to make sure you select the right printer port.
- 8 Click **OK**, and then try to print again.

Wi-Fi indicator light is still orange

When the Wi-Fi indicator light is orange, it may indicate that the printer is:

- Not configured in infrastructure mode
- Waiting to make an ad hoc connection to another wireless device
- Not connected to a wireless network

The printer may be unable to join the network because of interference, its distance from the wireless access point (wireless router), or until its settings are changed.

These are possible solutions. Try one or more of the following:

CHECK NETWORK NAME

Make sure your network does not have the same name as another network near you. For example, if you and your neighbor both use a manufacturer's default network name, your printer could be connecting to your neighbor's network.

If you are not using a unique network name, consult the documentation for your wireless access point (wireless router) to learn how to set a network name.

If you set a new network name, you must reset the printer and computer SSID to the same network name.

CHECK SECURITY KEYS

If you are using WEP security

A valid WEP key is:

- Exactly 10 or 26 hexadecimal characters. Hexadecimal characters are A–F, a–f, and 0–9.
or
- Exactly 5 or 13 ASCII characters. ASCII characters are letters, numbers, and symbols found on a keyboard.

If you are using WPA security

A valid WPA passphrase is:

- From 8 to 63 ASCII characters. ASCII characters in a WPA passphrase are case-sensitive.
- or*
- Exactly 64 hexadecimal characters. Hexadecimal characters are A-F, a-f, and 0-9.

If your wireless network is not using security, then you will not have a security key. Using a wireless network with no security is not recommended because it can allow intruders to use your network resources without your consent.

MOVE THE COMPUTER AND/OR PRINTER CLOSER TO THE WIRELESS ACCESS POINT (WIRELESS ROUTER)

The possible distance between devices in 802.11b or 802.11g networks is 300 feet, while the wireless network range potentially doubles in 802.11n networks. The range of your wireless network depends on many factors, including the abilities of your router and network adapters. If you are having trouble printing, try placing the computer and printer no more than 100 feet apart.

You can find the strength of the network signal on the printer network setup page.

CHECK MAC ADDRESS

If your network uses MAC address filtering, make sure that you include the MAC address of the printer in the MAC address filter list. This will allow the printer to operate on the network.

Wi-Fi indicator light is blinking orange during installation

When the Wi-Fi indicator light is blinking orange, it indicates that the printer has been set up for wireless networking but cannot connect to the network for which it has been configured. The printer may be unable to join the network because of interference, its distance from the wireless access point (wireless router), or until its settings are changed.

These are possible solutions. Try one or more of the following:

MAKE SURE THE ACCESS POINT IS ON

Check the access point and, if necessary, turn it on.

MOVE YOUR ACCESS POINT TO MINIMIZE INTERFERENCE

There may be temporary interference from other devices such as microwave ovens or other appliances, cordless phones, baby monitors, and security system cameras. Make sure your access point is not positioned too closely to these devices.

MOVE THE COMPUTER AND/OR PRINTER CLOSER TO THE WIRELESS ACCESS POINT (WIRELESS ROUTER)

The possible distance between devices in 802.11b or 802.11g networks is 300 feet, while the wireless network range potentially doubles in 802.11n networks. The range of your wireless network depends on many factors, including the abilities of your router and network adapters. If you are having trouble printing, try placing the computer and printer no more than 100 feet apart.

You can find the signal strength of the network on the network setup page.

CHECK YOUR WEP KEY OR WPA PASSPHRASE

A WEP key or WPA passphrase is like a password. All devices on a WEP-secured wireless network must share the same WEP key, and all devices on a WPA-secured wireless network must share the same WPA passphrase.

Note: Make sure you copy it exactly, including any capital letters, and store it in a safe place for future reference.

If you are using WEP security

A valid WEP key is:

- Exactly 10 or 26 hexadecimal characters. Hexadecimal characters are A–F, a–f, and 0–9.
or
- Exactly 5 or 13 ASCII characters. ASCII characters are letters, numbers, and symbols found on a keyboard.

If you are using WPA security

A valid WPA passphrase is:

- From 8 to 63 ASCII characters. ASCII characters in a WPA passphrase are case-sensitive.
or
- Exactly 64 hexadecimal characters. Hexadecimal characters are A–F, a–f, and 0–9.

If your wireless network is not using security, then you will not have a security key. Using a wireless network with no security is not recommended because it can allow intruders to use your network resources without your consent.

CHECK MAC ADDRESS

If your network uses MAC address filtering, make sure that you include the MAC address of the printer in the MAC address filter list. This will allow the printer to operate on the network. For more information, see “How do I find the MAC address?” on page 126.

PING THE ACCESS POINT TO MAKE SURE THE NETWORK IS WORKING

For Windows users

- 1 If you do not already know it, find the IP address of the access point:
 - a Click , or click **Start** and then click **Run**.
 - b In the Start Search or Run box, type `cmd`.
 - c Press **Enter**, or click **OK**.
The Command Prompt window opens.
 - d Type `ipconfig`, and then press **Enter**.
 - The “Default Gateway” entry is typically the wireless access point.
 - The IP address appears as four sets of numbers separated by periods, such as 192.168.2.134.
- 2 Ping the access point:
 - a Click , or click **Start** and then click **Run**.
 - b In the Start Search or Run box, type `cmd`.
 - c Press **Enter**, or click **OK**.
The Command Prompt window opens.

d Type `ping` followed by a space and the IP address of the wireless access point. For example:
`ping 192.168.1.100`

e Press **Enter**.

3 Check to see whether the access point responds:

- If the access point responds, you will see several lines appear that start with “Reply from.” It is possible that the printer did not connect to the wireless network. Turn off and then restart the printer to try to connect again.
- If the access point does not respond, it will take several seconds and then you will see “Request timed out.”

Try the following:

- a** Click , or click **Start** and then click **Run**.
- b** In the Start Search or Run box, type `ncpa.cpl`, and then press **Enter**.
- c** Press **Enter** or click **OK**.
- d** Select the appropriate connection from the ones shown.
- e** Right-click the connection, and then click **Repair** or **Diagnose**.

For Macintosh users

1 Make sure AirPort is turned on:

- a** From the Apple menu, choose **System Preferences**.
- b** Click **Network**.

The AirPort status indicator should be green.

Notes:

- Yellow means the port is active but not connected.
- Red means the port has not been configured.

