Lexmark Security Advisory:

Revision: 1.0
Last update: 31 May 2017
Public Release Date: 31 May 2017

Summary
WannaCry Ransomware Vulnerability

Lexmark devices are not vulnerable to WannaCry ransomware or to the following associated exploits: EternalBlue, EternalSynergy, EternalRomance, EternalChampion. This attack propagates through Microsoft SMBv1 servers.

References

Details
The SMBv1 server in Microsoft Windows Vista SP2; Windows Server 2008 SP2 and R2 SP1; Windows 7 SP1; Windows 8.1; Windows Server 2012 Gold and R2; Windows RT 8.1; and Windows 10 Gold, 1511, and 1607; and Windows Server 2016 allows remote attackers to execute arbitrary code via crafted packets, aka "Windows SMB RemoteCode Execution Vulnerability." Lexmark devices do not run Microsoft SMBv1 servers or any other SMB servers, and only run SMB clients through a non-Microsoft implementation.

Impact
These exploits only impact Microsoft SMBv1 servers. Lexmark devices are not vulnerable to WannaCry ransomware or to associated exploits using SMBv1 servers.
This vulnerability can lead to the unauthorized disclosure of configuration information and user data on the affected device.

Affected Products
No Lexmark devices or products are affected by this vulnerability.

Recommendations
Apply the latest security patches to Microsoft Windows systems.