2 Obtain the IP address of the wireless access point:

- a** From the Apple menu, choose **About This Mac**.
- b** Click **More Info**.
- c** From the Contents pane, choose **Network**.
- d** From the Active Services list, choose **AirPort**.

The bottom pane lists the details of the AirPort connection.

e Write down the “Router” entry. This is typically the wireless access point.

3 Ping the wireless access point:

- a** From the Finder desktop, choose **Go > Utilities**.
- b** Double-click **Network Utility**.
- c** Click the **Ping** tab.

d In the network address field, type the IP address of the wireless access point (or router). For example:
`10.168.1.101`

e Click **Ping**.

4 If the wireless access point responds, you will see several lines that display the number of bytes received from the wireless access point. This ensures that your computer is connected to the wireless access point.

If the wireless access point does not respond, then nothing is displayed. You can use Network Diagnostics to help resolve the problem.

MAKE SURE YOUR COMPUTER CAN COMMUNICATE WITH THE PRINTER

For Windows users

1 Obtain the printer IP address by printing a network setup page.

2 Click , or click **Start** and then click **Run**.

3 In the Start Search or Run box, type `cmd`.

4 Press **Enter**, or click **OK**.

The Command Prompt window opens.

5 Type `ping` followed by a space and the IP address of the printer. For example:

```
ping 192.168.1.100
```

6 Press **Enter**.

7 If the printer responds, you will see several lines that display the number of bytes received from the printer. This ensures that your computer is communicating with your printer.

If the printer does not respond, then "Request timed out" displays.

- Your computer might not be connected to the network.
- You may need to change the settings of your printer. Run the Wireless Setup Utility again.

For Macintosh users

1 Obtain the printer IP address by printing a network setup page.

In the TCP/IP section, look for **Address**.

2 From the Finder desktop, choose **Go > Utilities**.

3 Double-click **Network Utility**.

4 Click the **Ping** tab.

5 Type the IP address of the printer in the network address field. For example:

```
10.168.1.101
```

6 Click **Ping**.

7 If the printer responds, you will see several lines that display the number of bytes received from the printer. This ensures that your computer is communicating with your printer.

If the printer does not respond, then nothing is displayed.

- Your computer might not be connected to the network. You can use Network Diagnostics to help resolve the problem.
- You may need to change the settings of your printer. Run the Wireless Setup Assistant again.

CONFIGURE THE PRINTER FOR WIRELESS ACCESS AGAIN

If your wireless settings have changed, you must run the printer wireless setup again. Some reasons your settings may have changed include your having manually changed your WEP or WPA keys, channel, or other network settings; or the access point having been reset to factory defaults.

Running the wireless setup again can also resolve issues due to misconfigurations that occurred when configuring the printer for wireless access.

Notes:

- If you change network settings, change them on all the network devices before changing them for the access point.
- If you have already changed the wireless network settings on your access point, then you must change the settings on all the other network devices before you can see them on the network.

For Windows users

- 1 Click  or **Start**.
- 2 Click **All Programs** or **Programs**, and then select the printer program folder from the list.
- 3 Select **Printer Home**.
- 4 Click the **Settings** tab.
- 5 Click the **Wireless setup utility** link.

Note: You may be prompted to connect the printer to the computer again using the installation cable as part of the setup process.

- 6 Follow the instructions on the computer screen.

For Macintosh users

- 1 From the Finder desktop, double-click the printer folder.
- 2 Double-click **Wireless Setup Assistant**.
- 3 Follow the instructions on the computer screen.

Wireless print server not installed

You may see a message during installation indicating that the printer does not have a wireless print server installed. If you are sure the printer is capable of wireless printing, try the following:

CHECK POWER

Make sure the  light is on.

“Communication not available” message displays when printing wirelessly

These are possible solutions. Try one or more of the following:

MAKE SURE YOUR COMPUTER AND PRINTER HAVE VALID IP ADDRESSES FOR THE NETWORK

If you are using a laptop and have power saving settings enabled, you may see the “Communication not available” message on your computer screen when you attempt to print wirelessly. This can occur if the laptop hard drive has powered down.

If you see this message, wait a few seconds and then try to print again. The laptop and printer require a few seconds to power up again and reattach to the wireless network.

If you see this message again after you have waited long enough for the printer and the laptop to attach to the network, there may be a problem with your wireless network.

Make sure that the laptop and printer have both received IP addresses:

For Windows users

- 1 Click , or click **Start** and then click **Run**.
- 2 In the Start Search or Run box, type `cmd`.
- 3 Press **Enter**, or click **OK**.
The Command Prompt window opens.
- 4 Type `ipconfig`, and then press **Enter**.
The IP address appears as four sets of numbers separated by periods, such as 192.168.0.100.

For Macintosh users

- 1 From the Apple menu, choose **About This Mac**.
- 2 Click **More Info**.
- 3 From the Contents pane, choose **Network**.
- 4 If you are connected over a wireless network, choose **AirPort** from the Active Services list.

How to locate a printer IP address

- You can locate the printer IP address by viewing the printer network setup page.

If the printer and/or the laptop does not have an IP address, or if either has an address of 169.254.x.y (where x and y are any two numbers between 0 and 255):

- 1 Turn off the device that does not have a valid IP address (the laptop, the printer, or both).
- 2 Turn on the device(s).
- 3 Check the IP addresses again.

If the laptop and/or printer still does not receive a valid IP address, there is a problem with your wireless network. Try the following:

- Make sure your wireless access point (wireless router) is turned on and is working.
- Remove any objects that could be blocking the signal.

- Temporarily turn off any unnecessary wireless devices on your network and pause any network-intensive activities, like large file transfers or network games. If the network is too busy, it is possible that the printer is not receiving the IP address within the allowed time.
- Make sure your DHCP server, which may also be your wireless router, is working and is configured to assign IP addresses. If you are not sure how to do this, refer to the manual that came with your wireless router for more information.

If the printer and computer have valid IP addresses and the network is operating correctly, continue troubleshooting.

MAKE SURE THE WIRELESS PORT IS SELECTED

Note: This solution applies to Windows users only

- 1 Click , or click **Start** and then click **Run**.
- 2 In the Start Search or Run box, type `control printers`.
- 3 Press **Enter**, or click **OK**.
The printer folder opens.
- 4 Right-click the printer, and then select **Properties** or **Printer properties** from the menu.
- 5 Click the **Ports** tab.
- 6 Locate the selected port. The selected port has a check beside it in the Port column.
- 7 If the Description column of the selected port indicates that it is a USB port, scroll through the list and select the port with Printer Port in the Description column. Check the printer model in the Printer column to make sure you select the right printer port.
- 8 Click **OK**, and then try to print again.

MAKE SURE BIDIRECTIONAL COMMUNICATION IS ENABLED

Note: This solution applies to Windows users only

- 1 Click , or click **Start** and then click **Run**.
- 2 In the Start Search or Run box, type `control printers`.
- 3 Press **Enter**, or click **OK**.
The printer folder opens.
- 4 Right-click the printer, and then select **Properties** or **Printer properties** from the menu.
- 5 Click the **Ports** tab.
- 6 Click the box next to **Enable bidirectional support** if it is not already checked.
- 7 Click **Apply**.
- 8 Click **OK**, and then try to print again.

Resolving intermittent wireless communications issues

You may notice that your printer works for a short time and then stops working, although apparently nothing has changed on your wireless network.

Many different issues can interrupt network communications, and sometimes more than one problem exists at the same time. These are possible solutions. Try one or more of the following:

DISCONNECT FROM ALL VPNs WHEN ATTEMPTING TO USE THE WIRELESS NETWORK

Most Virtual Private Networks (VPNs) allow computers to communicate with only the VPN and no other network at the same time. Disconnect from the VPN before installing the driver on the computer or before running the wireless setup on the computer.

To check if the computer is currently connected to a VPN, open your VPN Client software and check your VPN connections. If you do not have a VPN Client software installed, check the connections manually using the Windows VPN Client.

If you would like to have the ability to connect to your local network and to a VPN at the same time, the system support person for the VPN must enable split tunneling. Be aware that some organizations will not allow split tunneling due to security or technical concerns.

TURN OFF THE WIRELESS ACCESS POINT (WIRELESS ROUTER) AND TURN IT BACK ON AGAIN

ELIMINATE NETWORK CONGESTION

If a wireless network is too busy, the computer and printer may have difficulty communicating with each other. Some causes of wireless network congestion can include:

- Transferring large files across the network
- Networked games
- Peer-to-peer file swapping applications
- Streaming video
- Too many computers on the wireless network at once

ELIMINATE SOURCES OF INTERFERENCE

Common household items can potentially disrupt wireless network communications. Cordless phones (but not cellular phones), microwave ovens, baby monitors, almost any kitchen appliance, wireless surveillance equipment, nearby wireless networks, and any appliance containing a motor can disrupt wireless network communications.

Try turning on any potential sources of interference and see if it causes the problem. If it does, separate your wireless network from the device.

CHANGE THE CHANNEL THE WIRELESS ROUTER USES

You can sometimes eliminate interference from unknown sources by changing the channel your wireless router uses to broadcast. There are three distinct channels on a router. Check the documentation that came with your router to determine which three apply. Other channels are offered as options, but these overlap. If the router is configured to use the default settings, change the channel setting to use a different distinct channel. Refer to the manual that came with your wireless router if you are not sure how to change the channel.

CONFIGURE THE WIRELESS ROUTER WITH A UNIQUE SSID

Many wireless networks use the SSID that the router was originally configured by the manufacturer to use. Using the default SSID can cause problems when more than one network is operating in the same area with the same SSID. The printer or computer may attempt to attach to the wrong network, although it will appear to be trying to connect to the correct network.

To avoid this type of interference, change the SSID on your wireless router from the default. Refer to the manual that came with your router if you are not sure how to change the SSID.

Note: You must change the SSID on all of the other devices that access your wireless network if you change the SSID on the router.

ASSIGN STATIC IP ADDRESSES TO ALL DEVICES IN THE NETWORK

Most wireless networks use a DHCP server (dynamic host configuration protocol) built in to the wireless router to assign IP addresses to clients on the wireless network. DHCP addresses are assigned when they are needed, as when a new device is added to the wireless network or when it is powered on. Wireless devices must send a request to the router, and receive an IP address in response so they can function on the network. Because the router performs many other tasks besides assigning addresses, it sometimes does not respond quickly enough with an address. The requesting device sometimes gives up before it receives an address.

Try assigning static IP addresses to the devices in your network to resolve this issue. Static IP addresses cut down on the work your wireless router has to do. Refer to the manual that came with your router and your operating system documentation if you are not sure how to assign static IP addresses.

To assign a static IP address to the printer, do the following:

- 1 Complete the wireless setup, allowing the printer to receive a DHCP address from a DHCP server on the network.
- 2 Print a network setup page to see what IP address is currently assigned to the printer.
- 3 Open a Web browser and then type the printer IP address in the address field. Press **Enter**.
The printer Web page loads.
- 4 Click the **Configuration** link.
- 5 Click the **TCP/IP** link.
- 6 Click the **Set Static IP Address** link.
- 7 Type the IP address you want to assign to the printer in the **IP Address** field.
- 8 Click the **Submit** button.

The Submitting Selection message appears.

Confirm that the IP address is updated by typing the static IP address in the browser address field and checking to see if the printer Web page reloads.

CHECK FOR KNOWN ISSUES WITH THE WIRELESS ROUTER

Some wireless routers have documented defects that were identified and resolved by the manufacturers. Visit the company Web site of the router manufacturer. Check for firmware updates and other advice from the manufacturer. Check the manual that came with your wireless router if you are not sure how to reach the manufacturer Web site.

CHECK FOR WIRELESS ADAPTER UPDATES

If you are having trouble printing from one particular computer, check the Web site of the manufacturer of the network adapter card in that computer. It is possible that there is an updated driver available that could resolve the issue.

CHANGE ALL NETWORK DEVICES TO THE SAME TYPE

While it is possible to successfully mix 802.11b, 802.11g, and 802.11n devices on the same wireless network, the faster devices will sometimes prevent the slower devices from communicating. Wireless devices are designed to wait for a gap in wireless network communications before attempting to send information. If newer, faster devices are constantly using the wireless network, then older, slower devices will not have a chance to send data.

Try only turning on the network devices of the same type and see if network communications improve. If this solves the problem, you may want to upgrade your older devices with newer network adapters.

PURCHASE A NEW ROUTER

If your router is several years old, it may not be fully compatible with the newer wireless devices on your network. Consider purchasing a newer router that is fully compliant with the 802.11 IEEE specifications.

Federal Communications Commission (FCC) compliance information statement

This product has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The FCC Class B limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult your point of purchase or service representative for additional suggestions.

The manufacturer is not responsible for radio or television interference caused by using other than recommended cables or by unauthorized changes or modifications to this equipment. Unauthorized changes or modifications could void the user's authority to operate this equipment.

Note: To assure compliance with FCC regulations on electromagnetic interference for a Class B computing device, use a properly shielded and grounded cable such as Lexmark part number 1021294 for USB attach. Use of a substitute cable not properly shielded and grounded may result in a violation of FCC regulations.

Any questions regarding this compliance information statement should be directed to:

Director of Lexmark Technology & Services
Lexmark International, Inc.

Noise emission levels

The following measurements were made in accordance with ISO 7779 and reported in conformance with ISO 9296.

Note: Some modes may not apply to your product.

1-meter average sound pressure, dBA	
Printing	52 dBA
Scanning	47 dBA
Copying	52 dBA
Ready	inaudible

Values are subject to change. See www.lexmark.com for current values.

Temperature information

Ambient temperature	15–32° C (60–90° F)
Shipping temperature	-40–60° C (-40–140° F)
Storage temperature	1–60° C (34–140° F)

Waste from Electrical and Electronic Equipment (WEEE) directive

The WEEE logo signifies specific recycling programs and procedures for electronic products in countries of the European Union. We encourage the recycling of our products. If you have further questions about recycling options, visit the Lexmark Web site at www.lexmark.com for your local sales office phone number.

Product disposal

Do not dispose of the printer or supplies in the same manner as normal household waste. Consult your local authorities for disposal and recycling options.

Battery notice

This product contains Perchlorate material. Special handling may apply. For more information, go to <http://www.dtsc.ca.gov/hazardouswaste/perchlorate/>.

ENERGY STAR

Any Lexmark product bearing the ENERGY STAR emblem on the product or on a start-up screen is certified to comply with Environmental Protection Agency (EPA) ENERGY STAR requirements as configured when shipped by Lexmark.

Power consumption

Product power consumption

The following table documents the power consumption characteristics of the product.

Note: Some modes may not apply to your product.

Mode	Description	Power consumption (Watts)
Printing	The product is generating hard-copy output from electronic inputs.	21
Copying	The product is generating hard-copy output from hard-copy original documents.	13
Scanning	The product is scanning hard-copy documents.	11
Ready	The product is waiting for a print job.	10.5
Power Saver	The product is in energy-saving mode.	4.3
Off	The product is plugged into a wall outlet, but the power switch is turned off.	0.43

The power consumption levels listed in the previous table represent time-averaged measurements. Instantaneous power draws may be substantially higher than the average.

Values are subject to change. See www.lexmark.com for current values.

Power Saver

This product is designed with an energy-saving mode called Power Saver. The Power Saver Mode is equivalent to the Sleep Mode. The Power Saver Mode saves energy by lowering power consumption during extended periods of inactivity. The Power Saver Mode is automatically engaged after this product is not used for a specified period of time, called the Power Saver Timeout.

Factory default Power Saver Timeout for this product (in minutes):	60
--	----

By using the configuration menus, the Power Saver Timeout can be modified between 1 minute and 240 minutes. Setting the Power Saver Timeout to a low value reduces energy consumption, but may increase the response time of the product. Setting the Power Saver Timeout to a high value maintains a fast response, but uses more energy.

Off mode

If this product has an off mode which still consumes a small amount of power, then to completely stop product power consumption, disconnect the power supply cord from the wall outlet.

Total energy usage

It is sometimes helpful to calculate the total product energy usage. Since power consumption claims are provided in power units of Watts, the power consumption should be multiplied by the time the product spends in each mode in order to calculate energy usage. The total product energy usage is the sum of each mode's energy usage.

LEXMARK LICENSE AGREEMENTS

PLEASE READ CAREFULLY: BY USING THIS PRODUCT, YOU AGREE TO BE BOUND BY ALL THE TERMS AND CONDITIONS OF THESE LICENSE AGREEMENTS. IF YOU DO NOT AGREE WITH THE TERMS OF THESE LICENSE AGREEMENTS, PROMPTLY RETURN THE PRODUCT UNUSED AND REQUEST A REFUND OF THE AMOUNT YOU PAID. IF YOU ARE INSTALLING THIS PRODUCT FOR USE BY OTHER PARTIES, YOU AGREE TO INFORM THE USERS THAT USE OF THE PRODUCT INDICATES ACCEPTANCE OF THESE TERMS.

CARTRIDGE LICENSE AGREEMENT

I agree that the patented print cartridge(s) shipped with this printing device are sold subject to the following license/agreement: The patented print cartridge(s) contained inside is/are licensed for a single use only and is/are designed to stop working after delivering a fixed amount of ink. A variable amount of ink will remain in the cartridge when replacement is required. After this single use, the license to use the print cartridge terminates, and the used cartridge must be returned only to Lexmark for remanufacturing, refilling or recycling. If I buy another cartridge in the future that is sold subject to the above terms, I accept such terms as to that cartridge. If you do not accept the terms of this single use license/agreement; return this product in its original packaging to your point of purchase. A replacement cartridge sold without these terms is available at www.lexmark.com.

LEXMARK SOFTWARE LICENSE AGREEMENT

This Software License Agreement ("License Agreement") is a legal agreement between you (either an individual or a single entity) and Lexmark International, Inc. ("Lexmark") that, to the extent your Lexmark product or Software Program is not otherwise subject to a written software license agreement between you and Lexmark or its suppliers, governs your use of any Software Program installed on or provided by Lexmark for use in connection with your Lexmark product. The term "Software Program" includes machine-readable instructions, audio/visual content (such as images and recordings), and associated media, printed materials and electronic documentation, whether incorporated into, distributed with or for use with your Lexmark product.

- 1 STATEMENT OF LIMITED WARRANTY.** Lexmark warrants that the media (e.g., diskette or compact disk) on which the Software Program (if any) is furnished is free from defects in materials and workmanship under normal use during the warranty period. The warranty period is ninety (90) days and commences on the date the Software Program is delivered to the original end-user. This limited warranty applies only to Software Program media purchased new from Lexmark or an Authorized Lexmark Reseller or Distributor. Lexmark will replace the Software Program should it be determined that the media does not conform to this limited warranty.
- 2 DISCLAIMER AND LIMITATION OF WARRANTIES.** EXCEPT AS PROVIDED IN THIS LICENSE AGREEMENT AND TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, LEXMARK AND ITS SUPPLIERS PROVIDE THE SOFTWARE PROGRAM "AS IS" AND HEREBY DISCLAIM ALL OTHER WARRANTIES AND CONDITIONS, EITHER EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, TITLE, NON-INFRINGEMENT, MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, AND ABSENCE OF VIRUSES, ALL WITH REGARD TO THE SOFTWARE PROGRAM. This Agreement is to be read in conjunction with certain statutory provisions, as that may be in force from time to time, that imply warranties or conditions or impose obligations on Lexmark that cannot be excluded or modified. If any such provisions apply, then to the extent Lexmark is able, Lexmark hereby limits its liability for breach of those provisions to one of the following: replacement of the Software Program or reimbursement of the price paid for the Software Program.
- 3 LICENSE GRANT.** Lexmark grants you the following rights provided you comply with all terms and conditions of this License Agreement:
 - a Use.** You may Use one (1) copy of the Software Program. The term "Use" means storing, loading, installing, executing, or displaying the Software Program. If Lexmark has licensed the Software Program to you for concurrent use, you must limit the number of authorized users to the number specified in your agreement with Lexmark. You may not separate the components of the Software Program for use on more than one computer. You agree that you will not Use the Software Program, in whole or in part, in any manner that has the effect of overriding, modifying, eliminating, obscuring, altering or de-emphasizing the visual appearance of any trademark, trade name, trade dress or intellectual property notice that appears on any computer display screens normally generated by, or as a result of, the Software Program.
 - b Copying.** You may make one (1) copy of the Software Program solely for purposes of backup, archiving, or installation, provided the copy contains all of the original Software Program's proprietary notices. You may not copy the Software Program to any public or distributed network.
 - c Reservation of Rights.** The Software Program, including all fonts, is copyrighted and owned by Lexmark International, Inc. and/or its suppliers. Lexmark reserves all rights not expressly granted to you in this License Agreement.
 - d Freeware.** Notwithstanding the terms and conditions of this License Agreement, all or any portion of the Software Program that constitutes software provided under public license by third parties ("Freeware") is licensed to you subject to the terms and conditions of the software license agreement accompanying such Freeware, whether in the form of a discrete agreement, shrink-wrap license, or electronic license terms at the time of download. Use of the Freeware by you shall be governed entirely by the terms and conditions of such license.
- 4 TRANSFER.** You may transfer the Software Program to another end-user. Any transfer must include all software components, media, printed materials, and this License Agreement and you may not retain copies of the Software Program or components thereof. The transfer may not be an indirect transfer, such as a consignment. Prior to the

transfer, the end-user receiving the transferred Software Program must agree to all these License Agreement terms. Upon transfer of the Software Program, your license is automatically terminated. You may not rent, sublicense, or assign the Software Program except to the extent provided in this License Agreement, and any attempt to do so shall be void.

- 5 UPGRADES.** To Use a Software Program identified as an upgrade, you must first be licensed to the original Software Program identified by Lexmark as eligible for the upgrade. After upgrading, you may no longer use the original Software Program that formed the basis for your upgrade eligibility.
- 6 LIMITATION ON REVERSE ENGINEERING.** You may not alter, decrypt, reverse engineer, reverse assemble, reverse compile or otherwise translate the Software Program, except as and to the extent expressly permitted to do so by applicable law for the purposes of inter-operability, error correction, and security testing. If you have such statutory rights, you will notify Lexmark in writing of any intended reverse engineering, reverse assembly, or reverse compilation. You may not decrypt the Software Program unless necessary for the legitimate Use of the Software Program.
- 7 ADDITIONAL SOFTWARE.** This License Agreement applies to updates or supplements to the original Software Program provided by Lexmark unless Lexmark provides other terms along with the update or supplement.
- 8 LIMITATION OF REMEDIES.** To the maximum extent permitted by applicable law, the entire liability of Lexmark, its suppliers, affiliates, and resellers, and your exclusive remedy shall be as follows: Lexmark will provide the express limited warranty described above. If Lexmark does not remedy defective media as warranted, you may terminate your license and your money will be refunded upon the return of all of your copies of the Software Program.
- 9 LIMITATION OF LIABILITY.** To the maximum extent permitted by applicable law, for any claim arising out of Lexmark's limited warranty, or for any other claim whatsoever related to the subject matter of this Agreement, Lexmark's and its suppliers' liability for all types of damages, regardless of the form of action or basis (including contract, breach, estoppel, negligence, misrepresentation, or tort), shall be limited to the greater of \$5,000 or the money paid to Lexmark or its Authorized remarketers for the license hereunder for the Software Program that caused the damages or that is the subject matter of, or is directly related to, the cause of action.

IN NO EVENT WILL LEXMARK, ITS SUPPLIERS, SUBSIDIARIES, OR RESELLERS BE LIABLE FOR ANY SPECIAL, INCIDENTAL, INDIRECT, EXEMPLARY, PUNITIVE, OR CONSEQUENTIAL DAMAGES (INCLUDING BUT NOT LIMITED TO LOST PROFITS OR REVENUES, LOST SAVINGS, INTERRUPTION OF USE OR ANY LOSS OF, INACCURACY IN, OR DAMAGE TO, DATA OR RECORDS, FOR CLAIMS OF THIRD PARTIES, OR DAMAGE TO REAL OR TANGIBLE PROPERTY, FOR LOSS OF PRIVACY ARISING OUT OR IN ANY WAY RELATED TO THE USE OF OR INABILITY TO USE THE SOFTWARE PROGRAM, OR OTHERWISE IN CONNECTION WITH ANY PROVISION OF THIS LICENSE AGREEMENT), REGARDLESS OF THE NATURE OF THE CLAIM, INCLUDING BUT NOT LIMITED TO BREACH OF WARRANTY OR CONTRACT, TORT (INCLUDING NEGLIGENCE OR STRICT LIABILITY), AND EVEN IF LEXMARK, OR ITS SUPPLIERS, AFFILIATES, OR REMARKETERS HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, OR FOR ANY CLAIM BY YOU BASED ON A THIRD-PARTY CLAIM, EXCEPT TO THE EXTENT THIS EXCLUSION OF DAMAGES IS DETERMINED LEGALLY INVALID. THE FOREGOING LIMITATIONS APPLY EVEN IF THE ABOVE-STATED REMEDIES FAIL OF THEIR ESSENTIAL PURPOSE.
- 10 TERM.** This License Agreement is effective unless terminated or rejected. You may reject or terminate this license at any time by destroying all copies of the Software Program, together with all modifications, documentation, and merged portions in any form, or as otherwise described herein. Lexmark may terminate your license upon notice if you fail to comply with any of the terms of this License Agreement. Upon such termination, you agree to destroy all copies of the Software Program together with all modifications, documentation, and merged portions in any form.
- 11 TAXES.** You agree that you are responsible for payment of any taxes including, without limitation, any goods and services and personal property taxes, resulting from this Agreement or your Use of the Software Program.
- 12 LIMITATION ON ACTIONS.** No action, regardless of form, arising out of this Agreement may be brought by either party more than two years after the cause of action has arisen, except as provided under applicable law.

- 13 APPLICABLE LAW.** This Agreement is governed by the laws of the Commonwealth of Kentucky, United States of America. No choice of law rules in any jurisdiction shall apply. The UN Convention on Contracts for the International Sale of Goods shall not apply.
- 14 UNITED STATES GOVERNMENT RESTRICTED RIGHTS.** The Software Program has been developed entirely at private expense. Rights of the United States Government to use the Software Program is as set forth in this Agreement and as restricted in DFARS 252.227-7014 and in similar FAR provisions (or any equivalent agency regulation or contract clause).
- 15 CONSENT TO USE OF DATA.** You agree that Lexmark, its affiliates, and agents may collect and use information you provide in relation to support services performed with respect to the Software Program and requested by you. Lexmark agrees not to use this information in a form that personally identifies you except to the extent necessary to provide such services.
- 16 EXPORT RESTRICTIONS.** You may not (a) acquire, ship, transfer, or reexport, directly or indirectly, the Software Program or any direct product therefrom, in violation of any applicable export laws or (b) permit the Software Program to be used for any purpose prohibited by such export laws, including, without limitation, nuclear, chemical, or biological weapons proliferation.
- 17 AGREEMENT TO CONTRACT ELECTRONICALLY.** You and Lexmark agree to form this License Agreement electronically. This means that when you click the “Agree” or “Yes” button on this page or use this product, you acknowledge your agreement to these License Agreement terms and conditions and that you are doing so with the intent to “sign” a contract with Lexmark.
- 18 CAPACITY AND AUTHORITY TO CONTRACT.** You represent that you are of the legal age of majority in the place you sign this License Agreement and, if applicable, you are duly authorized by your employer or principal to enter into this contract.
- 19 ENTIRE AGREEMENT.** This License Agreement (including any addendum or amendment to this License Agreement that is included with the Software Program) is the entire agreement between you and Lexmark relating to the Software Program. Except as otherwise provided for herein, these terms and conditions supersede all prior or contemporaneous oral or written communications, proposals, and representations with respect to the Software Program or any other subject matter covered by this License Agreement (except to the extent such extraneous terms do not conflict with the terms of this License Agreement, any other written agreement signed by you and Lexmark relating to your Use of the Software Program). To the extent any Lexmark policies or programs for support services conflict with the terms of this License Agreement, the terms of this License Agreement shall control.

Contains Flash®, Flash® Lite™ and/or Reader® technology by Adobe Systems Incorporated

This Product contains Adobe® Flash® player software under license from Adobe Systems Incorporated, Copyright © 1995-2007 Adobe Macromedia Software LLC. All rights reserved. Adobe, Reader and Flash are trademarks of Adobe Systems Incorporated.

European Community (EC) directives conformity

This product is in conformity with the protection requirements of EC Council directives 2004/108/EC and 2006/95/EC on the approximation and harmonization of the laws of the Member States relating to electromagnetic compatibility and safety of electrical equipment designed for use within certain voltage limits.

The manufacturer of this product is: Lexmark International, Inc., 740 West New Circle Road, Lexington, KY, 40550 USA. The authorized representative is: Lexmark International Technology Hungária Kft., 8 Lechner Ödön fasor, Millennium Tower III, 1095 Budapest HUNGARY, A declaration of conformity to the requirements of the Directives is available upon request from the Authorized Representative.

This product satisfies the Class B limits of EN 55022 and safety requirements of EN 60950.

Industry Canada compliance statement

This Class B digital apparatus meets all requirements of the Canadian Interference-Causing Equipment Standard ICES-003.

Avis de conformité aux normes de l'industrie du Canada

Cet appareil numérique de classe B est conforme aux exigences de la norme canadienne relative aux équipements pouvant causer des interférences NMB-003.

Regulatory notices for telecommunication terminal equipment

This section contains regulatory information pertaining to products that contain telecommunication terminal equipment such as facsimile.

Notice to users of the US telephone network: FCC requirements

This equipment complies with Part 68 of the FCC rules and the requirements adopted by the Administrative Council for Terminal Attachments (ACTA). On the back of this equipment is a label that contains, among other information, a product identifier in the format US:AAAEQ##TXXXX. If requested, this number must be provided to your telephone company.

This equipment uses the RJ-11C Universal Service Order Code (USOC) jack.

A plug and jack used to connect this equipment to the premises' wiring and telephone network must comply with the applicable FCC Part 68 rules and requirements adopted by the ACTA. A compliant telephone cord and modular plug is provided with this product. It is designed to be connected to a compatible modular jack that is also compliant. See your setup documentation for more information.

The Ringer Equivalence Number (REN) is used to determine the number of devices that may be connected to a telephone line. Excessive RENs on a telephone line may result in the devices not ringing in response to an incoming call. In most but not all areas, the sum of RENs should not exceed five (5.0). To be certain of the number of devices that may be connected to a line, as determined by the total RENs, contact your local telephone company. For products approved after July 23, 2001, the REN for this product is part of the product identifier that has the format US:AAAEQ##TXXXX. The digits represented by ## are the REN without a decimal point (for example, 03 is a REN of 0.3). For earlier products, the REN is shown separately on the label.

If this equipment causes harm to the telephone network, the telephone company will notify you in advance that temporary discontinuance of service may be required. If advance notice is not practical, the telephone company will notify the customer as soon as possible. You will also be advised of your right to file a complaint with the FCC.

The telephone company may make changes in its facilities, equipment, operations or procedures that could affect the operation of this equipment. If this happens, the telephone company will provide advance notice in order for you to make necessary modifications to maintain uninterrupted service.

If you experience trouble with this equipment, for repair or warranty information, contact Lexmark International, Inc. at **www.lexmark.com** or your Lexmark representative. If the equipment is causing harm to the telephone network, the telephone company may request that you disconnect the equipment until the problem is resolved.

This equipment contains no user serviceable parts. For repair and warranty information, contact Lexmark International, Inc. See the previous paragraph for contact information.

Connection to party line service is subject to state tariffs. Contact the state public utility commission, public service commission, or corporation commission for information.

If your home has specially wired alarm equipment connected to the telephone line, ensure the installation of this equipment does not disable your alarm equipment. If you have questions about what will disable alarm equipment, consult your telephone company or a qualified installer.

Telephone companies report that electrical surges, typically lightning transients, are very destructive to customer terminal equipment connected to AC power sources. This has been identified as a major nationwide problem. It is recommended that the customer install an appropriate AC surge arrester in the AC outlet to which this device is connected. An appropriate AC surge arrester is defined as one that is suitably rated, and certified by UL (Underwriter's Laboratories), another NRTL (Nationally Recognized Testing Laboratory), or a recognized safety certification body in the country/region of use. This is to avoid damage to the equipment caused by local lightning strikes and other electrical surges.

The Telephone Consumer Protection Act of 1991 makes it unlawful for any person to use a computer or other electronic device, including fax machines, to send any message unless said message clearly contains in a margin at the top or bottom of each transmitted page or on the first page of the transmission, the date and time it is sent and an identification of the business or other entity, or other individual sending the message, and the telephone number of the sending machine or such business, other entity, or individual. (The telephone number provided may not be a 900 number or any other number for which charges exceed local or long-distance transmission charges.)

See your user documentation in order to program this information into your fax machine.

South Africa telecommunications notice

This modem must be used in conjunction with an approved surge protection device when connected to the PSTN.

Notice to users of the Canadian telephone network

This product meets the applicable Industry Canada technical specifications. The Ringer Equivalence Number (REN) is an indication of the maximum number of terminals allowed to be connected to a telephone interface. The terminus of an interface may consist of any combination of devices, subject only to the requirement that the sum of the RENs of all the devices does not exceed five. The modem REN is located on the rear of the equipment on the product labeling.

Telephone companies report that electrical surges, typically lightning transients, are very destructive to customer terminal equipment connected to AC power sources. This has been identified as a major nationwide problem. It is recommended that the customer install an appropriate AC surge arrester in the AC outlet to which this device is connected. An appropriate AC surge arrester is defined as one that is suitably rated, and certified by UL (Underwriter's

Laboratories), another NRTL (Nationally Recognized Testing Laboratory), or a recognized safety certification body in the country/region of use. This is to avoid damage to the equipment caused by local lightning strikes and other electrical surges.

This equipment uses CA11A telephone jacks.

Avis réservé aux utilisateurs du réseau téléphonique du Canada

Ce produit est conforme aux spécifications techniques d'Industrie Canada. Le numéro REN (ringer equivalence number : numéro d'équivalence de sonnerie) fournit une indication du nombre maximum de terminaux pouvant être connectés à l'interface téléphonique. En bout de ligne, le nombre d'appareils qui peuvent être connectés n'est pas directement limité, mais la somme des REN de ces appareils ne doit pas dépasser cinq. Le numéro REN du modem est indiqué sur l'étiquette produit située à l'arrière de l'équipement.

Les compagnies de téléphone constatent que les surtensions électriques, en particulier celles dues à la foudre, entraînent d'importants dégâts sur les terminaux privés connectés à des sources d'alimentation CA. Il s'agit-là d'un problème majeur d'échelle nationale. En conséquence, il vous est recommandé de brancher un parasurtenseur dans la prise de courant à laquelle l'équipement est connecté. Utilisez un parasurtenseur répondant à des caractéristiques nominales satisfaisantes et certifié par le laboratoire d'assureurs UL (Underwriter's Laboratories), un autre laboratoire agréé de type NRTL (Nationally Recognized Testing Laboratory) ou un organisme de certification agréé dans votre région ou pays. Ceci prévient tout endommagement de l'équipement causé par les orages et autres surtensions électriques.

Cet équipement utilise des prises de téléphone CA11A.

Notice to users of the New Zealand telephone network

The following are special conditions for the Facsimile User Instructions. The grant of a telepermit for any item of terminal equipment indicates only that Telecom has accepted that the item complies with minimum conditions for connection to its network. It indicates no endorsement of the product by Telecom, nor does it provide any sort of warranty. Above all, it provides no assurance that any item will work correctly in all respects with another item of telepermitted equipment of a different make or model, nor does it imply that any product is compatible with all of Telecom's network services.

This equipment shall not be set up to make automatic calls to the Telecom's 111 Emergency Service.

This equipment may not provide for the effective hand-over of a call to another device connected to the same line.

This equipment should not be used under any circumstances that may constitute a nuisance to other Telecom customers.

Some parameters required for compliance with Telecom's telepermit requirements are dependent on the equipment associated with this device. The associated equipment shall be set to operate within the following limits for compliance to Telecom's specifications:

- There shall be no more than 10 call attempts to the same number within any 30 minute period for any single manual call initiation, and
- The equipment shall go on-hook for a period of not less than 30 seconds between the end of one attempt and the beginning of the next call attempt.
- The equipment shall be set to ensure that automatic calls to different numbers are spaced such that there is not less than 5 seconds between the end of one call attempt and the beginning of another.

Using this product in Switzerland

This product requires a Swiss billing tone filter (Lexmark part number 14B5109 or 80D1877) to be installed on any line which receives metering pulses in Switzerland. The Lexmark filter must be used, as metering pulses are present on all analog telephone lines in Switzerland.

Utilisation de ce produit en Suisse

Cet appareil nécessite l'utilisation d'un filtre de tonalité de facturation suisse (n° de référence Lexmark : 14B5109 ou 80D1877) devant être installé sur toute ligne recevant des impulsions de comptage en Suisse. Ce filtre doit être utilisé pour toute installation car ces impulsions existent sur toutes les lignes téléphoniques suisses.

Verwendung dieses Produkts in der Schweiz

Für dieses Produkt muss ein schweizerischer Billing Tone Filter zur Zählzeichenübertragung (Lexmark Teilenummer 14B5109 oder 80D1877) für jede Leitung installiert werden, über die in der Schweiz Zeitsteuertakte übertragen werden. Die Verwendung des Lexmark Filters ist obligatorisch, da in allen analogen Telefonleitungen in der Schweiz Zeitsteuertakte vorhanden sind.

Uso del prodotto in Svizzera

Questo prodotto richiede un filtro toni Billing svizzero, (codice Lexmark 14B5109 o 80D1877) da installare su tutte le linee che ricevono impulsi remoti in Svizzera. È necessario utilizzare il filtro Lexmark poiché gli impulsi remoti sono presenti su tutte le linee analogiche in Svizzera.

Notice to Users in the European Union

Products bearing the CE mark are in conformity with the protection requirements of EC Council directives 2004/108/EC, 2006/95/EC, and 1999/5/EC on the approximation and harmonization of the laws of the Member States relating to electromagnetic compatibility, safety of electrical equipment designed for use within certain voltage limits and on radio equipment and telecommunications terminal equipment.

Compliance is indicated by the CE marking.

The manufacturer of this product is: Lexmark International, Inc., 740 West New Circle Road, Lexington, KY, 40550 USA. The authorized representative is: Lexmark International Technology Hungária Kft., 8 Lechner Ödön fasor, Millennium Tower III, 1095 Budapest HUNGARY, A declaration of conformity to the requirements of the Directives is available upon request from the Authorized Representative.

Refer to the table at the end of the Notices section for further compliance information.

Regulatory notices for wireless products

This section contains the following regulatory information pertaining to wireless products that contain transmitters, for example, but not limited to, wireless network cards or proximity card readers.

Exposure to radio frequency radiation

The radiated output power of this device is far below the radio frequency exposure limits of the FCC and other regulatory agencies. A minimum separation of 20 cm (8 inches) must be maintained between the antenna and any persons for this device to satisfy the RF exposure requirements of the FCC and other regulatory agencies.

Notice to users in Brazil

Este equipamento opera em caráter secundário, isto é, não tem direito a proteção contra interferência prejudicial, mesmo de estações do mesmo tipo, e não pode causar interferência a sistemas operando em caráter primário. (Res. ANATEL 282/2001).

Industry Canada (Canada)

This device complies with Industry Canada specification RSS-210. Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

This device has been designed to operate only with the antenna provided. Use of any other antenna is strictly prohibited per regulations of Industry Canada.

To prevent radio interference to the licensed service, this device is intended to be operated indoors and away from windows to provide maximum shielding. Equipment (or its transmit antenna) that is installed outdoors is subject to licensing.

The installer of this radio equipment must ensure that the antenna is located or pointed such that it does not emit RF fields in excess of Health Canada limits for the general population; consult Safety Code 6, obtainable from Health Canada's Web site www.hc-sc.gc.ca/rpb.

The term "IC:" before the certification/registration number only signifies that the Industry Canada technical specifications were met.

Industry Canada (Canada)

Cet appareil est conforme à la norme RSS-210 d'Industry Canada. Son fonctionnement est soumis aux deux conditions suivantes :

(1) cet appareil ne doit pas provoquer d'interférences et (2) il doit accepter toute interférence reçue, y compris celles risquant d'altérer son fonctionnement.

Cet appareil a été conçu pour fonctionner uniquement avec l'antenne fournie. L'utilisation de toute autre antenne est strictement interdite par la réglementation d'Industry Canada.

En application des réglementations d'Industry Canada, l'utilisation d'une antenne de gain supérieur est strictement interdite.

Pour empêcher toute interférence radio au service faisant l'objet d'une licence, cet appareil doit être utilisé à l'intérieur et loin des fenêtres afin de garantir une protection optimale.

Si le matériel (ou son antenne d'émission) est installé à l'extérieur, il doit faire l'objet d'une licence.

L'installateur de cet équipement radio doit veiller à ce que l'antenne soit implantée et dirigée de manière à n'émettre aucun champ HF dépassant les limites fixées pour l'ensemble de la population par Santé Canada. Reportez-vous au Code de sécurité 6 que vous pouvez consulter sur le site Web de Santé Canada www.hc-sc.gc.ca/rpb.

Le terme « IC » précédant le numéro de d'accréditation/inscription signifie simplement que le produit est conforme aux spécifications techniques d'Industry Canada.

Taiwan NCC RF notice statement

NCC型式認證設備注意事項 台灣低功率射頻電機設備之使用注意事項

經型式認證合格之低功率射頻電機，非經許可，公司、商號或使用者均不得擅自變更頻率、加大功率或變更原設計之特性及功能。

低功率射頻電機之使用不得影響飛航安全及干擾合法通信；經發現有干擾現象時，應立即停用，並改善至無干擾時方得繼續使用。前項合法通信，指依電信規定作業之無線電信。低功率射頻電機須忍受合法通信或工業、科學及醫療用電波輻射性電機設備之干擾。

Notice to users in the European Union

Products bearing the CE mark are in conformity with the protection requirements of EC Council directives 2004/108/EC, 2006/95/EC, and 1999/5/EC on the approximation and harmonization of the laws of the Member States relating to electromagnetic compatibility, safety of electrical equipment designed for use within certain voltage limits and on radio equipment and telecommunications terminal equipment.

Compliance is indicated by the CE marking.

The manufacturer of this product is: Lexmark International, Inc., 740 West New Circle Road, Lexington, KY, 40550 USA. The authorized representative is: Lexmark International Technology Hungária Kft., 8 Lechner Ödön fasor, Millennium Tower III, 1095 Budapest HUNGARY, A declaration of conformity to the requirements of the Directives is available upon request from the Authorized Representative.

Products equipped with 2.4GHz Wireless LAN option are in conformity with the protection requirements of EC Council directives 2004/108/EC, 2006/95/EC, and 1999/5/EC on the approximation and harmonization of the laws of the Member States relating to electromagnetic compatibility, safety of electrical equipment designed for use within certain voltage limits and on radio equipment and telecommunications terminal equipment.

Compliance is indicated by the CE marking.

Operation is allowed in all EU and EFTA countries, but is restricted to indoor use only.

The manufacturer of this product is: Lexmark International, Inc., 740 West New Circle Road, Lexington, KY, 40550 USA. The authorized representative is: Lexmark International Technology Hungária Kft., 8 Lechner Ödön fasor, Millennium

Tower III, 1095 Budapest HUNGARY, A declaration of conformity to the requirements of the Directives is available upon request from the Authorized Representative.
